If I Can't Have You, No One Can Sep 20 2019 Lady Killer Richard Namey, 26, drug abuser and woman-beater, had already threatened a previous girlfriend with a gun, but she'd gotten away. Sarah Rodriguez, 21, wasn't so lucky. On April 16, 2002, in Orange County, California, she and her true love, Matt Corbett, 20, were forced off the road by Namey, who shot them both at point-blank range with a .357. Sarah was killed. Corbett was paralyzed for life. Real Hero April a 42-mile chase, Namey was finally cornered in a drainage tunnel by a police dog. He pleaded manslaughter, claiming he'd really meant to kill himself in front of Sarah. No deal. The man he faced was not your average deputy district attorney. Dennis Conway had pulled himself out of a wayward life torn by seemingly insurmountable tragedy and into law school. He knew all about guys like Namey--and exactly where to find the holes in his story. The verdict: first-degree murder, life sentence. Score one for the good guys. Includes 16 pages of shocking photos.

Mapping Scientific Frontiers Jun 10 2021 This is an examination of the history and the state of the art of the quest for visualizing scientific knowledge and the dynamics of its development. Through an interdisciplinary perspective this book presents profound visions, pivotal advances, and insightful contributions made by generations of researchers and professionals, which portrays a holistic view of the underlying principles and mechanisms of the development of science. This updated and extended second edition: highlights the latest advances in mapping scientific frontiers examines the foundations of strategies, principles, and design patterns provides an integrated and holistic account of major developments across disciplinary boundaries "Anyone who tries to follow the exponential growth of the literature on citation analysis and scientometrics knows how difficult it is to keep pace. Chaomei Chen has identified the significant methods and applications in visual graphics and made them clear to the uninitiated. Derek Price would have loved this book which not only pays homage to him but also to the key players in information science and a wide variety of others in the sociology and history of science." -- Eugene Garfield "This is a wide ranging book on information visualization, with a specific focus on science mapping. Science mapping is still in its infancy and many intellectual challenges remain to be investigated and many of which are outlined in the final chapter. In this new edition Chaomei Chen has provided an essential text, useful both as a primer for new entrants and as a comprehensive overview of recent developments for the seasoned practitioner." -- Henry Small Chaomei Chen is a Professor in the College of Information Science and Technology at Drexel University, Philadelphia, USA, and a Changjiang Scholar at Dalian University of Technology, Dalian, China. He is the Editor-in-Chief of Information Visualization and the author of Turning Points: The Nature of Creativity (Springer, 2012) and Information Visualization: Beyond the Horizon (Springer, 2004, 2006).

The Pathfinder Companion Jun 22 2022 Veterans of the RAF's legendary Pathfinder Force share their personal accounts of WWII in this authoritative history by the author of Master Bombers. During the Second World War, the Pathfinder Force was the corps d'élite of Bomber Command. Literally leading the charge in the Royal Air Force's bombing raids over Nazi occupied territory, the aircrews of the PFF required top notch skills and nerves of steel. In Pathfinder Companion, aviation historian Sean Feast tells the remarkable stories of these brave men, drawing on extensive interviews with veterans as well as official records and archival documents. Pathfinder Companion highlights the raids and the losses, the successes and failures, the terror and the turmoil these men endured, as well as the inevitable humor in the face of tremendous adversity. Profusely illustrated throughout with photos and memorabilia, the book shows how a poorly equipped, disparate group was forged into one of the most effective fighting forces ever created.

PathFinder May 09 2021 Tod has grown up a PathFinder, one of an ancient seafaring tribe. Her mother, who died when Tod was young, had a very different history. She was from a mysterious magykal desert-dwelling family. When Tod's father disappears she is not only alone, but soon finds herself swept into the path of an evil sorcerer. Now Tod must choose which of her pasts will help her to survive: PathFinder or Magician. Magyk will allow her to fight like with like, but her PathFinder heritage gives Tod something special - the edge. Angie Sage's new book combines breathtaking action with fabulous plotting. The characters are instantly engaging, the tension is relentless and Angie's superlative storytelling weaves the threads seamlessly together for an utterly satisfying read.

