Making Connections Jan 24 2022 An examination of the varied paths of the American inter-city bus industry from its origins in the second decade of the 20th century to deregulation in 1982. This sector of transport has been much neglected by historians and this book seeks to uncover a range of useful and pertinent information to those who are interested in understanding entrepreneurial endeavours, patterns of mobility and consumer attitudes. It analyzes the development of the national industry, probes the growth of particular companies and investigates specific aspects of business behaviour. The work is presented as a series of focused essays which offer insights into such topics as regulation, marketing, gender patterns and intermodal competition. It draws on diverse archival materials, government surveys and findings, trade publications, interviews and photographs. A wide-ranging bibliographical essay offers a guide to available sources.

Industrial Power Systems Nov 29 2019 The modernization of industrial power systems has been stifled by industry's acceptance of extremely outdated practices. Industry is hesitant to depart from power system design practices influenced by the economic concerns and technology of the post World War II period. In

order to break free of outdated techniques and ensure product quality and continuity of operations, engineers must apply novel techniques to plan, design, and implement electrical power systems. Based on the author's 40 years of experience in Industry, *Industrial Power Systems* illustrates the importance of reliable power systems and provides engineers the tools to plan, design, and implement one. Using materials from IEEE courses developed for practicing engineers, the book covers relevant engineering features and modern design procedures, including power system studies, grounding, instrument transformers, and medium-voltage motors. The author provides a number of practical tables, including IEEE and European standards, and design principles for industrial applications. Long overdue, *Industrial Power Systems* provides power engineers with a blueprint for designing electrical systems that will provide continuously available electric power at the quality and quantity needed to maintain operations and standards of production.

*Big Little Bus* Jun 24 2019 Little Bus is determined to show snooty Big Bus just how many people - and pets - she can squeeze on board on the way to the Grand Pet Show. It's a surprising number!

*Handbook on Synchrotron Radiation* Dec 23 2021 Volume 2 of this series concentrates on the use of synchrotron radiation which covers that region of the electromagnetic spectrum which extends from about 10eV to 3keV in photon energy and is essentially the region where the radiation is strongly absorbed by atmospheric gases. It therefore has to make extensive use of a high vacuum to transport the radiation to the workstation where the presence of hard X-rays can cause extensive damage to both the optics and the targets used in the experimental rigs. The topics chosen for this volume have been limited to the disciplines of physics and chemistry.

**The Use of Small Buses in Transit Service** Nov 02 2022 Examines the use of small buses -- 30 ft or less in length -- as replacements for large buses in fixed-route, scheduled service or those used in innovative, more flexible operations such as route deviation or demand-response service.

**Traveling Around the World with Mike and Barbara Bivona** Jun 16 2021 Mike and Barbara Bivona have danced their way around the world, embracing the colorful rhythms of each country and culture in their travels. Now, Mike, the author of *Dancing Around the World with Mike and Barbara Bivona*, returns to share more of their globe-trotting adventures in part one of a new travel memoir series. While cruising the islands, they witnessed lava flowing into the surf off the shores of Hawaii and danced on a nightclub floor that once saw the white-uniformed officers of the warships anchored at the naval station in Pearl Harbor. Mike describes the thrill and challenge of learning the intricate steps of the Argentine tango in Buenos Aires and, more importantly, absorbing its proper attitude from master dancers. The brimstone fumes wreathing the slopes of Mt. Vesuvius transported them back in time, as the frozen bodies of the unlucky residents of Pompeii and Herculaneumas well as the evidence of Romans lively erotic imagination left on walls and sculptured into clayinspired numerous colorful conversations. Mike and Barbaras shared passion for art and history has led them to seek out the haunts of other lovers of adventureColumbus, Ponce de Leon, General Custer, circus impresario John Ringling, and the elderly jazz musicians in New Orleans. Part memoir and part travelogue, this volume offers you a trip around the world with the Bivonaswithout ever leaving your chair. *Traveling Around the World with Mike and Barbara Bivona* by Michael Bivona CPA, published by IUniverse, was a winner in the Annual Eric Hoffer Awards for Short Prose and Independent Books 2014 for eBooks nonfiction The US Review of Books reviewed by Barbara Bamberger Scott.

**Crashworthiness of Small Poststandard School Buses** Jul 30 2022 This study reports on the crash performance of small poststandard (manufactured after April 1, 1977) school buses and vans used for school transportation. Occupants of these small school buses generally fared well in the accidents investigated. As a result of this safety study, recommendations were issued to the National Highway Traffic Safety Administration, manufacturers of small school buses, and various associations of school transportation officials and contractors. The recommendations focus on the following safety issues: design of restraining barriers; feasibility of providing lap/shoulder belts or other restraints with upper torso support

for passengers; deficiencies in roof and joint strength; lack of Federal performance standards for school bus windshield retention; design of the boarding door controls in certain small school buses; and the need to correct improper installation and use of lapbelts and other restraints.

**Financial Technology (FinTech), Entrepreneurship, and Business Development** Apr 26 2022 This book constitutes the refereed proceedings of the International Conference on Business and Technology (ICBT2021) organized by EuroMid Academy of Business & Technology (EMABT), held in Istanbul, between 06-07 November 2021. In response to the call for papers for ICBT2021, 485 papers were submitted for presentation and inclusion in the proceedings of the conference. After a careful blind refereeing process, 292 papers were selected for inclusion in the conference proceedings from forty countries. Each of these chapters was evaluated through an editorial board, and each chapter was passed through a double-blind peer-review process. The book highlights a range of topics in the fields of technology, entrepreneurship, business administration, accounting, and economics that can contribute to business development in countries, such as learning machines, artificial intelligence, big data, deep learning, game-based learning, management information system, accounting information system, knowledge management, entrepreneurship, and social enterprise, corporate social responsibility and sustainability, business policy and strategic management, international management and organizations, organizational behavior and HRM, operations management and logistics research, controversial issues in management and organizations, turnaround, corporate entrepreneurship, innovation, legal issues, business ethics, and firm governance, managerial accounting and firm financial affairs, non-traditional research, and creative methodologies. These proceedings are reflecting quality research contributing theoretical and practical implications, for those who are wise to apply the technology within any business sector. It is our hope that the contribution of this book proceedings will be of the academic level which even decision-makers in the various economic and executive-level will get to appreciate.

