Far Off Metal River Feb 21 2022 Drawing on Samuel Hearne ' s gruesome account of an alleged massacre at Bloody Falls in 1771, Emilie Cameron reveals how Qablunaat (non-Inuit, non-Indigenous people) have used stories about the Arctic for over two centuries as a tool to justify ongoing colonization and economic exploitation of the North. Rather than expecting Inuit to counter these narratives with their own stories about their homeland, Cameron argues that it is the responsibility of Qablunaat to develop new relationships with northerners – ones grounded in the political, cultural, economic, environmental, and social landscapes of the contemporary Arctic.

The Handbook of Social Work Research Methods Aug 06 2020 In the field of social work, qualitative research is starting to gain more prominence as are mixed methods and various issues regarding race, ethnicity and gender. These changes in the field are reflected and updated in The Handbook of Soical Work Research Methods, Second Edition. This text contains meta analysis, designs to evaluate treatment and provides the support to help

students harness the power of the Internet. This handbook brings together leading scholars in research methods in social work.

Crusades May 15 2021 Crusades covers seven hundred years from the First Crusade (1095-1102) to the fall of Malta (1798) and draws together scholars working on theatres of war, their home fronts and settlements from the Baltic to Africa and from Spain to the Near East and on theology, law, literature, art, numismatics and economic, social, political and military history. Routledge publishes this journal for The Society for the Study of the Crusades and the Latin East. Particular attention is given to the publication of historical sources in all relevant languages - narrative, homiletic and documentary - in trustworthy editions, but studies and interpretative essays are welcomed too. Crusades appears in both print and online editions. In this issue, Jonathan Riley-Smith studies the death and burial of Latin Christian pilgrims to Jerusalem and Acre and Andrew Jotischky studies the Christians of Jerusalem, the Holy Sepulchre and the origins of the First Crusade.

Handbook of Research on Children's and Young Adult Literature Apr 13 2021 This landmark volume is the first to bring together leading scholarship on children ' s and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children ' s literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

Systematic Reviews and Meta-Analysis Jul 29 2022 When used in tandem, systematic reviews and meta-analysis-- two distinct but highly compatible approaches to research synthesis-- form a powerful, scientific approach to analyzing previous studies. But to see their full potential, a social work researcher must be versed in the foundational processes underlying them. This pocket guide to Systematic Reviews and Meta-Analysis illuminates precisely that practical groundwork. In clear, step-by-step terms, the authors explain how to

format topics, locate and screen studies, extract and assess data, pool effect sizes, determine bias, and interpret the results, showing readers how to combine reviewing and meta-analysis correctly and effectively. Each chapter contains vivid social work examples and concludes with a concise summary and notes on further reading, while the book's glossary and handy checklists and sample search and data extraction forms maximize the book's usefulness. Highlighting the concepts necessary to understand, critique, and conduct research synthesis, this brief and highly readable introduction is a terrific resource for students and researchers alike.

Faster, Better, Cheaper Jun 23 2019 “ This excellent summary of an important part of NASA ’ s history is recommended for all readers. ” —Choice In *Faster, Better, Cheaper: Low-Cost Innovation in the U.S. Space Program*, Howard E. McCurdy examines NASA ’ s recent efforts to save money while improving mission frequency and performance. McCurdy details sixteen missions undertaken as the twentieth century drew to a close—including an orbit of the moon, deployment of three space telescopes, four Earth-orbiting satellites, two rendezvous with comets and asteroids, and a test of an ion propulsion engine—which cost less than the sum traditionally spent on a single, conventionally planned planetary mission. He shows how these missions employed smaller spacecraft and cheaper technology to undertake less complex and more specific tasks in outer space. While the technological innovation and space exploration approach that McCurdy describes is still controversial, the historical perspective on its disappointments and triumphs points to ways of developing “ faster, better, and cheaper ” as a management manifesto. “ Readers interested in either the management or economics of complex organizations will find a wealth of material in this well-written exposition. Fans of space travel, like the author himself, will also enjoy the behind-the-scenes look at NASA ’ s operation. ” —Enterprise and Society

Cultural and Environmental Change on Rapa Nui Jun 15 2021 Rapa Nui, one of the world ’ s most isolated island societies and home to the notable moai, has been at the centre of a tense debate for the past decade. Some see it as the site of a dramatic cultural collapse occurring before Western contact, where a self-inflicted ecocide was brought on by the exhaustion of resources. Others argue that the introduction of Western pathogens and the slave raids of 1862 were to blame for the near extinction of the otherwise resilient Rapa Nui people. *Cultural and Environmental Change on Rapa Nui* brings together the latest studies by prominent Rapa Nui researchers from all over the world to explore the island ’ s past and present, from its discovery by Polynesians, through the first documented contact with Western culture in 1722, to the 20th century. The exiting new volume looks beyond the moai to examine such questions as: was there was a cultural collapse; how did the Rapa Nui react to Westerners; and what responses did the Rapa Nui develop to adjust to naturally- or humanly-induced environmental change? This volume will appeal to scholars and professionals in the fields of history, archaeology and ecology, as well as anyone with an interest in the challenges of sustainable resource management, and the contentious history

of Rapa Nui itself.

Handbook of Research Methods and Applications in Experimental Economics Jul 05 2020

This volume offers a comprehensive review of experimental methods in economics. Its 21 chapters cover theoretical and practical issues such as incentives, theory and policy development, data analysis, recruitment, software and laboratory organization. The Handbook includes separate parts on procedures, field experiments and neuroeconomics, and provides the first methodological overview of replication studies and a novel set-valued equilibrium concept. As a whole, the combination of basic methods and current developments will aid both beginners and advanced experimental economists.
