Data Mining the Web Sep 18 2021 This book introduces the reader to methods of data mining on the web, including uncovering patterns in web content (classification, clustering, language processing), structure (graphs, hubs, metrics), and usage (modeling, sequence analysis, performance).

Computational Science and Its Applications - ICCSA 2021 Jan 23 2022 ?The ten-volume set LNCS 12949 - 12958 constitutes the proceedings of the 21st International Conference on Computational Science and Its Applications, ICCSA 2021, which was held in Cagliari, Italy, during September 13 - 16, 2021. The event was organized in a hybrid mode due to the Covid-19 pandemic. The 466 full and 18 short papers presented in these proceedings were carefully reviewed and selected from 1588 submissions. The books cover such topics as multicore architectures, mobile and wireless security, sensor networks, open source software, collaborative and social computing systems and tools, cryptography, human computer interaction, software design engineering, and others. Part III of the set includes papers on Information Systems and Technologies and the proceeding of the following workshops: International Workshop on Automatic landform classification: spatial methods and applications (ALCSMA 2021); International Workshop on Application of Numerical Analysis to Imaging Science (ANAIIS 2021); International Workshop on Advances in information Systems and Technologies for Emergency management, risk assessment and mitigationbased on the Resilience concepts (ASTER 2021); International Workshop on Advances in Web Based

Learning (AWBL 2021).

The Semantic Web - ASWC 2006 Dec 22 2021 This book constitutes the refereed proceedings of the First Asian Semantic Web Conference, ASWC 2006, held in Beijing, China, in September 2006. The 36 revised full papers and 36 revised short papers presented together with three invited contributions were carefully reviewed and selected from 208 full paper submissions. The papers are organized in topical sections.

NASA Contractor Report Oct 27 2019

Proceedings Before the European Patent Office Oct 20 2021 The second edition of this acclaimed and widely-used book has been thoroughly updated in light of, among others, the revised Rules of Procedure of the Boards of Appeal, which entered into force in January 2020. It provides the first detailed understanding of these new rules and their influence on opposition and appeal proceedings. Dealing with all stages of proceedings before the European Patent Office, this book provides fresh insight into how best to act at each stage to successfully complete a case in opposition and appeal, detailing how opposition divisions and boards of appeal approach the cases before them.

Ontology-Based Applications for Enterprise Systems and Knowledge Management Apr 13 2021 "This book provides an opportunity for readers to clearly understand the notion of ontology engineering and the practical aspects of this approach in the domains of two interest areas: Knowledge Management Systems and Enterprise Systems"--

Database and Expert Systems Applications Mar 13 2021 We welcome you to the proceedings of the 21 International Conference on Database and Expert Systems Applications held in Bilbao. With information and database systems being a central topic of computer science, it was to be expected that the integration of knowledge, information and data is today contributing to the again rapidly increasing attractiveness of this field for researchers and practitioners. Since its foundation in 1990, DEXA has been an annual international conference, located in Europe, which showcases state-of-the-art research activities in these areas. DEXA 2010 continued this tradition and provided a forum for presenting and discussing research results in the area of database and intelligent systems and advanced search topics, applications and practically relevant issues related to these areas. It offered attendees the opportunity to extensively discuss requirements, problems, and solutions in the field in the pleasant atmosphere of the city of Bilbao, which is known for its driving industriousness, its top cultural venues and its rich and inspiring heritage and lifestyle. The University of Deusto with its great educational and research traditions, and the hospitality which the university and the city are so famous for, set the stage for this year's DEXA conference. This volume contains the papers selected for presentation at the DEXA conference.

Mathematical Foundations of Big Data Analytics Sep 06 2020 In this textbook, basic mathematical models used in Big Data Analytics are presented and application-oriented references to relevant practical issues are made. Necessary mathematical tools are examined and applied to current problems of data analysis, such as brand loyalty, portfolio selection, credit investigation, quality control, product clustering, asset pricing etc. - mainly in an economic context. In addition, we discuss interdisciplinary applications to biology, linguistics, sociology,

electrical engineering, computer science and artificial intelligence. For the models, we make use of a wide range of mathematics - from basic disciplines of numerical linear algebra, statistics and optimization to more specialized game, graph and even complexity theories. By doing so, we cover all relevant techniques commonly used in Big Data Analytics. Each chapter starts with a concrete practical problem whose primary aim is to motivate the study of a particular Big Data Analytics technique. Next, mathematical results follow - including important definitions, auxiliary statements and conclusions arising. Case-studies help to deepen the acquired knowledge by applying it in an interdisciplinary context. Exercises serve to improve understanding of the underlying theory. Complete solutions for exercises can be consulted by the interested reader at the end of the textbook; for some which have to be solved numerically, we provide descriptions of algorithms in Python code as supplementary material. This textbook has been recommended and developed for university courses in Germany, Austria and Switzerland.