**THE SILENCE OF SOULS** Jul 26 2019 This anthology is a collection of scribbling that reflects the imagination of 40 fabulous authors. Hope this book talks and listens as well. It is said that "A reader lives a thousand lives before he dies." Do read these poems and tales to get a new experience. This project is initiated by BSP and compiled by Divyak Pratap Singh and Nureen Fatima.

**Insider's Guide to Key Committee Staff of the U.S. Congress 2009** Jan 12 2021 ItOs All Who You Know When Working the System HereOs How to Get to Know the Right People The worldOs attention turned to the U.S. Capitol on January 20, 2009, when Barack Obama took the Presidential oath of office. But inside the building, changes had already taken place that would have broad implications for his agenda. The 111th Congress had convened on January 6 with a far stronger Democratic majority than the one that had preceded it. Their ambitious legislative agenda requires the assistance of their staffs to prepare them for all the important issues on the legislative table. Thus, it is more important than ever to know about senior congressional committee staff members and the role they play in shaping todayOs legislation. While members of the House of Representatives and the Senate enact laws, it is often their staffers who exert the greatest influence in the lawmaking process. Staffers advise their elected bosses, establish political positions on issues, craft legislation, put policies in place, and play important roles on scores of congressional committees. The next time you need to find out who is the most effective person to advocate your cause D turn to the InsiderOs Guide for all the answers. Overall it provides access to an important, if not very visible, component of the legislative process. Recommended-CHOICE The InsiderOs Guide to Key Committee Staff of the U.S. Congress contains in-depth profiles on key congressional staff members that you will not find elsewhere. The information provided on these personnel gives you not only the contact information and other pertinent data but also the inside track to those people. These are the staffers who work with and support the representatives and senators in various important roles that help to enact change or refine existing laws and codes that govern our nation. With all the sweeping changes that have taken place since the Obama administration took office, this essential resource has never been more important or more valuable. This new edition features over 125 new profiles and is designed to be the ultimate for quick and easy reference. The InsiderOs Guide is the

leading source for information on more than 600 congressional staff members. The profiles included feature: In-depth biographical information Detailed professional history and educational background Staff members' areas of expertise and committee role Up-to-date contact information and photograph, when available Staffers' own insights as to their committee's priorities and special projects during this session of Congress Organized by House, Senate, and Joint committee assignments, you'll find both the person you're looking for and information on his or her individual impact on legislation and decision-making. With this Insider's Guide, you'll never again need to question who is the most effective person to advocate your cause.

**Computer Architecture** Jan 30 2020 Not only does almost everyone in the civilized world use a personal computer, smartphone, and/or tablet on a daily basis to communicate with others and access information, but virtually every other modern appliance, vehicle, or other device has one or more computers embedded inside it. One cannot purchase a current-model automobile, for example, without several computers on board to do everything from monitoring exhaust emissions, to operating the anti-lock brakes, to telling the transmission when to shift, and so on. Appliances such as clothes washers and dryers, microwave ovens, refrigerators, etc. are almost all digitally controlled. Gaming consoles like Xbox, PlayStation, and Wii are powerful computer systems with enhanced capabilities for user interaction. Computers are everywhere, even when we don't see them as such, and it is more important than ever for students who will soon enter the workforce to understand how they work. This book is completely updated and revised for a one-semester upper level undergraduate course in Computer Architecture, and suitable for use in an undergraduate CS, EE, or CE curriculum at the junior or senior level. Students should have had a course(s) covering introductory topics in digital logic and computer organization. While this is not a text for a programming course, the reader should be familiar with computer programming concepts in at least one language such as C, C++, or Java. Previous courses in operating systems, assembly language, and/or systems programming would be helpful, but are not essential.

*The SAGE International Encyclopedia of Travel and Tourism* Jul 18 2021 Taking a global and multidisciplinary approach, The SAGE International Encyclopedia of Travel and Tourism brings together a team of international scholars to examine the travel and tourism industry, which is expected to grow at an annual rate of four percent for the next decade. In more than 500 entries spanning four comprehensive volumes, the Encyclopedia examines the business of tourism around the world paying particular attention to the social, economic, environmental, and policy issues at play. The book examines global, regional, national, and local issues including transportation, infrastructure, the environment, and business promotion. By looking at travel trends and countries large and small, the Encyclopedia analyses a wide variety of challenges and opportunities facing the industry. In taking a comprehensive and global approach, the Encyclopedia approaches the field of travel and tourism through the numerous disciplines it reaches, including the traditional tourism administration curriculum within schools of business and management, economics, public policy, as well as social science disciplines such as the anthropology and sociology. Key features include: More than 500 entries authored and signed by key academics in the field Entries on individual countries that details the health of the tourism industry, policy and planning approaches, promotion efforts, and primary tourism draws. Additional entries look at major cities and popular destinations Coverage of travel trends such as culinary tourism, wine tourism, agritourism, ecotourism, geotourism, slow tourism, heritage and cultural-based tourism, sustainable tourism, and recreation-based tourism Cross-references and further readings A Reader's Guide grouping articles by disciplinary areas and broad themes
