[Shadow Libraries](#) Dec 25 2021 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, Shadow Libraries explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several "open" publication models that have emerged in the higher education sector. From the bottom up, Shadow Libraries explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. Shadow Libraries is a study of that tension in the digital era. Contributors Balázs Bodó, Laura Czerniewicz, Mirosław Filiciak, Mariana Fossatti, Jorge Gemetto, Eve Gray, Evelin Heidel, Joe Karaganis, Lawrence Liang, Pedro Mizukami, Jhessica Reia, Alek Tarkowski [Educating For Ethical Survival](#) Aug 28 2019 In this volume experienced educators discuss the task of teaching ethics to professionals, managers and others who are practically-minded; and expert contributors explore the nature of ethical survival in contemporary society and the range of organizations it

[Consumer Optimization Problem Solving](#) Jan 14 2021 What algorithms are tractable depends on the speed of the processor. Given the speed of digital computers, polynomial algorithms are considered tractable. But, a human can take several seconds to make one binary comparison between two pens. Given this slow speed, sublinear algorithms are considered tractable for an unaided human and this defines Simon's concept of bounded rationality. Humans make simplifications to solve the intractable consumer optimization problem. Consumers search for goods and services item-by-item, which greatly reduces the number of alternatives to consider. In addition, consumers have operators that can process a set in a single operation. Also, consumers budget by incremental adjustment. In considering consumer performance the question to ask is how close to optimal is consumer performance and not whether consumers optimize as a yes/no question. Given the ordinal nature of utility theory this creates a basic measurement problem. The book presents a review of the literature on consumer performance. This is an opportune time to study consumer procedures because the Internet provides a media to make substantial improvements in consumer performance. The book includes a case study comparing the performance of a digital camera selection code with the advice of sales people. A field experiment demonstrates that the software code provides better advice. multimodality in English language teaching textbooks, this book focusses on how language and image are co-deployed within these resources in order to create and convey interpersonal meaning. Presenting cutting-edge research in appraisal studies and multimodal discourse analysis, Yumin Chen uses systemic functional linguistics and social semiotics to investigate how different voices are introduced and aligned inter-modally in textbooks, extending the appraisal systems of engagement and graduation across language and image. The book also demonstrates how linguistic and visual semiotic resources co-instantiate attitude, paying special attention to the attitudinal dimension of curriculum goals for school students of different ages. Furthermore, it examines how different kinds of coding orientation are deployed in various educational contexts and different constituent genres. Demonstrating how the linguistic and semiotic theories can be adapted to analyze multimodal texts across language and image, *Interpersonal Meaning in Multimodal English Textbooks* offers new perspectives on how to employ multimodal resources to enhance the teaching and learning of English as a foreign language. **Importing Diversity** Oct 30 2019 "Japan's official efforts at internationalization have been painful to witness. . . . The government's JET program is easily the most ambitious and its history and on-the-ground problems offer significant insights into Japan's struggle to open up to the outside. David McConnell's book provides a most interesting analysis of why this process has been so complex and difficult. It tells us much about Japanese society and education at this critical point in time."—Thomas P. Rohlen, author of *For Harmony and Strength* "In this superb and insightful book, David McConnell explores perhaps the greatest (certainly the biggest) education program in humankind's history, offering patient, balanced analysis of its workings, problems, and accomplishments. McConnell's confucian equanimity and multifaceted perspectives lend the book a depth seldom found in contemporary writing on Japan."—Robert Juppe, First ALT Advisor for the JET Program "This is a very astute, thorough, and personal account of the JET program as a case study of how a program can both change a system and provoke defenses against any change. With his fine ethnographic

