Homosexuality Sep 21 2021 What does social science research tell us about homosexuality? Does this knowledge affect public policy? Despite scholarly research, homosexuality continues to be the subject of an intense, and often bitter, debate. This volume summarizes academic knowledge about homosexuality and its relevance for public policy. Topics addressed include the nature and causes of sexual orientations; the reasons homosexuality is not an illness; the ethics of various mental health approaches to homosexuality; the effects of social and legal discrimination; newer biological and psychological understandings of homosexuality; homosexuals as parents; and the implications of the AIDS epidemic.

Therapeutic Recreation Aug 09 2020 A long-standing tradition of excellence is extended in the Fourth Edition of this authoritative introduction to the field of therapeutic recreation. The authors effectively combine a broad orientation to the profession with the practical information necessary for students to become successful practitioners. Part I contains a comprehensive discussion of the field's history and theoretical underpinnings, providing students with the perspective

they need to evaluate the social, cultural, demographic, economic, and technical forces that have shaped and are continuing to impact health and human services in general, and therapeutic recreation in particular. Part II introduces students to the client populations served by therapeutic recreation specialists and describes specific approaches and activities employed by TR professionals to help clients achieve meaningful improvements in health status, functional capacities, and quality of life. The authors have retained the practical, student-oriented approach that makes this an ideal text for introductory courses. They address all content areas included in the NCTRC certification exam, are compatible with the American Psychiatric Association on psychological classifications, and incorporate the World Health Organizations international classification of functioning, disability, and health. The latest edition contains updated information on baby boomers, the obesity epidemic, and evidence-based practices; field-based photographs and illustrations; and study questions and exercises designed to engage students.

Introduction to Christian Counseling and Counseling Psychology Jul 20 2021 My name is Dr. Pearlie Braswell-Tripp, Ph.D. I do not claim to be an expert in religion, psychology, or counseling, but experience has taught me a lot about all three. 2 Timothy, 2:15 says: "study to show thyself approved unto God, a workman that needeth not be ashamed, rightly dividing the Word of truth." I was born in 1943 in Rocky Mount, North Carolina into a Christian family. My family was attending the Rock of Ages Holiness Church. My mother, Sister Mary Jones-Braswell played the guitar; my sister, Christine Braswell played the piano and the rest of the family sang. There were seven of us girls. My sisters; Frances, Christine, Doretha, Verna, Margaree and Mary Lee were older. We were known as the Braswell sisters. My father was Lee Braswell, the most handsome man in town. I will never forget the great times we had in Rocky Mount, nor will I forget the great Rock of Ages Holiness Church. Our church was two blocks away from our home. That meant we had no real reason not to go. Many of my other relatives attended Rock of Ages also. My mother's parents attended and so did her brother and his family. Those were what we now call "The good ole days." I really loved those days. We traveled around singing the gospel until we left home for New York City in 1961. We were rooted and grounded in religion.

Contractual Performance and COVID-19 Dec 25 2021 As the COVID-19 pandemic continues to take its toll, contractual parties have frequently faced significant obstacles in performing their contractual obligations due to unexpected impediments arising from the pandemic and government measures taken in response. This indispensable book – the most comprehensive comparative examination of the impact of the COVID-19 pandemic on contractual performance – discusses the legal provisions and doctrines available to address these issues. The book examines under what circumstances COVID-19-related impediments may excuse contractual performance or lead to modification or termination of the affected contractual obligations in twelve representative civil and common law jurisdictions – the United States, England and Wales, Singapore, Brazil, Germany, France, Switzerland, Austria, Hong Kong, Costa Rica, China, and Russia. For each country, the book examines the following aspects in depth: the relevant fundamental legal principles; the various legal emergency valves available to an obligor to respond to COVID-19-related events; any remedies available to the obligee; selected examples for specific government measures related to particular types of contracts (e.g., construction, employment, lease agreements); and how the legal framework applies in typical factual

scenarios. As further legal and factual developments occur, and with further jurisdictions being added, this publication will continue to be updated both online and in print. The book provides a detailed explanation under what conditions the emergency valves specific to each jurisdiction may apply. It cuts through the seeming complexity of the various legal rules and doctrines in these jurisdictions and shows that they often produce similar results in practice. The book thus opens up a wealth of insights for businesses, practitioners, and academics around the globe by providing an easily accessible analytical framework across key jurisdictions and typical factual scenarios. 'Definitely mandatory reading for practitioners and academics alike!' –Klaus Peter Berger, University of Cologne 'Everyone who has had or is likely to have a brush with a COVID-19-induced legal issue would be well advised to keep this book within arm's reach.' – Davinder Singh, Davinder Singh Chambers LLC, Singapore 'The "holy book" for all those lawyers whose clients become ensnared in the rising attempts to fix legal liability midst the rampant COVID-19.' – Charles Brower, Twenty Essex, London

Islam and Romanticism Feb 24 2022 Revealing Islam's formative influence on literary Romanticism, this book recounts a lively narrative of religious and aesthetic exchange, mapping the impact of Muslim sources on the West's most seminal authors. Spanning continents and centuries, the book surveys Islamic receptions that bridge Romantic periods and personalities, unfolding from Europe, to Britain, to America, embracing iconic figures from Goethe, to Byron, to Emerson, as well as authors less widely recognized, such as Joseph Hammer-Purgstall. Broad in historical scope, *Islam and Romanticism* is also particular in personal detail, exposing Islam's role as a creative catalyst, but also as a spiritual resource, with the Qur'an and Sufi poetry infusing the literary publications, but also the private lives, of Romantic writers. Highlighting cultural encounter, rather than political exploitation, the book differs from previous treatments by accenting Western receptions that transcend mere "Orientalism", finding the genesis of a global literary culture first emerging in the Romantics' early appeal to Islamic traditions.