Code of Federal Regulations Aug 30 2022

Schnittstellenmanagement in der Integrierten Versorgung Mar 25 2022 In der Integrierten Versorgung gestaltet sich nach wie vor die Zusammenarbeit an den Schnittstellen der beteiligten Leistungserbringer im Behandlungsprozess als schwierig. Die Autoren behandeln die gesamte Behandlungskette vom Hausarzt über das Akutkrankenhaus bis zur Rehabilitation? am Beispiel des Behandlungspfads Knie-Totalendoprothese (Knie-TEP). Die Schnittstellen zwischen den Sektoren werden identifiziert und die jeweilige Problematik herausgearbeitet, sodass die optimalen Vorgehensweisen, insbesondere im Hinblick auf die Informations- und Dokumentationsabläufe, aufgezeigt werden können.

Code of Federal Regulations Sep 30 2022 Special edition of the Federal register, containing a codification of documents of general applicability and future effect as of Jan. ... with ancillaries.

Introduction to Pattern Recognition and Machine Learning Nov 20 2021 This book adopts a detailed and methodological algorithmic approach to explain the concepts of pattern recognition. While the text provides a systematic account of its major topics such as pattern representation and nearest neighbour based classifiers, current topics - neural networks, support vector machines and decision trees - attributed to the recent vast progress in this field are also dealt with. *Introduction to Pattern Recognition and Machine Learning* will equip readers, especially senior computer science undergraduates, with a deeper understanding of the subject matter. Contents: Introduction Types of Data Feature Extraction and Feature Selection Bayesian Learning Classification Classification Using Soft Computing Techniques Data Clustering Soft Clustering Application - Social and Information Networks Readership: Academics and working professionals in computer science. Key Features: The algorithmic approach taken and the practical issues dealt with will aid the reader in writing programs and implementing methods Covers recent and advanced topics by providing working exercises, examples and illustrations in each chapter Provides the reader with a deeper understanding of the subject matter Keywords: Clustering; Classification; Supervised Learning; Soft Computing

Proceedings, 1979 CAM-I International Spring Seminar, Royal Sonesta Hotel, New Orleans, Louisiana, April 10-12, 1979 Nov 28 2019

On the Move to Meaningful Internet Systems: OTM 2013 Conferences Aug 18 2021 This volume constitutes the refereed proceedings of the confederated international conferences: Cooperative Information Systems (CoopIS 2013), Distributed Objects and Applications (DOA-Trusted Cloud 2013), and Ontologies, Data Bases and Applications of SEmantics (ODBASE 2013) held as part of OTM 2013 in September 2013 in Graz, Austria. The 47 revised full papers presented together with 6 short papers and 5 keynotes were carefully reviewed and selected from a total of 137 submissions. The papers are organized in topical sections on business process management; process

modelling; service management; social networking; models and schemas; technical advances in cloud computing; towards trusted cloud computing; privacy for the cloud; querying and mining semantic information; semantic matching and mapping; semantic information management; semantics in use.

Integration of Multiple Non-Normal Checklist Procedures Into a Single Checklist Procedure for Transport Aircraft: A Preliminary Investigation Dec 30 2019

International Law Reports Mar 01 2020 A unique and essential work of reference for the international lawyer.

