NASA Authorization for Fiscal Year 1961 Sep 20 2021 <u>Grammar and the Advanced Learner</u> Mar 15 2021 How do we learn a second language? Is it necessary to study grammar or is it enough just to be exposed to and use the language we want to learn? Is the learning of a second language similar to or fundamentally different from first language learning? These questions are dealt with in Grammar and the Advanced Learner. The purpose of the book is to find out whether the old question of the usefulness of grammar study can be answered by current theories and research results in the field of second language acquisition. A study of a group of Swedish university students of English forms the basis of the discussion. Most research concerns earlier stages of learning and it is therefore interesting to consider the problems of advanced learners to whom some of the generally accepted theories may not be applicable. Not only the learning process but also teaching methods have received the attention of theorists and researchers. Some of their research on methods and their proposals for teaching grammar are presented and discussed. Can linguists supply answers to the questions that teachers are confronted with in their classrooms? Grammar and the Advanced Learner places the advanced learner in focus but it

also deals with second language acquisition theories and research from a general perspective. It should therefore be of interest not only to teachers of advanced learners but also to those who teach at earlier stages, and to adult learners of foreign languages who are curious about their own learning process.

English in Films Vol. 3: for Advanced Students--English as a Second Language Sep 08 2020 English in Films is a series of classroom exercises for teachers of English as a Second Language for study at home students. The movies have been carefully selected for their language and cultural value in learning and improving one's English--vocabulary, listening, conversation, writing, grammar and American culture. Our approach is to

have fun while learning and to learn in a multidimensional way. Answers are provided, and the packets may be copied and edited for non-commercial use. Each film is broken into roughly 15-minute segments, which are divided into sections for vocabulary development, listening, writing, discussion and testing. Before watching the film segment, the student works on vocabulary words listed in the order they appear in the film. There is a matching or multiple choice exercise followed by fill-in-the-blanks sentences. For visual learners a drawing section is included. Answers are provided. After students have absorbed the vocabulary words, they read

over the viewing questions, watch the film segment and answer the questions. Each viewing section has several ideas for discussion and writing. At the end of the film, a number of general questions are provided for the movie as a whole. Finally, students take the test. Jon Michael Miller is a veteran teacher of English as a Second Language. After years of teaching English on the secondary level and at Ohio State, Penn State and St. Petersburg College, he spent fifteen years focusing on ESL. Semi-retired, he now has an ESL-based website--www.EnglishInFlorida, from which he teaches international executives, students, travelers

and immigrants online and in person. He created the English in Films series from materials used in his own classroom and consulting. Students enjoy the technique, and it is fabulously effective and fun to use.

Peer Interaction and Second Language Learning Oct 22 2021 This volume represents the first collection of empirical studies focusing on peer

interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of

learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.
