Philosophical Papers Feb 23 2022

Touch Papers Apr 15 2021 For the first time, the controversial issue of physical contact in the consulting room is explored by distinguished psychoanalysts and psychotherapists representing a diverse range of psychoanalytic viewpoints. The contributors focus on the unconscious meanings of touch, or absence of touch, or unwelcome touch, or accidental touch in the psychoanalytic clinical situation. There are plenty of clinical vignettes and the discussions are grounded in clinical experience. Out of all medical and therapeutic treatments, psychoanalysis remains one of the very few that uses no physical contact. Sigmund Freud stopped using the 'pressure technique' in the late 1890s, a technique whereby he would press lightly on his patient's head while insisting that they remembered forgotten events. He gave up this procedure in favour of encouraging free association, then listening and interpreting without touching his patient in any way. Psychoanalysis was born and the use of touch, as a technique reminiscent of hypnosis, was explicitly prohibited. The avoidance of physical contact between the analyst and patient was established as a key component of the classical rule of abstinence.

The Detroit Lancet Mar 03 2020

Moral Vision and Tradition Jan 13 2021 Offering a unique analytical approach, Cua focuses on the conceptual and dialectical aspects of Confucian ethics. Among the topics discussed are: the nature and significance of the Chinese Confucian moral vision of tao; the complementary insights of Classical Taoism, namely, of Lao Tzu and Chuang Tzu; and the logical and rhetorical aspects of Confucian ethics.

Integrating Ethics with Strategy Jun 05 2020 This volume brings

together 18 innovative articles on business strategy and ethics. Originally appearing in reputed journals, the articles are interrelated and focus on complex linkages between ethics and strategy in business. The first of its three sections discusses various frameworks developed by the author that explicitly integrate strategy with ethics. The second section comprises articles placing business ethics relative to management-science models and systems thinking. The final section applies some of the foregoing ideas to strategic and social issues, including poverty alleviation, corruption reduction, political divestment decisions, intellectual property rights, and pharmaceutical industrial strategy.

The Oxford Handbook of Philosophy of Death Jan 01 2020 Death has long been a pre-occupation of philosophers, and this is especially so today. The Oxford Handbook of Philosophy of Death collects 21 newly commissioned essays that cover current philosophical thinking of death-related topics across the entire range of the discipline. These include metaphysical topics--such as the nature of death, the possibility of an afterlife, the nature of persons, and how our thinking about time affects what we think about death--as well as axiological topics, such as whether death is bad for its victim, what makes it bad to die, what attitude it is fitting to take towards death, the possibility of posthumous harm, and the desirability of immortality. The contributors also explore the views of ancient philosophers such as Aristotle, Plato and Epicurus on topics related to the philosophy of death, and questions in normative ethics, such as what makes killing wrong when it is wrong, and whether it is wrong to kill fetuses, non-human animals, combatants in war, and convicted murderers. With chapters written by a wide range of experts in metaphysics, ethics, and conceptual analysis, and designed to give the reader a comprehensive view of recent developments in the philosophical study of death, this Handbook will appeal to a broad audience in philosophy, particularly in ethics and metaphysics.

Encyclopedia of Ethics: P-W Oct 29 2019 A revised, expanded and updated edition with contributions by 325 renowned authorities in the field of ethics. All of the original articles have been newly peer-reviewed and revised, bibliographies have been updated throughout, and the overall design of the work has been enhanced for easier access to cross-references and other reference features.

Contemporary European Perspectives on the Ethics of End of Life Care Jun 25 2019 This book examines the ethics of end of life care, focusing on the kinds of decisions that are commonly made in clinical practice. Specific attention is paid to the intensification of treatment for terminal symptoms, particularly pain relief, and the withdrawal and withholding of care, particularly life-saving or life-prolonging medical care. The book is structured into three sections. The first section contains essays examining end of life care from the perspective of moral theory and theology. The second sets out various conceptual terms and distinctions relevant to decision-making at the end of life. The third section contains chapters that focus on substantive ethical issues. This format not only provides for a comprehensive analysis of the ethical issues that arise in the context of end of life care but allows readers to effectively trace the philosophical, theological and conceptual underpinnings that inform their specific interests. This work will be of interest to scholars working in the area as well as clinicians, specialists and healthcare professionals who encounter these issues in the course of their practice.

