Baumgarten's Elements of First Practical Philosophy Jun 17 2021 This book presents the first English translation of Alexander Baumgarten's *Initia Philosophiae Practicae Primae*, the textbook Kant used in his lectures on moral philosophy. Originally published in Latin in 1760, the *Initia* contains a systematic, but original version of the universal practical philosophy first articulated by Christian Wolff. In his personal copy, Kant penned hundreds of pages of notes and sketches that document his relation to this earlier tradition. Translating these extensive elucidations into English, together with Kant's notes on the text, this translation offers a complete resource to Kant's reading of the *Initia*. To facilitate further study, first-time translations of elucidatory passages from G. F. Meier and Wolff are also included, alongside a German-English-Latin glossary. The translators' introduction provides a biography of Baumgarten, a discussion of the importance of the *Initia*, its relation to Wolff's and Meier's universal practical philosophy and its role in Kant's lectures. By shedding new light on the arguments of Kant's mature works and offering insights into his pre-Critical moral thought, *Elements of First Practical Philosophy* reveals why Baumgarten's work is essential for understanding the background to Kant's philosophy.

Principles of Elocution and Vocal Culture Aug 20 2021 Excerpt from *Principles of Elocution and Vocal Culture: In Which the Rules for Correct Reading and Speaking, and Directions for Improving and Strengthening the Voice, Are Given* This work is brief, but comprehensive, containing the more important ideas of Elocution. Most works of its character are burdened with complicated rules and exceptions: so that. But few, if any, attempt to master them. I have endeavored to avoid this serious defect, and to present a popular method, which every person at once comprehends and finds pleasure in perusing. This work is published, 'in part, for my own use as a teacher of elocution, and also as a text-book for teachers and students generally. The directions for training and developing the vocal organs are explicit, and the selections for elocutionary practice 'varied, and from the best authors. An appreciation and use of. The American Founding Sep 28 2019 America's Founding Fathers shared similar beliefs on the nature of civic life and the character of those supposed to be able to self-govern. Although they studied the failed republics of the ancient world, they believed that classical ideals were still applicable to politics. This unique contribution to the literature on American Founding gathers leading thinkers who set out not to relate its history, but its intellectual underpinnings. They explore the Founding Fathers' assumptions about civic life, human nature, political institutions, private morality, aesthetics, education, and history. Chapters on natural law, the Judeo-Christian conception of human nature, the influence of Aristotle and Cicero, the symbolic role of architecture, and the importance of education help understand the foundations that led to the Declaration of Independence and a constitutional charter that aimed to be universal in its human aspirations. This authoritative work provides a conservative response to more liberal interpretations of America. It will enrich the debate on civic life and be a key resource to anyone interested in America's "experiment in ordered liberty."

Debating Health Care Ethics, Second Edition Aug 08 2020 In this updated second edition, *Debating Health Care Ethics* explores contemporary moral challenges in health care, providing students with the essential tools to understand and critically evaluate the leading arguments in the field and to develop their own arguments on important moral problems in health care. Written in a clear and concise way, the textbook's first three chapters explore the nature of arguments and ethical theories, while the remaining chapters introduce students to moral problems in health care through case studies and dramas that feature complex scenarios involving patients, family members, and health care providers. Each case study and drama is followed by a lively debate where the authors defend their unique approaches to the dilemma. This new edition now includes more gender inclusive dramas, an expanded discussion of feminist ethics, a case study on euthanasia that highlights changes to Canadian law, and an update on fetal consciousness that informs the debate on abortion. Emphasizing critical issues in health care from a Canadian perspective, this essential textbook will benefit students in philosophy, nursing, and health studies.

The Right to Equality in European Human Rights Law Apr 15 2021 A right to equality and non-discrimination is widely seen as fundamental in democratic legal systems. But failure to identify the human interest that equality aims to uphold reinforces the argument of those who attack it as morally empty or unsubstantiated and weakens its status as a fundamental human right. This book argues that an understanding of the human interest which equality aims to uphold is feasible within the jurisprudence of the European Court of Human Rights (ECtHR) and the European Court of Justice (ECJ). In comparing the evolution of the prohibition of discrimination in the case-law of both Courts, Charilaos Nikolaidis demonstrates that conceptual convergence within the European Convention on Human Rights (ECHR) and the EU on the issue of equality is not as far as it might appear initially. While the two bodies of equality law are extremely divergent as to the requirements they impose, their interpretation by the international judiciary might be properly analysed under a common light to emphasise the substantive dimension of equality in European Human Rights law. The book will be of great use and interest to scholars and students of human rights, discrimination law, and European politics.

