E-Business Essentials Sep 19 2021 This special issue of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

Physician's Guide to Arthropods of Medical Importance, Sixth Edition Aug 31 2022 2013 BMA Medical Book Awards Winner As the importance of medical entomology increases, access to up-to-date, authoritative information also becomes increasingly critical. For nearly 20 years, the award-winning, bestselling *Physician's Guide to Arthropods of Medical Importance* has established itself as a standard reference in doctors' offices and emergency rooms. Now in its sixth edition, this book maintains its status as the ultimate easy-to-use guide for physicians and other health care providers, public health officials, and pest control professionals who need to identify arthropods, the common signs and symptoms of vector-borne diseases, and the recommended forms of treatment. The book begins by describing the pathologic conditions caused by arthropods and the principles of treating those conditions. It elucidates the rationale behind the various treatment regimes and the underlying principles of controlling the immune response. It covers identification of arthropods and common signs and symptoms of vector-borne disease. The book then provides an alphabetical arrangement of arthropods of medical importance with clearly marked subheadings for easy information access. The author concludes with personal protection methods against arthropods. Now with color pictures throughout, the Sixth Edition's chapters have been updated with the latest information and current references. Older photographs and line drawings have been replaced with new and improved versions, and the interactive CD-ROM has also been updated with more pictures and videos as well as helpful identification aids, additional reading materials, and web links. This work is the most up-to-date reference on arthropods available. Jerome Goddard recently appeared on *The Colbert Report*.

First Course Keyboarding and Document Processing Sixth Edition Jul 30 2022 New technology is having a dramatic effect on the office world; accordingly the secretarial role is changing. In the light of this development, First Course, the comprehensive elementary typing programme, has been completely revised and updated. First Course, Sixth Edition, provides a flexible keyboarding text that is planned and designed for the success of the individual in an open-learning situation, or in a group setting.

Collaborative Design Jan 30 2020 Design occurs in a rich social context where the effectiveness and efficiency of social interaction and collective performance are key to successful outcomes. Increasingly, design is being explored and developed as a collective, collaborative, participatory, and even community process. The heightened recognition of designing as a social process has stimulated interest in collaborative design. This book contains the proceedings of the international conference "CoDesigning 2000" held in Coventry, England, September 2000. During this meeting exponents from a wide range of design domains came together to present and discuss perspectives on and new knowledge and understanding of collaborative design, and the evidence for enhanced design performance through collaboration. Within this volume different motivations for, conceptions of, and findings about collaborative design are addressed in 50 contributions by different research groups. Structured into 6 sections according to the main fields of interest, it provides a survey of the state of scientifically based knowledge and trends emerging from collaborative design research and their implications for a wide range of domains.

Complex Networks & Their Applications VI Feb 10 2021 This book highlights cutting-edge research in the field of network science, offering scientists, researchers, students and practitioners a unique update on the latest advances in theory and a multitude of applications. It presents the peer-reviewed proceedings of the VI International Conference on Complex Networks and their Applications (COMPLEX NETWORKS 2017), which took place in Lyon on November 29 - December 1, 2017. The carefully selected papers cover a wide range of theoretical topics such as network models and measures; community structure, network dynamics; diffusion, epidemics and spreading processes; resilience and control as well as all the main network applications, including social and political networks; networks in finance and economics; biological and ecological networks and technological networks.

Bulletin of Electrical Engineering and Informatics Oct 01 2022 Bulletin of Electrical Engineering and Informatics (Buletin Teknik Elektro dan Informatika) ISSN: 2089-3191, e-ISSN: 2302-9285 is open to submission from scholars and experts in the wide areas of electrical, electronics, instrumentation, control, telecommunication and computer engineering from the global world. The journal publishes original papers in the field of electrical, electronics, instrumentation & control, telecommunication, computer and informatics engineering. Protocols for High-Speed Networks VI Dec 11 2020 1 This year marks the 10 h anniversary of the IFIP International Workshop on Protocols for

High-Speed Networks (PfHNS). It began in May 1989, on a hillside overlooking Lake Zurich in Switzerland, and arrives now in Salem Massachusetts 6,000 kilometers away and 10 years later, in its sixth incarnation, but still with a waterfront view (the Atlantic Ocean). In between, it has visited some picturesque views of other lakes and bays of the world: Palo Alto (1990 – San Francisco Bay), Stockholm (1993 – Baltic Sea), Vancouver (1994– the Strait of Georgia and the Pacific Ocean), and Sophia Antipolis I Nice (1996– the Mediterranean Sea). PfHNS is a workshop providing an international forum for the exchange of information on high-speed networks. It is a relatively small workshop, limited to 80 participants or less, to encourage lively discussion and the active participation of all attendees. A significant component of the workshop is interactive in nature, with a long history of significant time reserved for discussions. This was enhanced in 1996 by Christophe Diot and W allid Dabbous with the institution of Working Sessions chaired by an "animator," who is a distinguished researcher focusing on topical issues of the day. These sessions are an audience participation event, and are one of the things that makes PfHNS a true "working conference."

