Motor Vehicle Accident Reconstruction and Cause Analysis Nov 21 2021 When the time comes for a judge or jury to render a verdict in a lawsuit, rarely is there sufficient objective scene data or eye witness testimony to help them determine what happened in the critically deciding seconds of a crash. The purpose of motor vehicle accident reconstruction is to determine what happened at a particular point in time in accidents with respect to drivers, vehicles, objects, pedestrians and others. The Seventh Edition of [Motor Vehicle Accident Reconstruction and Cause Analysis](#) provides the novice or experienced attorney, expert witness, and investigator with fundamentals necessary to properly formulate a case, collect critical data, and apply proven engineering concepts in the reconstruction and cause analysis of accidents. The revisions and additions in the Seventh Edition include numerous chapter review questions, hints for expert testimony and report writing, and guidance on when to retain an expert. There are also discussions of case formulation errors and how costly mistakes can be avoided, as well as many MARC1 software applications and analysis of actual crashes, along with a discussion of how a successful resolution of a particular case is most likely to be achieved. The new looseleaf binder design allows the Seventh Edition to become a living document, both in terms of personal use as well as future supplements. Readers using MARC1 Accident Reconstruction Software in their forensic praxis will find the Seventh Edition a helpful tool in effectively using MARC1. MARC1 software applications have been added to make the analysis of complicated calculations an easy and efficient task. The novice lawyer and the expert working his or her first traffic case or the "old pro" will benefit greatly from the experience gained by the author in nearly 350 trial testimonies, 800 depositions, and over 3,000 accident reconstructions.

Why Do Women Tailgate Feb 22 2022 "So you are suggesting, what? That men do not tailgate?" an observer asked. "No. He's not suggesting any such thing," another observer interjected. "But let's be clear, at least in my opinion, tailgating is failing to have an assured clear stopping distance from the vehicle in front of you." Another observer, a woman, stated that she almost always tailgates in late evenings because it is dark and is often the only one of only two or three vehicles on that dark, lonely roadway. For her it is about a real need to tailgate, to be close. So why do women tailgate? The simple reason for their tailgating behavior is that they are selfish. The not-so-simple reason for their tailgating behavior is that they are egoistic. The tailgater's desire flowing from her volitional behavior is egoistic if, and only if, it is something that interests her because it is important or affects her and it reasonably benefits her to the exclusion of everyone else. However, the philosopher Spinoza suggested that ethical egoism is a behavior in which everyone ought to seek their own advantage. Why do women tailgate? The philosopher Epicurus suggested that ethics is a form of egoistic hedonism, in that the only thing that is intrinsically valuable is one's own pleasure; anything else that has value is valuable merely to securing pleasure for oneself. Another observer said, "Perhaps, because something within her is sending bad or confusing signals. I am suggesting that those tailgating drivers may be getting mixed or confusing cellular signals. That is, in relation to their extracellular matrix, which is a collection of sugars, proteins, as well as other molecules, which is a place where signals affecting cell progression and mental process resurge."
