Experience and History Jul 08 2020 "Carr's purpose in his book is to outline a distinctively phenomenological approach to history. History is usually associated with social existence and its past, and thus his inquiry focuses on our experience of the social world and of its temporality. Experience in this context connotes not just observation but also involvement and interaction with it. Philosophers have asked both metaphysical and epistemological questions about history, and some of the best-known philosophies of history have resulted. The phenomenological approach proposed here is different but related to these traditional philosophical questions, and Carr focuses in some detail on how phenomenology may connect to them"--Provided by publisher.

The Turning Points of the New Phenomenological Era Nov 04 2022 orbit and far beyond it. Indeed, the immense, painstaking, indefatigable and ever-improving effort of Husserl to find ever-deeper and more reliable foundations for the philosophical enterprise (as well as his constant critical re-thinking and perfecting of the approach and so called "method" in order to perform this task and thus cover in this source-excavation an ever more far-reaching groundwork) stands out and maintains itself as an inequitable reservoir for philosophical reflection in which all the above-mentioned work has either its core or its source. In fact, in his undertaking to re-think the entire philosophical enterprise as such and to recreate philosophy upon what he sought to be at least a satisfactorily legitimated basis, Husserl, through his already systematised and "authorized" work, and his courses, and later on in his spontaneous reflection (which did not find its way into a definitive corpus but was nevertheless sufficiently coherent with his previously established body of thought to be considered a continuation of it), uncovers perspectives upon the universe of man and projects their new philosophical thematisation that brings together all the attempts by philosophers (e. g. , Merleau-Ponty, who drew upon this material and found there his own inspiration) who succeeded him with foundational intentions; it also gives a core of philosophical ideas and insights for the younger generation of philosophers today.

Phenomenology in a New Key: Between Analysis and History Feb 12 2021 In this collection of essays, the sophistication and vibrancy of contemporary phenomenological research is documented, including both its engagement with key figures in the history of philosophy, and with critical problems defining future directions of philosophical investigations. It honors the writings of Richard Cobb-Stevens, whose work in phenomenological philosophy, analytic philosophy and the history of philosophy has served as model for generations of philosophers working between these three fields of research. The essays collected in this volume provide a unique window on the contemporary state of the art in phenomenological philosophy by leading scholars of international reputation from North America and Europe. Historical figures such as Aristotle and Hobbes are innovatively brought into dialogue with phenomenological thinking. Phenomenological thinking is brought to bear on a wide variety of problems, from the nature of artworks and photography to questions concerning consciousness and knowledge. Among the topics discussed in these specially commissioned essays: phenomenology and Aristotle; the nature of the primal ego; Hobbes and Husserl; intentionality and reference; Neo-Aristotelian ethics; Husserl and Wittgenstein; photography; the nature of artworks.

From the Sacred to the Divine Jun 18 2021 The contemporary revival of interest in the Sacred as a category of philosophico-religious reflection here finds a radical reversal of the traditional direction, taking the Sacred as the starting point of the itinerary toward the Divine. The wide variety of essays contained in this volume attempt to ground philosophy of the Sacred and the Divine in phenomenological evidence. Though employing different methodologies, the contributors register by and large the contribution of A-T. Tymieniecka's phenomenology of life in providing a significant 20th century vision for the accomplishment of this task. Its pursuit finds here expression in philosophical, historical, literary and political explorations leading to construing phenomenology of the Sacred as a prerequisite to the investigation of the Divine. The contributors to this extraordinary collection are: C. Bédard, A. Ales Bello, Gerard Bucher, D. Chidester, D. Conchi, M. Kronegger, S. Laycock, Ph. Liverziani, J.N. Mohanty, E. Moutsopoulos, A.M. Olson, Y. Park, G. Penzo, B. Ross, C. Osowiec Ruoff, Th. Ryba, J. Smith, A-T. Tymieniecka and E. Wyschogrod.