Advances in Production Management Systems. Artificial Intelligence for Sustainable and Resilient Production Systems Jun 16 2021 The five-volume set IFIP AICT 630, 631, 632, 633, and 634 constitutes the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2021, held in Nantes, France, in September 2021.* The 378 papers presented were carefully reviewed and selected from 529 submissions. They discuss artificial intelligence techniques, decision aid and new and renewed paradigms for sustainable and resilient production systems at four-wall factory and value chain levels. The papers are organized in the following topical sections: Part I: artificial intelligence based optimization techniques for demand-driven manufacturing; hybrid approaches for production planning and scheduling; intelligent systems for manufacturing planning and control in the industry 4.0; learning and robust decision support systems for agile manufacturing environments; low-code and model-driven engineering for production system; meta-heuristics and optimization techniques for energy-oriented manufacturing systems; metaheuristics for production systems; modern analytics and new AI-based smart techniques for replenishment and production planning under uncertainty; system identification for manufacturing control applications; and the future of lean thinking and practice Part II: digital transformation of SME manufacturers: the crucial role of standard; digital transformations towards supply chain resiliency; engineering of smart-product-service-systems of the future; lean and Six Sigma in services healthcare; new trends and challenges in reconfigurable, flexible or agile production system; production management in food supply chains; and sustainability in production planning and lot-sizing Part III: autonomous robots in delivery logistics; digital transformation approaches in production management; finance-driven supply chain; gastronomic service system design; modern scheduling and applications in industry 4.0; recent advances in sustainable manufacturing; regular session: green production and circularity concepts; regular session: improvement models and methods for green and innovative systems; regular session: supply chain and routing management; regular session: robotics and human aspects; regular session: classification and data management methods; smart supply chain and production in society 5.0 era; and supply chain risk management under coronavirus Part IV: AI for resilience in global supply chain networks in the context of pandemic disruptions; blockchain in the operations and supply chain management; data-based services as key enablers for smart products, manufacturing and assembly; data-driven methods for supply chain optimization; digital twins based on systems engineering and semantic modeling; digital twins in companies first developments and future challenges; human-centered artificial intelligence in smart manufacturing for the operator 4.0; operations management in engineer-to-order manufacturing; product and asset life cycle management for smart and sustainable manufacturing systems; robotics technologies for control, smart manufacturing and logistics; serious games analytics: improving games and learning support; smart and sustainable production and supply chains; smart methods and techniques for sustainable supply chain management; the new digital lean manufacturing paradigm; and the role of emerging technologies in disaster relief operations: lessons from COVID-19 Part V: data-driven platforms and applications in production and logistics: digital twins and AI for sustainability; regular session: new approaches for routing problem solving; regular session: improvement of design and operation of manufacturing systems; regular session: crossdock and transportation issues; regular session: maintenance improvement and lifecycle management; regular session: additive manufacturing and mass customization; regular session: frameworks and conceptual modelling for systems and services efficiency; regular session: optimization of production and transportation systems; regular session: optimization of supply chain agility and reconfigurability; regular session: advanced modelling approaches; regular session: simulation and optimization of systems performances; regular session: AI-based approaches for quality and performance improvement of production systems; and regular session: risk and performance management of supply chains *The conference was held online.

Mechanical Behaviour of Materials – VI Oct 21 2021 Significant progress in the science and technology of the mechanical behaviour of materials has been made in recent years. The greatest strides forward have occurred in the field of advanced materials with high performance, such as ceramics, composite materials, and intermetallic compounds. The Sixth International Conference on Mechanical Behaviour of Materials (ICM-6), taking place in Kyoto, Japan, 29 July – 2 August 1991 addressed these issues. In commemorating the fortieth anniversary of the Japan Society of Materials Science, organised by the Foundation for Advancement of International Science and supported by the Science Council of Japan, the information provided in these proceedings reflects the international nature of the meeting. It provides a valuable account of recent developments and problems in the field of mechanical behaviour of materials.

Paper Aug 26 2019

Selections from The Girl's Own Paper, 1880–1907 Jul 18 2021 The Girl's Own Paper, founded in 1880, both shaped and reflected tensions between traditional domestic ideologies of the period and New Woman values in the context of the figure of the New Girl. These selections from the journal demonstrate the efforts of its publisher (the Religious Tract Society) to combat the negative moral influence of sensational popular literature while at the same time addressing the desires of its audience for exciting reading material and information about topics mothers could not or would not discuss. Selected fiction gives a rich sense of the conventions and the domestic ideology of the time; the nonfiction prose ranges from essays on conduct and household management to articles on new opportunities in education and work.