and analytic material, McConnell reveals the faultlines of "internationalization" in Japan. This is a great contribution to the study of organizations, marginality, and shifts in global and national identity."—Merry White, author of *Japanese Families: It Takes a Nation* [College Text Books](#) Mar 28 2022 The federal government strives to make post-secondary education accessible & affordable, primarily by providing financial aid to students & their families. Given that nearly half of undergraduates receive federal financial aid, Congress is interested in the overall cost of attendance, including the cost of textbooks. This report determines: (1) what has been the change in textbook prices; (2) what factors have contributed to changes in textbook prices; & (3) what factors explain why a given U.S. textbook may retail outside the U.S. for a different price. [Investigating Content and Language Integrated Learning](#) Apr 16 2021 This book provides a rich and unique longitudinal account of content and language integrated learning (CLIL). The chapters report on the findings from a large-scale, three-year research project undertaken at senior high school level in Sweden. The ecological perspective, with quantitative and qualitative methods, gives voice to both learners and teachers, as well as being an excellent critical example of how such longitudinal research might be carried out. Through emic and etic approaches, the book provides insights into language learning outcomes, both with regard to the target language English and the majority language Swedish; learner motivation among CLIL and non-CLIL students; effects of extramural exposure to English; issues in relation to assessment in CLIL and much more. As a whole, the book offers an unprecedented overview of learner outcomes and detailed insights into the comparison of CLIL and non-CLIL education. While it is embedded in the Swedish context, the nature of this study means that it has strong implications on an international basis.

*The "People Power" Education Superbook: Book 20. Practical College Guide (Living On Your Own, Probably for the First Time)* May 30 2022 You're probably living a comfortable life at high school where you're well-respected and have friends then you go to college and you're just another generic, average student who is not popular like you were at home. Relax. Everyone else is like you. You have to put yourself out there if you want to make friends, do fun things and enjoy the ride. The average 18 year old is massively brainwashed. He has no idea of who he is in his true nature. He's trying to achieve success by society's formula which is college. Many kids go to college not even knowing that there are no jobs for many of the social science fields. They think that if the college offers it as a major, there must be a job waiting at the end. This is so stupid. Most 18 year-olds are self-centered. They think they're special because they're going to college then they go home and try to act scholarly like those nerdy professors they've been listening to for the past four months.

[Alternative Sources of Energy Modeling and Automation](#) Jun 26 2019 Micro-power domestic organic Rankine cycle (ORC) systems and the selection of the expander and the working fluid

are presented, analyzed thoroughly, and numerically evaluated. A promising decentralized hybrid PV-SOFC system is investigated for providing useful energy supply to commercial buildings, capable of power and heat generation at a lower cost. A hybrid solar-combined cycle power plant integrated with a packed-bed thermal energy storage system with a novel recycling configuration enables robust control of collector temperature and net power during times of high solar activity. An automated hybrid (solar and biomass) power plant for thermal energy production for indoor space heating loads coverage is presented. A comprehensive and up-to-date literature review is presented of non-iterative methods for the extraction of the single diode model parameters of photovoltaic modules. A prototype custom built two-speed gearbox with a single stage transmission electric vehicle achieves significant reductions in the overall energy consumption. Two new fuzzy models are presented of high concentrator photovoltaics using the high-accuracy Takagi-Sugeno-Kang approach and the ease of interpreting the Mamdani linguistic rules. Finally, the impact of plug-in hybrid electric vehicles (PHEVs) in the primary frequency regulation is studied and the effects of PHEVs in non-interconnected isolated power systems with significant renewable energy source (RES) penetration are demonstrated through simulations of the isolated power system of Cyprus Island.

**International Handbook of Protestant Education** Aug 09 2020 Since their earliest days, institutions providing a Protestant education have always been respected and sought-after for their rigor and relative freedom from dogma—and despite today's secularism and plurality, they remain so. This international handbook is the ultimate companion to protestant schooling worldwide. Its 39 chapters form the most comprehensive and wide-ranging treatment of the subject yet available, addressing Protestant education on all six inhabited continents and featuring the perspectives of leading authorities and public figures. The contributions cover in detail not only the facts and features of Protestant schooling in sundry nations, but also integrate a range of themes common to them all, themes so vital that they are of central concern to Christians around the world and of whatever denomination. Some of these topics are school choice, globalization, Bible pedagogy and character education, the fine arts, parental involvement, and the rise of Christianity in previously inaccessible locations such as China. The handbook's stellar list of authors is a Who's Who of authorities on the subject and includes a renowned American evangelical, a former historian of the US House of Representatives, and White House consultants responsible for framing legislation. The many contributors from outside the USA are leading academics conducting seminal research on numerous topics in the field. Both exhaustive and authoritative, *The International Handbook of Protestant Education* will be an invaluable asset to educators, ministers, parents, policy makers political leaders of any denomination—or none. *Capturing Finance* Feb 24 2022 Arbitrage—the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit—is