Proceedings of the National Conference Jul 25 2019

Entwicklung eines Konzepts zur Klassifizierung und zielgerichteten Nutzung historischer Materialstammdaten mit Methoden des Data Mining am Beispiel SAP R/3 Apr 25 2022 Inhaltsangabe: Zusammenfassung: In den letzten zehn Jahren ist die Menge der weltweit gesammelten und gespeicherten Daten immens angestiegen. Diese Daten können nur dann sinnvoll genutzt werden, wenn die Nutzenden wissen, wo und wie sie die Daten finden, was die Daten beinhalten und wie die Daten verwendet werden können. Im Verlauf der industriellen Auftragsabwicklung ist es z.B. notwendig, existierende Materialstammdaten schnellstmöglich wiederzufinden. Die Einordnung der Materialstammdaten in das Fachgebiet der Produktionsplanung und steuerung verdeutlicht die Problematik. Dieser Zustand macht eine Datenauswertung mit traditionellen Mitteln unmöglich. Daher ist der Wunsch nach Verfahren entstanden, die automatisch interessante Muster aus großen Datenbeständen filtern. Aus dieser Zielsetzung ist das Forschungsgebiet des Knowledge Discovery in Databases (KDD) Anfang der 90er Jahre entstanden. Mit Hilfe eigener Methoden werden Abhängigkeiten und Regelmäßigkeiten zwischen Datenbankeinträgen und Dokumenten gefunden. Anschließend wird das gefundene Wissen in einer für den Menschen verständlichen Form präsentiert. In diesem Zusammenhang stellt ein von der SAP AG neu entwickeltes Tool eine Lösungsmöglichkeit für das Materialstammdatenmanagement dar. Dazu wird in der vorliegenden Arbeit das Thema KDD unter ausgewählten Aspekten analysiert. Das neuartige Tool soll in den KDD Prozeß integriert werden. Anschließend werden die einzelnen Schritte des KDD Prozeß für die Materialstammdaten diskutiert. Insgesamt wird ein Verfahren zur Wiederverwendung von Materialstammdaten mit Hilfe eines neuartigen Tool unter Verwendung von Methoden des KDD entworfen. Einleitung: Data Mining und Knowledge Discovery in Datenbanken (KDD) erhalten zunehmende Beachtung in der Forschung, in der Industrie und in den Medien. In den letzten Jahren wurden die Fähigkeiten, immense Mengen an Daten zu produzieren und zu sammeln enorm verstärkt. Die Anzahl und die Größe der genutzten Datenbanken im Handel, in der öffentlichen Verwaltung, in der Wissenschaft, in der Produktion und anderen Bereichen wächst stetig. Die gleiche Entwicklung ist für den Bereich der EDV-Anwendungen zu beobachten. Mit der zunehmenden Vernetzung der Unternehmen steigt im industriellen Bereich demnach die Anzahl der internen und externen Datenquellen. Diese Informationsflut hat zur Folge, daß in den Unternehmen ein großer Teil der Arbeitszeit mit der Erstellung, Änderung, Ablage und Weiterleitung von Informationen [...]

In-flight breakup over the Atlantic Ocean, Trans World Airlines Flight 800 Boeing 747-131, N93119, near East Moriches, New York, July 17, 1996 Dec 10 2020

Semi-Supervised Learning Jul 05 2020 A comprehensive review of an area of machine learning that deals with the use of unlabeled data in classification problems: state-of-the-art algorithms, a taxonomy of the field, applications, benchmark experiments, and directions for future research. In the field of machine learning, semi-supervised learning (SSL) occupies the middle ground, between supervised learning (in which all training examples are labeled) and unsupervised learning (in which no label data are given). Interest in SSL has increased in recent years, particularly because of application domains in which unlabeled data are plentiful, such as images, text, and bioinformatics. This first comprehensive overview of SSL presents

state-of-the-art algorithms, a taxonomy of the field, selected applications, benchmark experiments, and perspectives on ongoing and future research. Semi-Supervised Learning first presents the key assumptions and ideas underlying the field: smoothness, cluster or low-density separation, manifold structure, and transduction. The core of the book is the presentation of SSL methods, organized according to algorithmic strategies. After an examination of generative models, the book describes algorithms that implement the low-density separation assumption, graph-based methods, and algorithms that perform two-step learning. The book then discusses SSL applications and offers guidelines for SSL practitioners by analyzing the results of extensive benchmark experiments. Finally, the book looks at interesting directions for SSL research. The book closes with a discussion of the relationship between semi-supervised learning and transduction.

L.S.A., List of C.F.R. Sections Affected Apr 01 2020 The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government.

