We've Been Doing It Your Way Long Enough Mar 14 2021 Filled with day-to-day literacy practices, this book will help elementary school teachers understand their role in dismantling the imbalance of privilege in literacy education. Chapters take readers into classrooms where they will see, hear, and feel decolonizing and humanizing culturally relevant pedagogies as students learn literacy and a critical stance through musical literacies, oral histories, heritage lessons, and building a critical consciousness. The authors also share strategies to help teachers examine their own educational spaces, start the school year in culturally relevant ways, build reciprocal relationships with families and communities, and teach within standards and testing mandates while challenging unjust systems. Practices are brought to life through students, families, and community members who voice the realities of pedagogical privilege and oppression and urge educators to take action for change. "Teachers of every child must acknowledge that 'we've been doing it your way long enough'—this is the brilliance of the book and the work that lies ahead for all who commit to choosing the culturally relevant classroom." —Valerie Kinloch, dean, University of Pittsburgh School of Education "Captures the heart of culturally relevant teaching. *Converting STEM into STEAM Programs* Aug 26 2019 This book examines the push and pull of factors contributing to and constraining conversion of STEM (science, technology, engineering and math) education programs into STEAM (science, technology, engineering, math and arts) education programs. The chapters in this book offer thought-provoking examples, theory, and suggestions about the advantages, methods and challenges involved in making STEM to STEAM conversions, at levels ranging from K12 through graduate university programs. A large driving force for STEM-to-STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so-called

'wicked problems' – the complex suite of emerging, multifaceted issues such as global climate change, social injustice, and pandemic diseases. Dealing with these issues requires cross-disciplinary expertise and the ability to insert technical and scientific understanding effectively into areas of public planning and policy. The different models and possibilities for STEAM, as the next phase of the STEM revolution, laid out in this book will promote research and further our understanding of STEAM as a forward-thinking approach to education. Gillian Roehrig, STEM Education, University of Minnesota, USA The ideal teacher sees opportunities for integrating ideas from multiple disciplines into every lesson. This book offers many worthwhile suggestions on how to do that deliberately and systematically George DeBoer, Project 2061 of the American Association for the Advancement of Science, USA For the last several years, calls for expanding STEM education have grown, but so too have concerns about technocratic approaches to STEM. This volume challenges the community to consider broader views on STEM by focusing on the place of arts education within this movement. The chapters offer much needed, new perspectives on the (re)integration of the arts and sciences Troy Sadler, School of Education, University of North Carolina, USA

**A Practical Guide to Construction Adjudication** May 28 2022 In the United Kingdom, adjudication is available as a right for parties to a construction contract, following the enactment of the Housing Grants Construction and Regeneration Act 1996. In general, within a comparatively short period of time, parties in dispute will have a decision from an adjudicator, which, except in limited circumstances, the courts will enforce. Adjudication has become the number one method of dispute resolution in the construction industry. The short timescale means that a party needs to know what to do, when to do it and be able to check that the other party and the adjudicator are following the right steps. A Practical Guide to Construction Adjudication gives parties the necessary information to achieve this. It provides a straightforward overview of the process and procedure of adjudication by reference to legislation and case law, augmented with practical guidance including suggestions on what to do or not to do, drafting tips and checklists. Separate chapters for Scotland and Northern Ireland identify and explain the differences in procedure and judicial interpretation between those jurisdictions and England and Wales, and further detailed explanations of the adjudication regimes in Australia, Ireland, Malaysia, New Zealand and Singapore are included. Each of the chapters on jurisdictions outside England and Wales has been written by senior experts in those jurisdictions to ensure the content is accurate and insightful. There are a range of helpful appendices including a bank of model form adjudication documents and tabulated detailed comparisons of the Scheme for Construction Contracts, the other major adjudication rules, the major adjudicator nominating bodies and the UK and international regimes. Readers will particularly appreciate the most comprehensive index of adjudication cases available, sorted into 260 subject headings providing immediate access to all the reported cases on any adjudication topic.

**Neoliberalizing Educational Reform** Nov 09 2020 "In this era, when 'commonsense' in educational discourse is so deeply framed by neoliberalism, we must better understand both the uniquely situated and the insidiously interconnected nature of so-called reforms. Thank you to Keith M. Sturges and colleagues for illuminating exactly this in their important and hard-hitting new book that reveals not merely how neoliberal reforms are designed to reinforce inequity, but also how the contradictions within provide ample opportunity to collectivize and act with hope." -- Kevin Kumashiro, author of *Bad Teacher!: How Blaming Teachers Distorts the Bigger Picture* "In this important volume, editor Keith M. Sturges has taken the most useful discussions of neoliberalism and -- with great precision, clarity and utility -- seen them applied to the education arena. Over 13 chapters, leading education thinkers lay bare sets of realities that the broader public, school administrators, and policy makers would do well to fully understand. These range from the impact of neoliberal thinking upon chartering, parent involvement, teacher training, school climate, funding and more. I'll be using the chapters in this text in a variety of ways. They'll inform conversations with local, state and federal policy makers, and inform conversations with school leaders and district leaders. I'll also be assigning the text in my graduate seminar on education policy. Finally, the chapters will inform several lectures in my undergraduate class on 'The Promise and Peril of Public Education.' What a gem of a volume!" -- Kevin Michael Foster, Executive Director, The Institute for Community, University and School Partnerships (ICUSP)