An Ethical Symposium Being a Series of Papers Concerning, Medical Ethics and Etiquette From the Liberal Standpoint Sep 20 2021 Excerpt from *An Ethical Symposium Being a Series of Papers Concerning, Medical Ethics and Etiquette From the Liberal Standpoint* The collection of papers herewith presented in the form of a literary symposium, has its origin in a suggestion made by the publishers to a member of the "Society for the Prevention of the Re-enactment in the State of New York of the Present Code of Ethics of

the American Medical Association." It was suggested to this member, that inasmuch as the distinguished President of that Association had written a volume on "Medical Ethics and Etiquette," apparently with a view to defend the old code, and to assist in its re-enactment in this State, it would be expedient for some of the representative live members of the Profession in the State of New York, to state why they consider Dr. Flint's arguments insufficient, and why they believe the re-enactment of the old code would be injurious to the interests of the Profession, and of the community, which it is the duty of the Profession to serve. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Landmark Papers in Psychiatry Nov 22 2021 Advances in the practice of psychiatry have occurred in "fits and starts" over the last several decades. These advances are evident to anyone long affiliated with the field and are best appreciated through direct experience of living through the times. These advances can also be gleaned from historical overviews in textbooks or the recollections of one's teachers and mentors. Returning to the original papers that have ushered in these changes is rarely done for various, mostly practical, reasons. Filtering through thousands of articles in psychiatry may prove daunting, access to the manuscripts may be

limited (especially for papers not available electronically), and understanding their impact requires a broader context. Moreover, with so much active research currently occurring in various branches of psychiatry, current practitioners or trainees may find their attention focused on the present, and this is reinforced by electronic search algorithms, which return articles in reverse chronological order. Not surprisingly, citations for articles in virtually all fields decline precipitously for articles over five years old. As scholars and professionals, we are losing touch with our academic heritage. Yet navigating the future of psychiatry requires a firm understanding of its past. This resource serves as a guide for anyone seeking to understand the evolution of psychiatry as a scientific discipline. It does so by summarizing over 100 landmark papers in psychiatry and placing their scientific contributions within a historical context. An introductory section sets the stage for the major theoretical constructs within the field, with chapters devoted to ontology and nosology. Subsequent sections examine major facets of the theory and practice of psychiatry, such as pathogenesis of psychiatric illness, pharmacotherapy, psychotherapy, and somatic treatments. These sections are divided logically into chapters addressing important contributions to the understanding and treatment of specific disorders. A final section explores ethical considerations within each field. This framework echoes the complexity of psychiatry, which cannot be reduced to a single set of diagnoses or subspecialty categories. Highlighting the research trajectory of psychiatry, this resource will appeal to academics, trainees, and practitioners who desire a comprehensive, easy-to-read, up-to-date collection of psychiatry's pivotal moments. By understanding the challenges, inspirations, and insights from the past, readers will be better poised to address new and ongoing challenges within the field.

Ethical and Policy Issues in International Research: Commissioned papers and staff analysis Jul 31 2022

Styles of Writing for Research Papers in Public Administration

Aug 08 2020 There is no available information at this time.

International Journal of Ethics Jan 31 2020 Includes section "Book reviews".

Papers in Translation Studies May 29 2022 This book presents cutting-edge research in translation studies, offering stimulating discussions on translation and providing fresh perspectives on the field. *Papers in Translation Studies* features a selection of papers originally authored for this volume, addressing a variety of issues from different points of view and offering interesting contributions to the critical literature of the field. The volume provides useful resources that will be of great benefit for academics, students and practitioners. The contributions to this book promote research on translation theory and practice, and suggest ways of dealing with translation problems. The volume chapters are written by researchers from around the world, and consider various different languages and contexts. Areas of investigation include contrastive linguistics and translation, corpus-based translation studies, natural language processing, machine translation, and translator training.

Papers in Ethics and Social Philosophy: Feb 11 2021 This third volume of Lewis' papers is devoted to his work in ethics and social philosophy. Topics covered include the logic of obligation and permission; decision theory and its relation to the idea that beliefs might play the motivating role of desires; a subjectivist analysis of value; dilemmas in virtue ethics; the problem of evil; problems about self-prediction; social coordination, linguistic and otherwise; alleged duties to rescue distant strangers; toleration as a tacit treaty; nuclear warfare; and punishment. The purpose of this collection, and the two preceding volumes, is to disseminate more widely the work of an eminent and influential contemporary philosopher.

An Integrated Approach to Communication Theory and Research

Oct 10 2020 This new edition provides a comprehensive overview

of current theory and research written by the top theorists and researchers in each area. It has been updated to address the growing influence of technology, changing relationships, and several growing integrated approaches to communication and includes seven new chapters on: ? Digital Media ? Media Effects ? Privacy ? Dark Side ? Applied Communication ? Relational Communication ? Instructional Communication ? Communication and the Law The book continues to be essential reading for students and faculty who want a thorough overview of contemporary communication theory and research.