More Than Courage Jun 17 2019 Drawing on many oral and unpublished written accounts from veterans of the 504th Parachute Infantry Regiment, Phil Nordyke brings the history of the regiment to life, conveying with remarkable immediacy and power what it was like to be there. This is history as it was lived by the men of the 504th, from their pre-war coming of age in the regiment, through the end of World War II, when they marched in the Victory Parade down Fifth Avenue in New York. The 504th earned three bronze stars for their parachute wings, one for each of their combat jumps.

TodHunter Moon - FährtenFinder Feb 18 2022 Die junge Todi steht vor einem aufregenden Ereignis: Mit 12 Jahren wird sie endlich von ihrem Vater in die Rituale der FährtenFinder eingeweiht. Kurz darauf ist Todis Vater spurlos verschwunden. Gemeinsam mit ihrem Freund Oskar begibt sich Todi zum Zaubererturm, weil sie sich Hilfe vom Außergewöhnlichen Zauberer erhofft. Dieser ist niemand anderes als Septimus Heap. Und er hat es gerade mit einem mächtigen Feind zu tun: dem Hexer Oraton-Marr, der den Palast der Schneepinzessin in seine Gewalt gebracht hat. Im Palast aber ist der magische Lapislazuli versteckt, und der darf auf keinen Fall in die falschen Hände geraten ... Das erste Abenteuer der neuen Fantasy-Reihe von Angie Sage.

Maverick One Sep 25 2022 The explosive sequel to the bestselling PATHFINDER. For the first time ever an elite British operator tells the gruelling story of his selection into the Pathfinders - Britain's secret soldiers. Pathfinder selection is a brutal physical and psychological trial lasting many weeks. It rivals that of the SAS and takes place over the same spine-crushing terrain, in the rain-and-snow-lashed wastes of the Welsh Mountains. For two decades no one has been able to relate the extraordinary trials of British elite forces selection - until now. Captain David Blakeley goes on from completing selection to serve with the Pathfinders in Afghanistan post 9/11, where he had a gun held to his head by Al Qaeda fighters. From there he deploys to Iraq, on a series of dramatic behind-enemy-lines missions - wherein he and his tiny elite patrol are outnumbered, outgunned and trapped. Maverick One is unique and extraordinary, chronicling the making of a warrior. It culminates in Blakeley fighting back to full recovery from horrific injuries suffered whilst on operations in Iraq, to go on to face SAS selection.

One Hundred Years Of General Relativity: From Genesis And Empirical Foundations To Gravitational Waves, Cosmology And Quantum Gravity - Volume 1 Nov 15 2021 The aim of this two-volume title is to give a comprehensive review of one hundred years of development of general relativity and its scientific influences. This unique title provides a broad introduction and review to the fascinating and profound subject of general relativity, its historical development, its important theoretical consequences, gravitational wave detection and applications to astrophysics and cosmology. The series focuses on five aspects of the theory: The first three topics are covered in Volume 1 and the remaining two are covered in Volume 2. While this is a two-volume title, it is designed so that each volume can be a standalone reference volume for the related topic.

Geometric Representations of Perceptual Phenomena Jul 31 2020 Based on a conference held in honor of Professor Tarow Indow, this volume is organized into three major topics concerning the use of geometry in perception: * space -- referring to attempts to represent the subjective space within which we locate ourselves and perceive objects to reside; * color -- dealing with attempts to represent the structure of color percepts as revealed by various experimental procedures; and * scaling -- focusing on the organization of various bodies of data -- in this case perceptual -- through scaling techniques, primarily multidimensional ones. These topics provide a natural organization of the work in the field, as well as one that corresponds to the major aspects of Indow's contributions. This book's goal is to provide the reader with an overview of the issues in each of the areas, and to present current results from the laboratories of leading researchers in these areas.