fundamental to the practice of financial trading and economic understandings of how financial markets function. Because traders complete transactions quickly and use other people's money, arbitrage is considered to be riskless. Yet, despite the rhetoric of riskless trading, the arbitrage in mortgage-backed securities led to the 2008 financial crisis. In *Capturing Finance* Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism. She shows how arbitrage relies on a system of abstract domination built around risk. The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while financial institutions amass profits. Hardin insists that mitigating financial capitalism's worst consequences, such as perpetuating class and racial inequities, requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large.

**Teaching Post Keynesian Economics** Jul 28 2019 This book contends that post Keynesian economics has its own methodological and didactic basis, and its realistic analysis is much-needed in the current economic and financial crisis. At a time when the original message of Keynes's General Theory is no longer present in the most university syllabuses, this book celebrates the uniqueness of teaching post Keynesian economics, providing comparisons with traditional economic rationale and illustrating the advantages of post Keynesian pedagogy. Against a backdrop in which neo-classical textbooks prevail, the expert contributors demonstrate that Keynes and The General Theory possess indispensable insight that would furnish students with a clearer understanding of the world economy in which they live. They explore the teaching of post Keynesian economics from a number of different perspectives, covering topics such as open system theorizing, pluralism in teaching, rhetoric in the spirit of Keynes, uncertainty, expectations and money. A critique of mainstream and traditional economic textbooks is also provided. This highly unique and fascinating book will provide an invaluable reference tool for teachers and researchers in post Keynesian economics, as well as their students.

**Interaction** Oct 23 2021 This book employs the realm of English Language Teaching (ELT) as a discursive point of departure to explore how individuals, groups, entities and institutions apprehend, embrace, deal with, manipulate, problematize and resist glocal flows of people, ideas, information, goods, and technology. It apprehends and attends to tensions arising from the fluidly local-global construction and negotiation of borders of identity and interaction within a diverse array of contexts and English education therein. These tensions, whether conceptual or pedagogical, may arise in and through governmental and institutional policymaking, teacher training, or curriculum and materials development, and in the learning experience both within and beyond the classroom, as teachers and students engage with course content and each other.

**The Search for Survival** Jun 06 2020 This book examines organizations that responded poorly to a technological disruption and have consequentially lost significant market share or gone out of business. The author discusses examples from industries such as recorded music, book and newspaper publishing, video rentals, and higher education.

**Intercultural Learning in Textbooks** Jan 02 2020 Given the interest in recent years in developing Intercultural Communicative Competence (ICC) as a key aim in teaching a foreign language, textbooks are often studied and evaluated in terms of their roles and impacts on the promotion of intercultural awareness among language learners. While some textbook designers prefer to focus on the target language culture, others mainly consider the local culture. However, as most of the research has been conducted on a textbook or a series of coursebooks in a single country, there are few studies which analyze the textbooks comparatively in an international setting concerning cultural matters. Thus, the present work attempts to enrich this discussion by analyzing four English textbooks at the first grade of upper-secondary school level from intercultural perspectives in Germany, Iran, the Netherlands and Sweden. In this case, this study aims to investigate the extent to which the texts and activities in the textbooks develop intercultural competence.