Papers on Moral Education Dec 24 2021

Ethics, Integrity and Aptitude General Studies-IV (GS-4) Solved Papers: Civil Services Mains (2013-2019) Oct 02 2022 This book contains model answers to the questions and case studies asked in General Studies-IV (GS-4) Civil Services Mains Paper from 2013 to 2019 with detailed information on the background/framework of the question/likely answer. It is important to note that as a subject in Civil Services Examination, GS-4 is the only subject where we have comparatively well defined syllabus and paper pattern. Because of this, each individual can score good marks in the paper with lesser efforts as compared to other General Studies Papers, i.e. if you dedicate 15-20 days to this subject, you will not just learn about the complete subject but you can score much more as compared to other General Studies paper, as they require much more time because of their dynamic nature. If we consider the previous year question Papers of General Studies-IV, the questions were divided into two parts as: 1. Theory-based Questions (based on the theoretical aspects of the ethics), and 2. Case Studies (based on the actual or probable life situations). The answers are divided into two portions with first one detailing about the framework of the answer or background of the question, giving details about the basic idea of the question or the form of case study. The second part is the model answer giving wider inputs on the question. We hope that wider considerations will

help the reader in understanding the question and how to structure the answer, based on the question.

Canada Lancet Nov 30 2019

Essential Papers on Literature and Psychoanalysis Jul 07 2020 In a draft attached to a letter to his friend and confidante Wilhelm Fliess (May 31, 1897), Freud develops an idea: The mechanism of fiction is the same as that of hysterical fantasies. He supports this thought with a brief analysis of the biographical sources of Goethe's *Werther*. A few months later, on October 15, 1897, Freud mails Fliess a detailed account of remembered events from his childhood that, Freud believed, underlined the universality of Oedipus Rex and Hamlet. Freud's foray into literature initiated the beginning of a new critical approach. In *Essential Papers on Literature and Psychoanalysis*, Emanuel Berman presents classic and contemporary papers written at the intersection of literature and psychoanalysis. In bringing these essays together Berman traces the development of a discipline that has often been plagued by a polarization between self-confident, single-minded psychoanalysts reading literature as a series of case studies and literary loyalists who cling to manifest content or to the declared intentions of the authors, accepting them at face value and depriving the work of its emotional complexity. Berman covers the full range of old and new perspectives, and presents selections from today's mature phase. This collection includes papers by Sigmund Freud, Steven Marcus, Patrick J. Mahoney, Donald Spence, Otto Rank, Ernest Jones, Ernst Kris, Phyllis Greenacre, Florence Bonime and Maryanne Eckardt, David Werman, Ellen Handler Spitz, Jacques Lacan, Shoshana Felman, Norman N. Holland, Roy Schafer, Meredith Anne Skura, Gail S. Reed, Francis Baudry, Rivka R. Eifermann, and Bennett Simon.

Papers for Pay Jan 25 2022 A disturbing trend faces education in the U.S.--not plagiarism but academic forgery (students purchasing and signing their names to work produced by others). This book, by a former professional forger, describes the difference between the

two and presents case studies along with an expose of the trade. The author provides a thorough treatment of the topic and reveals the serious implications for the future of academia. Educators should educate themselves about forgery and join the conversation about solving the problem.

Autonomy Jun 17 2021

Essays on Ethics, Social Behaviour, and Scientific Explanation

Sep 01 2022 When John Harsanyi came to Stanford University as a candidate for the Ph.D., I asked him why he was bothering, since it was most unlikely that he had anything to learn from us. He was already a known scholar; in addition to some papers in economics, the first two papers in this volume had already been published and had dazzled me by their originality and their combination of philosophical insight and technical competence. However, I am very glad I did not discourage him; whether he learned anything worthwhile I don't know, but we all learned much from him on the foundations of the theory of games and specifically on the outcome of bargaining. The central focus of Harsanyi's work has continued to be in the theory of games, but especially on the foundations and conceptual problems. The theory of games, properly understood, is a very broad approach to social interaction based on individually rational behavior, and it connects closely with fundamental methodological and substantive issues in social science and in ethics. An indication of the range of Harsanyi's interest in game theory can be found in the first paper of Part B -though in fact his own contributions are much broader-and in the second paper the applications to the methodology of social science. The remaining papers in that section show more specifically the richness of game theory in specific applications.

Habermas and Pragmatism Nov 10 2020 There are few living thinkers who have enjoyed the eminence and renown of Jürgen Habermas. His work has been highly influential not only in philosophy, but also in the fields of politics, sociology and law. This

is the first collection dedicated to exploring the connections between his body of work and America's most significant philosophical movement, pragmatism. *Habermas and Pragmatism* considers the influence of pragmatism on Habermas's thought and the tensions between Habermasian social theory and pragmatism. Essays by distinguished pragmatists, legal and critical theorists, and Habermas cover a range of subjects including the philosophy of language, the nature of rationality, democracy, objectivity, transcendentalism, aesthetics, and law. The collection also addresses the relationship to Habermas of Kant, Peirce, Mead, Dewey, Piaget, Apel, Brandom and Rorty.