Ecomasters. A Planet in Peril May 29 2020 On this blistering day in the midst of a record-breaking heat wave in NY, deeply held secrets of the past are disclosed to Coral, breaking open the shell of her cloistered upper class Manhattan reality, to reveal the mysterious truth of her mother Sophia's disappearance so many years ago, dissolving into time as if it were only yesterday. A gift, neatly wrapped, at her doorstep becomes the first clue in an unfolding breathtaking global adventure transporting Coral to find her new teammates in some of the more remote corners of the world to fulfill her destiny. As "pathfinder", Coral's quest to find the others, will lead her to experience colorful cultural settings, perils and opportunities for inspiration all over the world. Coral is full of brilliance and courage and she instinctively understands that the Ecomasters hold the key to the future of humankind on our planet, but, she does not always know how to engage with her peers and has very limited travel experience, resulting in a number of lighthearted blunders and cultural snafus along the way. The challenges faced by Coral, Hope, Angoori and Phonepast are similar to the challenges of every reader. Girls, and boys all over the world today have a deep inner understanding for why they are here, but can use 'real-life' role models who make mistakes and get messy while getting the job done is key!

Heroic Endeavour Sep 13 2021 This WWII combat history offers a detailed chronicle and analysis of an RAF Pathfinder Squadron's ill-fated operation over Cologne. On December 23rd, 1944, an elite squadron of the Royal Air Force Bomber Command engaged in a courageous yet tragic daylight raid on the Gremberg railway yards in Cologne, Germany. One of the war's most significant raids, it is scarcely mentioned in history books. Yet it was an operation in which its leader won the Victoria Cross, and a future VC fought a similarly heroic battle. It was also a harrowing ordeal in which ordinary men lost their lives doing extraordinary things. In *Heroic Endeavour*, aviation historian Sean Feast tells the story of this fateful raid from two different perspectives. In the first part, he presents a gripping narrative recreation of the events as they unfolded. In the second, he shares retrospective interviews with survivors from both sides, as well as an analysis of what went wrong and why.

Distributed Computing and Networking Jan 17 2022 This book constitutes the refereed proceedings of the 12th International Conference on Distributed Computing and Networking, ICDCN 2011, held in Bangalore, India, during January 2-5, 2011. The 31 revised full papers and 3 revised short papers presented together with 3 invited lectures were carefully reviewed and selected from 140 submissions. The papers address all current issues in the field of distributed computing and networking. Being a leading forum for researchers and practitioners to exchange ideas and share best practices, ICDCN also serves as a forum for PhD students to share their research ideas and get quality feedback from the well-renowned experts in the field.

TodHunter Moon, Book One: PathFinder Oct 26 2022 Introducing Alice TodHunter Moon, a Magykal addition to the world of Septimus Heap! Perfect for both established fans of the Septimus Heap series and readers coming to the world of Septimus Heap for the first time, PathFinder is the first book in the Septimus Heap spin-off series, TodHunter Moon. Taking place seven years after the events of the original Septimus Heap series, PathFinder tells the story of Alice TodHunter Moon, a young PathFinder who leaves her seaside village in search of her friend Ferdie. Rumor has it that Ferdie has been taken by mysterious creatures called Garmin under orders from the malevolent Lady. Full of Angie Sage's characteristic humor and wit, PathFinder introduces a new cast of young characters—and a new kind of Magyk. All the beloved characters from Septimus Heap are here, too—Tod receives help from ExtraOrdinary Wizard Septimus Heap, ex-ExtraOrdinary Wizard Marcia Overstrand, and Alchemist Simon Heap. A great addition to any fantasy reader's library!

Prinz der Wölfe Mar 19 2022 Für den halb-elfischen Kundschafter Varian Jeggare und seinen teufelsblütigen Leibwächter Radovan sind die Dinge häufig nicht so einfach, wie sie scheinen. Aber nicht einmal dieses berüchtigte Ermittler-Duo ist für das gewappnet, was sie auf der Suche nach einer vermissten Kundschafterin in den scharigen, nebelverhüllten Bergen von Ustalav finden. Intrigen der Adligen, heimisvolle Einheimische und tödliche Kreaturen der Nacht bedrohen Varian und Radovan von allen Seiten. Nur ein Rudel finsterner Wervölfe und eine mysteriöse stumme Priesterin kommen ihnen zu Hilfe. Um die Quelle seltener Gerüche zu finden und ein Geheimnis unvorstellbaren Ausmaßes zu lüften, müssen Schwert und Magie gleichermaßen zum Einsatz kommen. Doch um ihren Auftrag zu erfüllen wird es mehr benötigen, als lediglich das Rätsel zu lösen. Schattenhafte Gestalten sind auf die Ermittlungen des Duos aufmerksam geworden, und die Kräfte der Finsternis haben es sich zum Ziel gesetzt, dass keiner der beiden Ustalav je wieder lebend verlassen soll ... Ein phantastischer Roman aus der Feder des beliebten Autoren Dave Gross in der preisgekrönten Welt des Pathfinder-Rollenspiels.