The Design of Aircraft Landing Gear May 03 2020 The aircraft landing gear and its associated systems represent a compelling design challenge: simultaneously a system, a structure, and a machine, it supports the aircraft on the ground, absorbs landing and braking energy, permits maneuvering, and retracts to minimize aircraft drag. Yet, as it is not required during flight, it also represents dead weight and significant effort must be made to minimize its total mass. The Design of Aircraft Landing Gear, written by R. Kyle Schmidt, PE (B.A.Sc. - Mechanical Engineering, M.Sc. - Safety and Aircraft Accident Investigation, Chairman of the SAE A-5 Committee on Aircraft Landing Gear), is designed to guide the reader through the key principles of landing system design and to provide additional references when available. Many problems which must be confronted have already been addressed by others in the past, but the information is not known or shared, leading to the observation that there are few new problems, but many new people. The Design of Aircraft Landing Gear is intended to share much of the existing information and provide avenues for further exploration. The design of an aircraft and its associated systems, including the landing system, involves iterative loops as the impact of each modification to a system or component is evaluated against the whole. It is rare to find that the lightest possible landing gear represents the best solution for the aircraft: the lightest landing gear may require attachment structures which don't exist and which would require significant weight and compromise on the part of the airframe structure design. With those requirements and compromises in mind, The Design of Aircraft Landing Gear starts with the study of airfield compatibility, aircraft stability on the ground, the correct choice of tires, followed by discussion of brakes, wheels, and brake control systems. Various landing gear architectures are investigated together with the details of shock absorber designs. Retraction, kinematics, and mechanisms are studied as well as possible actuation approaches. Detailed information on the various hydraulic and electric services commonly found on aircraft, and system elements such as dressings, lighting, and steering are also reviewed. Detail design points, the process of analysis, and a review of the relevant requirements and regulations round out the book content. The Design of Aircraft Landing Gear is a landmark work in the industry, and a must-read for any engineer interested in updating specific skills and students preparing for an exciting career.

Annual Department of Defense Bibliography of Logistics Studies and Related Documents Jan 29 2020

Sowing in Tears Jan 11 2021 A historicist interpretation of how the Christian religion, whose theology had notoriously been used to foster coloniality and explicitly nurture apartheid philosophy, had transformed itself into an intellectual

force and an organisational bulwark of the struggle for freedom in South Africa. This is presented through documents and statements of the ecumenical movement which attest to the development of successive theological positions that were being arraigned against the apartheid regime. The reflection covers the period from the year 1960, which signaled the beginning of an identifiable Christian tradition of protest against political oppression and repression in South Africa, that is, from the Cottesloe Conference following the Sharpeville Massacre, to the 'Standing for the Truth Campaign' on the eve of FW De klerk's February 2 1990 Speech in Parliament. The gallant resistance of the people and the churches of South Africa is presented here as both a living record of the tumultuous past, and an inspiration for new local and global struggles.

Aircraft Accident Report May 15 2021

Analysis of Regulatory Guidance for Health Monitoring Aug 25 2019 This purpose of this study was to assess the connection between current FAA regulations and the incorporation of Health Management (HM) systems into commercial aircraft. To address the overall objectives ARINC (1) investigated FAA regulatory guidance, (2) investigated airline maintenance practices, (3) systematically identified regulations and practices that would be affected or could act as barriers to the introduction of HM technology, and (4) assessed regulatory and operational tradeoffs that should be considered for implementation. The assessment procedure was validated on a postulated structural HM capability for the B757 horizontal stabilizer.

Swedish Heat Pump Projects 1984-1985 Sep 26 2019

Airplane Flight Dynamics and Automatic Flight Controls Jun 03 2020 "In this part, exhaustive coverage is provided of the methods for analysis and synthesis of automatic flight control systems using classical control theory. This widely used book has been updated with the latest software methods. Throughout this text, the practical (design) applications of the theory are stressed with many examples and illustrations. Aircraft stability and control characteristics are all heavily regulated by civil as well as by military airworthiness authorities for safety reasons. The role of the these safety regulations in the application of the theory is therefore stressed throughout. *Airplane Flight Dynamics & Automatic Flight Controls, Part II*, is an essential reference for all aeronautical engineers working in the area of stability and control, regardless of experience levels. The book minimizes reader confusion through a systematic progression of fundamentals: - Elastic airplane stability and control coefficients and derivatives - Method for determining the equilibrium and manufacturing shape of an elastic airplane - Subsonic and supersonic numerical examples of aeroelasticity effects on stability & control derivatives - Bode and root-locus plots with open and closed loop airplane applications, and coverage of inverse applications - Stability augmentation systems: pitch dampers, yaw dampers and roll dampers - Synthesis concepts of automatic flight control modes: control-stick steering, auto-pilot hold, speed control, navigation and automatic landing - Digital control systems using classical control theory applications with Z-transforms - Applications of classical control theory - Human pilot transfer functions." --Descripción del editor.