**Guyton & Hall Textbook of Medical Physiology\_3rd SAE-E-book** Dec 01 2019 Chapters have been rearranged and often split to work towards one chapter-one lecture model so that the text is linked to curriculum objectives which appeals to both students and faculty. Narrative length has been reduced while ensuring the original flow and explanation of concepts is not affected. Updated Learning Objectives (e.g. Applied physiology of the Renal System) and Glossary of Terms in the beginning of every chapter. Short, easy-to-read, masterfully edited chapters and a user-friendly full-color design facilitates better learning and retention. Features expanded clinical coverage including obesity, metabolic and cardiovascular disorders, Alzheimer's disease, and other degenerative diseases. Complex Concepts/Processes are summarized in flowcharts/flow diagram for better

understanding. Contains more than 1000 carefully crafted diagrams and drawings ensures better understanding of Physiology. Offers Clinically Oriented perspective - bridging basic physiology with pathophysiology, including cellular and molecular mechanism important for Clinical medicine. Updated throughout based on the Guyton and Hall Textbook of Physiology 14th edition to reflect the latest knowledge in the field. The information of the book has been updated to include all areas of the new MCI curriculum (these are either embedded within the existing chapters or as several new chapters at the end of the book).

**Where Have All the Textbooks Gone?** May 06 2020 This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

The Economics of the Publishing and Information Industries Aug 01 2022 Books, scholarly journals, business information, and professional information play a pivotal role in the political, social, economic, scientific, and intellectual life of nations. While publications abound on Wall Street and financial service companies, the relationship between Wall Street's financial service companies and the publishing and information industries has not been explored until now. The Economics of the

Publishing and Information Industries utilizes substantive historical, business, consumer, economic, sociological, technological, and quantitative and qualitative methodologies to understand the people, trends, strengths, opportunities, and threats the publishing industry and the financial service sector have faced in recent years. Various developments, both economic and demographic, contributed to the circumstances influencing the financial service sector's investment in the publishing and information industries. This volume identifies and analyzes those developments, clearly laying out the forces that drove the marriage between the spheres of publishing and finance. This book offers insight and analysis that will appeal to those across a wide variety of fields and occupations, including those in financial service firms, instructors and students in business, communications, finance, or economics programs, business and financial reporters, regulators, private investors, and academic and major public research libraries. *Textbooks in Academic Libraries* Dec 13 2020 Shortly after the syllabi are posted, and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core-course textbook reserve program; funding sources for starting or piloting a program; using aggregated enrollment, grade, and textbook cost data to identify "high impact" courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings, and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

The Bases of Chemical Thermodynamics Feb 01 2020 Volume 1: In this volume, the fundamental aspects of thermodynamics are presented. The first and second laws of thermodynamics are illustrated. The need to define thermodynamic temperature and the nature of entropy are explained. The book explores the meaning of auxiliary thermodynamic functions, the origin, usefulness and use of partial molar quantities. Gaseous systems and phase equilibria, in systems where chemical reactions do not take

place, are described.

**Microeconomics** Jun 18 2021 Business professionals that struggle to understand key concepts in economics and how they are applied in the field rely on Microeconomics. The fourth edition makes the material accessible while helping them build their problem-solving skills. Phenomenology of Particle Physics Sep 29 2019 Written for a two-semester Master's or graduate course, this comprehensive treatise intertwines theory and experiment in an original approach that covers all aspects of modern particle physics. The author uses rigorous step-by-step derivations and provides more than 100 end-of-chapter problems for additional practice to ensure that students will not only understand the material but also be able to apply their knowledge. Featuring up-to-date experimental material, including the discovery of the Higgs boson at CERN and of neutrino oscillations, this monumental volume also serves as a one-stop reference for particle physics researchers of all levels and specialties. Richly illustrated with more than 450 figures, the text guides students through all the intricacies of quantum mechanics and quantum field theory in an intuitive manner that few books achieve.

*Representations of Nature of Science in School Science Textbooks* Jul 20 2021 Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provides a global perspective on NOS from elementary to college level and discusses the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks. This comprehensive analysis is a definitive reference work for the field of science education.