Reusable Booster System Dec 04 2020 On June 15, 2011, the Air Force Space Command established a new vision, mission, and set of goals to ensure continued U.S. dominance in space and cyberspace mission areas. Subsequently, and in coordination with the Air Force Research Laboratory, the Space and Missile Systems Center, and the 14th and 24th Air Forces, the Air Force Space Command identified four long-term science and technology (S&T) challenges critical to meeting these goals. One of these challenges is to provide full-space launch capability at dramatically lower cost, and a reusable booster system (RBS) has been proposed as an approach to meet this challenge. The Air Force Space Command asked the Aeronautics and Space Engineering Board of the National Research Council to conduct an independent review and assessment of the RBS concept prior to considering a continuation of RBS-related activities within the Air Force Research Laboratory portfolio and before initiating a more extensive RBS development program. The committee for the Reusable Booster System: Review and Assessment was formed in response to that request and charged with reviewing and assessing the criteria and assumptions used in the current RBS plans, the cost model methodologies used to frame [frame?] the RBS business case, and the technical

maturity and development plans of key elements critical to RBS implementation. The committee consisted of experts not connected with current RBS activities who have significant expertise in launch vehicle design and operation, research and technology development and implementation, space system operations, and cost analysis. The committee solicited and received input on the Air Force launch requirements, the baseline RBS concept, cost models and assessment, and technology readiness. The committee also received input from industry associated with RBS concept, industry independent of the RBS concept, and propulsion system providers which is summarized in Reusable Booster System: Review and Assessment.

Rules and Rule Markup Languages for the Semantic Web Apr 27 2020 RuleML 2003 was the second international workshop on rules and rule markup languages for the Semantic Web, held in conjunction with the International Semantic Web Conference (ISWC). The aim of the RuleML workshop series is to stimulate research on all issues related to web rule languages and to provide an annual forum for presenting and discussing new research results. The Semantic Web is a major world-wide endeavor to advance the Web by enriching its multimedia document content with propositional information that can be processed by inference-enabled Web applications. Rules and rule markup languages, such as RuleML, will play an important role in the success of the Semantic Web. Rules will act as a means to draw inferences, to express constraints, to specify policies for reacting to events, to transform data, etc. Rule markup languages will allow us to enrich Web ontologies by adding definitions of derived concepts, to publish rules on the Web, to exchange rules between different systems and tools, etc. RuleML 2003 built on the success of RuleML 2002, which was held in conjunction with ISWC 2002, Sardinia, Italy. The proceedings of RuleML 2002 can be found at <http://www.ceur-ws.org/Vol-60/>. Special highlights of the RuleML 2003 workshop were the two invited presentations given by Peter Chenon "Rules, XML, and the ER Model" and by Harold Boley on "Object-Oriented RuleML: User-Level Roles, URI-Grounded Clauses, and Order-Sorted Terms". This proceedings volume also contains an invited paper by Francois Bry and Sebastian Schaertel on "An Entailment Relation for Reasoning on the Web".