Economic Papers Sep 28 2019

Papers and Proceedings Oct 22 2021

Ethics in Planning Apr 03 2020 Some planners limit discussions of ethics to simple, though important, questions about the propriety of their daily activities. This approach to ethics restricts discussion of professional ethics to the propriety of everyday social and professional relationships. It ignores the broader ethical content of planning practice, methods, and policies. While narrow definitions of ethical behavior can easily preoccupy public officials and professional associations, they divert attention from more profound moral issues. Martin Wachs argues that ethical issues are implicit in nearly all planning decisions. For illustrative and educational reasons, it is useful to divide ethics in planning into four distinct categories. The first category includes the moral implications of bureaucratic practices and rules of behavior regarding clients and supervisors. The second category includes ethical judgments which planners make in exercising their "administrative discretion." More complex, and represented by a third category, are the moral implications of methods and the ethical content of criteria built into planning techniques and models. The final type represents the basic choices which society makes - those inherent in the consideration of major policy alternatives. *Ethics in Planning* contains a variety of

representative papers to capture the current state of thinking. This book will be important as a text for survey classes in professional ethics given by university planning programs. It should also supplement short courses in planning ethics for practicing professionals and provide source materials for discussions of planning ethics sponsored by local chapters of the American Planning Association and similar organizations. It gathers together exemplary and critical works, thus it will also interest individual planners in a field that only continues to grow in recognition and importance.

Martin Luther King, Jr., and the Theology of Resistance May 05 2020 It has been nearly fifty years since Martin Luther King, Jr., was assassinated at the Lorraine Motel in Memphis, Tennessee. Appraisals of King's contributions began almost immediately and continue to this day. The author explores a great many of King's chief ideas and socio-ethical practices: his concept of a moral universe, his doctrine of human dignity, his belief that not all suffering is redemptive, his brand of personalism, his contribution to the development of social ethics, the inclusion of young people in the movement, sexism as a contradiction to his personalism, the problem of black-on-black violence, and others. The book reveals both the strengths and the limitations in King's theological socio-ethical project, and shows him to have relentlessly applied

personalist ideas to organized nonviolent resistance campaigns in order to change the world. Instructors considering this book for use in a course may request an examination copy [here](#).

Nursing Ethics: Feminist Perspectives Sep 08 2020 The aim of this book is to show how feminist perspectives can extend and advance the field of nursing ethics. It engages in the broader nursing ethics project of critiquing existing ethical frameworks as well as constructing and developing alternative understandings, concepts, and methodologies. All of the contributors draw attention to the operations of power inherent in moral relationships at individual, institutional, cultural, and socio-political levels. The early essays chart the development of feminist perspectives in the field of nursing ethics from the late 19th century to the present day and consider the impact of gender roles and gendered understandings on the moral lives of nurses, patients and families. They also consider the transformative potential of feminist perspectives to widen the scope of nursing and midwifery practices to include the social, economic, cultural and political dimensions of moral decision-making in health care settings. The second half of the book draws on feminist insights to critically discuss the role of nurses and midwives in leadership, healthcare organisations, and research as well as the provision of particular forms of care e.g. care in the home and abortion care.

Theories of Political Processes Aug 20 2021 This much-needed guide to papers about politics that have appeared in the journals of all social science disciplines categorizes 10,000 of the most theoretically significant articles according to subfields and research themes, allowing scholars easy access to developments outside of their own specialities.

A Manual of Ethics Designed for the Use of Students Jul 27 2019
Papers in Ethics and Social Philosophy: Volume 3 Mar 27 2022
This third volume of Lewis's papers is devoted to his work in ethics and social philosophy. Topics covered include the logic of

obligation and permission; decision theory and its relation to the idea that beliefs might play the motivating role of desires; a subjectivist analysis of value; dilemmas in virtue ethics; the problem of evil; problems about self-prediction; social coordination, linguistic and otherwise; alleged duties to rescue distant strangers; toleration as a tacit treaty; nuclear warfare; and punishment. The purpose of this collection, and the two preceding volumes, is to disseminate more widely the work of an eminent and influential contemporary philosopher.

Space Use and Ethics Apr 27 2022

Ethics Nov 03 2022 Alain Badiou, one of the most powerful voices in contemporary French philosophy, shows how our prevailing ethical principles serve ultimately to reinforce an ideology of the status quo and fail to provide a framework for an effective understanding of the concept of evil.
