Peak Sep 18 2021 "There is a new revolution happening in sports as more and more athletes are basing their success on this game-changing combination: health, nutrition, training, recovery, and mindset. Unfortunately, the evidence-based techniques that the expert PhDs, academic institutions, and professional performance staffs follow can be in stark contrast to what many athletes actually practice. When combined with the noise of social media, old-school traditions, and bro-science, it can be difficult to separate fact from fiction. Peak is a groundbreaking book exploring the fundamentals of high performance (not the fads), the importance of consistency (not extreme effort), and the value of patience (not rapid transformation). Dr. Marc Bubbs makes deep science easy to understand, and with information from leading experts who are influencing the top performers in sports on how to achieve world-class success, he lays out the record-breaking feats of athleticism and strategies that are rooted in this personalized approach. Dr. Bubbs expertly brings together the worlds of health, nutrition, and exercise and synthesizes the salient science into actionable guidance.

New Performance/New Writing Aug 30 2022 Contemporary theatre is going through a period of unparalleled excitement and challenge. Terms like 'postmodern' and 'postdramatic' have their own contested and defended histories, while notions of truth in verbatim theatre are open to serious critical challenge. Theatre writing can result in no words being spoken and nothing appearing on the page, and productions are stretching the boundaries of space, place and context like never before. This revised and significantly expanded edition of *New Performance/New Writing* explores immersive and solo theatre, autoethnography, applied drama, performance writing, plot, story, narrative and devising. It presents an invaluable response to questions that arise from new theatre, prompting active reading that enhances classroom and workshop learning, and improves productivity in rehearsal. Each chapter explores a key aspect of theatre study, while an extensive timeline of theatre events gives a broad overview of its evolution. Case studies on practitioners as diverse as Kneehigh, Punchdrunk, Mark Ravenhill and Forced Entertainment are scattered throughout the book, along with detailed suggestions for workshops, which encourage readers to test some of the book's ideas in practice.

Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Phosphorus Derived Chemicals Segment of the Phosphate Manufacturing Point Source Category Apr 25 2022 *New Directions in Mobile Media and Performance* Jan 23 2022 *New Directions in Mobile Media and Performance* explores various performative projects and forms of expression that have emerged since the onset of the smartphone.

It focuses mainly on new concepts and developments that have emerged in mobile media performance. It showcases the intimate and phenomenological mobile aesthetic that has been unfolding within networked performance and media art projects for over a decade and a half. This aesthetic utilises the potential and affordances with each iteration and update of modern smartphones. Themes of embodiment, presence, liveness and connection through mobile, networked, and remote technology are revisited in the context of HD mobile cameras, selfies and live video streaming from the phone, as well as the impact of peer production, openness and Maker culture on mobile media performance practices. It explores the surge in development of wearable devices in performance, as well as how the 'quantified-self movement' has affected performance works. It deals with concepts and developments in intermedial performance that incorporate mobile and wearable devices, especially from the artist's, designer's or dramaturge's perspective as the creator and their creative process, working with technology as a collaborator, not just a tool or guide. The book demonstrates how artists have repurposed the device – transforming it from merely a communication device, using voice and text only – to become a new collaborative medium, a full visual, synaesthetic, interactive and performative tool of deeper expression and social change. It discusses seminal works and the evolution of the medium, within intermedial digital art and performance practices as medium for artistic expression, creative process and staged performances. It focuses on projects and artists who have pushed mobile media performance beyond the conventional blackbox. Emerging visual, digital, interactive, tactile, gestural and theatrical or performance projects that incorporate mobile or wearable devices, used as vehicles for more challenging, experimental, experiential and immersive performative artworks are highlighted. The book also contextualises Baker's own media research and performance practice within the larger landscape with the field. It is bookended with interviews with the artists themselves on their creative process and intentions. It is the outcome of three years of research of artistic works around the world, interviews, in-person viewings of performances, as well as incorporating and reflecting on her own ongoing practice and projects in context.

New Directions in Assessing Performance Potential of Individuals and Groups Oct 20 2021 As an all-volunteer service accepting applications from nearly 400,000 potential recruits annually from across the U.S. population, the U.S. military must accurately and efficiently assess the individual capability of each recruit for the purposes of selection, job classification, and unit assignment. *New Directions for Assessing Performance Potential of Individuals and Groups* is the summary of a workshop held April 3-4, 2013 to examine the future of military entrance assessments. This workshop was a part of the first phase of a larger study that will investigate cutting-edge research into the measurement of both individual capabilities and group composition in order to identify future research directions that may lead to improved assessment and selection of enlisted personnel for the U.S. Army. The workshop brought together scientists from a variety of relevant areas to focus on cognitive and noncognitive attributes that can be used in the initial testing and assignment of enlisted personnel. This report discusses the evolving goals of candidate testing, emerging constructs and theory, and ethical implications of testing methods.

Beyond the Score Jun 15 2021 In *Beyond the Score: Music as Performance*, author Nicholas Cook supplants the traditional musicological notion of music as writing, asserting instead that it is as performance that music is loved, understood, and consumed. This book reconceives music as an activity through which meaning is generated in real time, as Cook rethinks familiar assumptions and develops new approaches. Focusing primarily but not exclusively on the Western 'art' tradition, Cook explores perspectives that range from close listening to computational analysis, from ethnography to the study of recordings, and from the social relations constructed through performance to the performing (and listening) body. In doing so, he reveals not only that the notion of music as text has hampered academic understanding of music, but also that it has inhibited performance practices, placing them in a textualist straightjacket. Beyond the Score has a strong historical emphasis, touching on broad developments in twentieth-century performance style and setting them into their larger cultural context. Cook also investigates the relationship between recordings and performance, arguing that we do not experience recordings as mere reproductions of a performance but as performances in their own right. Beyond the Score is a comprehensive exploration of new approaches and methods for the study of music as performance, and will be an invaluable addition to the libraries of music scholars-including musicologists, music theorists, and music cognition scholars-everywhere.

The Arden Research Handbook of Shakespeare and Social Justice Oct 27 2019 *The Arden Research Handbook of Shakespeare and Social Justice* is a wide-ranging, authoritative guide to research on Shakespeare and issues of social justice and arts activism by an international team of leading scholars, directors, arts activists, and educators. Across four sections it explores the relevance and responsibility of art to the real world ? to the significant teaching and learning, performance and practice, theory and economies that not only expand the discussion of literature and theatre, but also open the gates of engagement between the life of the mind and lived experience. The collection draws from noted scholars, writers and practitioners from around the globe to assert the power of art to question, disrupt and re-invigorate both the ties that bind and the barriers that divide us. A series of interviews with theatre practitioners and scholars opens the volume, establishing an initial portfolio of areas for research, exploration, and change. In Section 2 'The Practice of Shakespeare and Social Justice' contributors examine Shakespeare's place and possibilities in intervening on issues of race, class, gender and sexuality. Section 3 'The Performance of Shakespeare and Social Justice' traces Shakespeare and social justice in multiple global contexts; engaging productions grounded in the politics of Mexico, India, South Africa, China and aspects of Asian politics broadly, this section illuminates the burgeoning field of global production while keeping as a priority the political structures that make advocacy and resistance possible. The last section on 'Economies of Shakespeare' describes socio-economic and community issues that come to light in Shakespeare, and their potential to catalyse ongoing discussion and change in respect to wealth, distribution, equity, and humanity. An annotated bibliography provides further guidance to those researching the subject.