Project Management for Engineering, Business and Technology Dec 24 2019 Project Management for Engineering, Business and Technology is a highly regarded textbook that addresses project management across all industries. First covering the essential background, from origins and philosophy to methodology, the bulk of the book is dedicated to concepts and techniques for practical application. Coverage includes project initiation and proposals, scope and task definition, scheduling, budgeting, risk analysis, control, project selection and portfolio management, program management, project organization, and all-important "people" aspects—project leadership, team building, conflict resolution, and stress management. The systems development cycle is used as a framework to discuss project management in a variety of situations, making this the go-to book for managing virtually any kind of project, program, or task force. The authors focus on the ultimate purpose of project management—to unify and integrate the interests, resources and work efforts of many stakeholders, as well as the planning, scheduling, and budgeting needed to accomplish overall project goals. This sixth edition features: updates throughout to cover the latest developments in project management methodologies; a new chapter on project procurement management and contracts; an expansion of case study coverage throughout, including those on the topic of sustainability and climate change, as well as cases and examples from across the globe, including India, Africa, Asia, and Australia; and extensive instructor support materials, including an instructor's manual, PowerPoint slides, answers to chapter review questions and a test bank of questions. Taking a technical yet accessible approach, this book is an ideal resource and reference for all advanced undergraduate and graduate students in project management courses, as well as for practicing project managers across all industry sectors.

Language and Automata Theory and Applications Apr 08 2021 This book constitutes the refereed proceedings of the 7th International Conference on Language and Automata Theory and Applications, LATA 2013, held in Bilbao, Spain in April 2013. The 45 revised full papers presented together with 5 invited talks were carefully reviewed and selected from 97 initial submissions. The volume features contributions from both classical theory fields and application areas (bioinformatics, systems biology, language technology, artificial intelligence, etc.). Among the topics covered are algebraic language theory; algorithms for semi-structured data mining; algorithms on automata and words; automata and logic; automata for system analysis and program verification; automata, concurrency and Petri nets; automatic structures; cellular automata; combinatorics on words; computability; computational complexity; computational linguistics; data and image compression; decidability questions on words and languages; descriptiveness; DNA and other models of bio-inspired computing; document engineering; foundations of finite state technology; foundations of XML; fuzzy and rough languages; grammars (Chomsky hierarchy, contextual, multidimensional, unification, categorial, etc.); grammars and automata architectures; grammatical inference and algorithmic learning; graphs and graph transformation; language varieties and semigroups; language-based cryptography; language-theoretic foundations of artificial intelligence and artificial life; parallel and regulated rewriting; parsing; pattern recognition; patterns and codes; power series; quantum, chemical and optical computing; semantics; string and combinatorial issues in computational biology and bioinformatics; string processing algorithms; symbolic dynamics; symbolic neural networks; term rewriting; transducers; trees, tree languages and tree automata; weighted automata.

The Strategy Pathfinder May 21 2022 Real-world strategic management practice in an interactive micro-case format The Strategy Pathfinder presents an innovative, dynamic guide to strategic thinking and practice. Using real-world case examples from companies like Apple, the BBC, Hyundai, LEGO, McDonalds, Nike and SpaceX to illustrate critical concepts, this book enables readers to actively participate in real-world strategy dilemmas and create their own solutions. Strategy Pathfinder's 'live' micro-cases provoke discussion about business models, value creation, new ventures and more, while its complimentary instructional content introduces you to the best 'classic' and new tools of strategic management. Rather than passively reproducing past and current ideas, Strategy Pathfinder encourages strategic thinkers to learn by doing. The book is designed to help the reader to develop a clear understanding of key concepts while shifting your thought processes towards real strategic action and innovation by enabling you to: Use strategy theories and frameworks to engage in analytical and creative discussions about key strategic issues facing real companies today Form strategic views for yourself, and test them against the views of others Effectively make and communicate recommendations based on solid strategic analysis that stand up to scrutiny from multiple stakeholders Become an active producer of new strategic ideas rather than a passive receiver of past wisdom This third edition has been updated with new chapters and cases to reflect the latest, cutting-edge issues in strategic thinking and practice. And the updated companion website offers students, instructors and managers more resources to facilitate understanding, interaction and innovation. As an active learning experience, The Strategy Pathfinder 3rd Edition engages the reader in the work of strategy practitioners. By arming you with the empirical research you need, and the best strategic management theories and frameworks to better analyse situations you're likely to encounter or already facing in your career, The Strategy Pathfinder teaches you how to improve your strategic thinking and practice, and develop your own strategic pathways for the future.