How Should I Pronounce? Or the Principles of the Art of Correct Pronunciation Mar 27 2022 Excerpt from *How Should I Pronounce? Or the Principles of the Art of Correct Pronunciation: A Manual for Schools, Colleges, and Private Use* Aristotle's saying concerning personal beauty, that it is better than all the letters Of recommendation in the world, might, perhaps, with greater propriety, be applied to the matter Of correct pronunciation at all events, it is certain that nothing marks more quickly a person's mental and social status than his practice in this regard. It is the best primal-fan? Evidence of general culture. On this account it appeals to all, since there is no one wholly indifferent to the estimate formed of his social position, and who, in consequence, would not cultivate those arts that are at once the criteria Of social standing and the stepping-stones to a more liberal culture. Although this field Of literature is not an untrudden one, it is still, in many respects. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Self-Action Leadership (Volume 1) Feb 23 2022 *Self-Action Leadership (Volumes 1 and 2)* provides the first, and only, books of their kind in the academic world today. This two volume set single-handedly carves out a new and unique scholarly niche by providing the first comprehensive and secular manual to holistically address society's universal need for personal leadership and character education. Its single-minded aim is the global promotion and proliferation of leadership, character, and life skills education in nations, communities, organizations, schools, homes, and individual lives everywhere. The concept of Self-Action Leadership (SAL) is rooted in 30 years of extensive research spanning the fields of self-leadership, leadership, action research, character education, and autoethnography. In addition to drawing on the scholarship of these extant fields, SAL simultaneously builds upon them by introducing an original theory and model that executives, administrators, scholars, teachers, and practitioners alike can universally utilize to their own advantages and to the benefit of their colleagues, subordinates, and students. Volume I—*The Self-Action Leadership Theory*—contains prefacing material for the combined texts. It also includes the first four book sections of the two volume set.

Principles of Cognition, Language and Action Jul 19 2021 This book exposes serious flaws in the reductionist assumptions about Mind and Matter of Naturalism and Constructivism, which underlie research and theorizing on cognition, language and action within current academic psychology. The author argues for alternative, radically different assumptions about the relationship between the mental and material reality, which are not only tenable, but as a matter of principle must be taken for granted, and be the point of departure for all investigations into both reality and our cognition and description of it. The consequences of the arguments in this book are far-reaching. The assumptions and principles derived from them offer a consistent foundation for a science of psychology. They also open up new and straightforward ways of dealing with the key issues of truth and intentionality, subjectivity and objectivity, of relevance to philosophy, the humanities and social sciences.

Principles of Administrative Procedure in EC Law Apr 27 2022 This book presents an analysis of the recent

development of administrative procedures in EC law. It is a pathbreaking study of what might be termed the “constitutionalising norms” now emerging, including a range of ‘process rights’ and procedural standards, such as the right to access to information, the right to be heard, the principle of care and duty to state reasons. These new standards are increasingly applied in areas as diverse as competition, State aids, customs matters, anti-dumping and the European Social Fund. Different strands of case-law of the EC courts are thus connected to document the overall evolution of procedural rules peculiar to the EC administrative system as a whole. The author adopts a critical stance, in particular, towards the case-law of the Court of First Instance and points out the increasing pressure being brought to bear on the European Commission in respect of its procedural requirements. Particular emphasis is placed on the concept of ‘care’, i.e. the duty to collect and examine the factual and legal points of individual cases impartially and carefully. The book reveals both the theoretical and practical relevance of this principle as a means of both procedural and substantive review and the reasons why it is likely to be misinterpreted by the courts.

Principles of Proper Conduct for Supranational, State and Private Actors in the European Union Oct 02 2022 This book contains the proceedings of an international colloquium in honour of Professor Walter van Gerven which was held in Leuven on 15-16 September 2000 and organized by the Universities of Leuven and Maastricht in the framework of the *Ius Commune* Research School. Walter van Gerven has been a professor of Law in Leuven for four decades and in Maastricht between 1994 and 2000; he has been Advocate General at the Court of Justice of the European Communities (1988-1994) and was Member of the Committee of Independent Experts which screened the European Commission in 1999. The book is built around three themes: good governance in the European Union, judicial review of administrative action and liability of supranational, State and private actors. A great number of very distinguished scholars have contributed to this book: Lord Slynn of Hadley, Deirdre Curtin, Christiaan W.A. Timmermans, Gil Carlos Rodríguez Iglesias, Sacha Prechal, Jürgen Schwarze, Takis Tridimas, Bruno de Witte, Jeremy Lever, Pierre Larouche, Francis G. Jacobs, Luc Gyselen, Paul J.G. Kapteyn, Arthur Hartkamp and Pieter VerLoren van Themaat.

Principles of Radiation Interaction in Matter and Detection Nov 30 2019 This book, like the first and second editions, addresses the fundamental principles of interaction between radiation and matter and the principles of particle detection and detectors in a wide scope of fields, from low to high energy, including space physics and medical environment. It provides abundant information about the processes of electromagnetic and hadronic energy deposition in matter, detecting systems, performance of detectors and their optimization. The third edition includes additional material covering, for instance: mechanisms of energy loss like the inverse Compton scattering, corrections due to the Landau-Pomeranchuk-Migdal effect, an extended relativistic treatment of nucleus-nucleus screened Coulomb scattering, and transport of charged particles inside the heliosphere. Furthermore, the displacement damage (NIEL) in semiconductors has been revisited to account for recent experimental data and more comprehensive comparisons with results previously obtained. This book will be of great use to graduate students and final-year undergraduates as a reference and supplement for courses in particle, astroparticle, space physics and instrumentation. A part of the book is directed toward courses in medical physics. The book can also be used by researchers in experimental particle physics at low, medium, and high energy who are dealing with instrumentation.