Current Management in Child Neurology Aug 01 2022 One in ten children seen in primary care practice and 25% of hospitalized children appear with a neurologic complaint. The fourth edition of *Current Management in Child Neurology* provides succinct reviews in the form of superb "how-to" chapters on the most common neurological complaints and pathologic conditions seen in pediatric practice. This volume provides clinicians with a state-of-the-art "toolbox" for diagnosis and treatment of the most commonly presented neurologic disorders and dysfunctions in children, including headache, seizures and epilepsy, neurobehavioral disorders, school readiness, developmental delay, trauma, meningitis and encephalitis, injury to the preterm and term brains, and status epilepticus. Chapters new to the 4th edition include information on a range of other conditions such as microcephaly, neurodegenerative disorders, chromosomal disorders, epilepsy in adolescence, epileptic encephalopathy, pediatric neurotransmitter disorders, and tropical child neurology as well as current approaches to neonatal or infantile facial dysmorphism and congenital muscular dystrophies. The 4th edition of *Current Management in Child Neurology* has 111 chapters organized into three sections: Clinical Practice Trends, The Office Visit, and The Hospitalized Child. Each of the sections contains carefully selected readings and Web resources for practitioners and patients who seek relevant information on topics addressed in the book's chapters. Since the third edition, online resources have increased exponentially, and *Current Management in Child Neurology* directs its readers to the most high-quality information available.

Land Administration and Practice in Hong Kong, Fifth Edition Feb 01 2020 The purpose of this book is to explain both the historical context and current practices of land administration in Hong Kong. Although Hong Kong has an open and business-friendly environment, it is underpinned by a socialist leasehold land tenure system. The government is landlord to virtually all land and so it plays a pivotal role in the administration of this scarce, and therefore, valuable resource. As land administration is governed by private contract law rather than legislation, it is constantly evolving with the courts handing down significant decisions on a regular basis. Government practice has to respond to this, as well as the community's concern on how best land can be administered. The fifth edition has some substantial and important updates which should continue to be useful to both students and practitioners of surveying, architecture, planning and law, as well as the wider business and financial community.

Across Intellectual Property Jun 06 2020 Using as a starting point the work of internationally-renowned Australian scholar Sam Ricketson, whose contributions to intellectual property (IP) law and practice have been extensive and richly diverse, this volume examines topical and fundamental issues from across IP law. With authors from the US, UK, Europe, Asia, Australia and New Zealand, the book is structured in four parts, which move across IP regimes, jurisdictions, disciplines and professions, addressing issues that include what exactly is protected by IP regimes; regime differences, overlaps and transplants; copyright authorship and artificial intelligence; internationalization of IP through public and private international law; IP intersections with historical and empirical research, human rights, privacy, personality and cultural identity; IP scholars and universities, and the influence of treatises and textbooks. This work should be read by anyone interested in understanding the central issues in the evolving field of IP law.

Suburban Space, the Novel and Australian Modernity Nov 23 2021 'Suburban Space, the Novel and Australian Modernity' investigates the interaction between suburbs and suburbia in a century-long series of Australian novels. It puts the often trenchantly anti-suburban rhetoric of fiction in dialogue with its evocative and imaginative rendering of suburban place and time. 'Suburban Space, the Novel and Australian Modernity' rethinks existing cultural debates about suburbia – in Australia and elsewhere – by putting novelistic representations of 'suburbs' (suburban interiors, homes, streets, forms and lives over time) in dialogue with the often negative idea of 'suburbia' in fiction as an amnesic and conformist cultural wasteland. 'Suburban space, the novel and Australian modernity' shows, in other words, how Australian novels dramatize the collision between the sensory terrain of the remembered suburb and the cultural critique of suburbia. It is through such contradictions that novels create resonant mental maps of place and time. Australian novels are a prism through which suburbs – as sites of everyday colonization, defined by successive waves of urban development – are able to be glimpsed sidelong.

The Great Ideas of Clinical Science Mar 28 2022 The idea that there is a fundamental rift between researchers and practitioners should not come as a surprise to anyone familiar with the current literature, trends, and general feelings in the field of clinical psychology. Central to this scientist-practitioner gap is an underlying disagreement over the nature of knowledge - namely that while some individuals point to research studies as the foundation of truth, others argue that clinical experience offers a more adequate understanding of the causes, assessment, and treatment of mental illness. The Great Ideas of Clinical Science is an ambitious attempt to dig beneath these fundamental differences, and reintroduce the reader to unifying principles often overlooked by students and professionals alike. The editors have identified 17 such universals, and have pulled together a group of the most prolific minds in the field to present the philosophical, methodological, and conceptual ideas that define the state of the field. Each chapter focuses on practical as well as conceptual points, offering valuable insight to practicing clinicians, researchers, and teachers of any level of experience. Written for student, practitioner, researcher, and educated layperson, this integrative volume aims to facilitate communication among all mental health professionals and to narrow the scientist-practitioner gap.

In the Mind's Eye Jan 14 2021 The archer stands and pulls back the bow, visualizing the path of the arrow to the target. Does this mental exercise enhance performance? Can we all use such techniques to improve performance in our daily lives? In the Mind's Eye addresses these and other intriguing questions. This volume considers basic issues of performance, exploring how techniques for quick learning affect long-term retention, whether an expert's behavior can serve as a model for beginners, if team performance is the sum of individual members' performances, and whether subliminal learning has a basis in science. The book also considers meditation and some other pain control techniques. Deceit and the ability to detect deception are explored in detail. In the area of self-assessment techniques for career development, the volume evaluates the widely used Myers-Briggs Type Indicator.