Psychological and Transcendental Phenomenology and the Confrontation with Heidegger (1927–1931) Jun 06 2020 Thomas Sheehan and Richard E. Palmer The materials translated in the body of this volume date from 1927 through 1931. The Encyclopaedia Britannica Article and the Amsterdam Lectures were written by Edmund Husserl (with a short contribution by Martin Heidegger) between September 1927 and April 1928, and Husserl's marginal notes to Sein und Zeit and Kant und das Problem der Metaphysik were made between 1927 and 1929. The appendices to this volume contain texts from both Husserl and Heidegger, and date from 1929 through 1931. As a whole these materials not only document Husserl's thinking as he approached retirement and emeritus status (March 31, 1928) but also shed light on the philosophical chasm that was widening at that time between Husserl and his then colleague and protégé, Martin Heidegger. 1. The Encyclopaedia Britannica Article Between September and early December 1927, Husserl, under contract, composed an introduction to phenomenology that was to be published in the fourteenth edition of the Encyclopaedia Britannica (1929). Husserl's text went through four versions (which we call Drafts A, B, C, and D) and two editorial condensations by other hands (which we call Drafts E and F). Throughout this volume those five texts as a whole are referred to as "the EB Article" or simply "the Article." Husserl's own final version of the Article, Draft D, was never published of it appeared only in 1962.

The New Yearbook for Phenomenology and Phenomenological Philosophy Mar 28 2022 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler, Heidegger, Sartre, Levinas, Merleau-Ponty and Gadamer.

Ontopoietic Expansion in Human Self-Interpretation-in-Existence Feb 01 2020 The societal web of life is underpinned by one concept - that of Self and Other - which emerged earlier in this century. The concept has received a new formulation within the field of the phenomenology of life and the human creative condition, finding a foothold, a point of reference that radiates novel, seminal insights. It is nothing other than the creative fulcrum of human functioning. The self-individualisation of the human being, as revealed in the present collection, is existentially and vitally intertwined with that of the Other. Tymieniecka's seminal idea of the `trans-actional' is explored in this collection of essays, which reveals a variety of significant perspectives, weaving the cycles of the human universe of existence in an essential oscillation between the Self and the Other. In this oscillation we throw out our existential tentacles, trying to gain a living space with respect to each other, all the while engaging in a mutual creative prompting and attunement.

The Fullness of the Logos in the Key of Life Oct 11 2020 Lamentations over the disarray and disorientation in the philosophical quest may be heard from all sides today. The horizon of the All no longer beacons, for our hope of attaining it seems ever to recede. Yet, challenging the mistrust of reason that pursuit is precisely engaged in what is undertaken here. Our forty-year elaboration of the onto-poiesis/phenomenology of life as first philosophy/phenomenology in its unravelling of the metamorphic deployment of the logos of life has laid the foundations for the retrieval of the metaphysical vision. Here the classic concerns of philosophy are not negligently dismissed but are ciphered afresh in the light of innumerable perspectives and insights brought to philosophical attention in a New Enlightenment by advances in the sciences of life and of human apprehension. Strikingly enough pursuit of the greatest enigma of all, namely, that of the All enhancing Divine, is revived in the revelation that the logos informing life is the Fullness of God. In the Fullness being revealed in the infinite intricacies of the operations of the Logos of Life, we find the plenitude of God's experiencing man. In times when the prevailing critique of reason casts aspersions on the quest for God through reason, the full revelation of the logos brings to the entire human experience the infinities of God.

Logos of Phenomenology and Phenomenology of The Logos. Book Two May 18 2021 The human being is today at the center of scientific, social, ethical and philosophical debates. The Human Condition-in-the-unity-of-everything-there-is-alive, under whose aegis the present selection of essays falls, offers the urgently needed new approach to reinvestigating humanness. While recent advances in the neurosciences, genetics and bio-engineering challenge the traditional abstract conception of "human nature", indicating its transformability, thus putting in question the main tenets of traditional philosophical anthropology, in the new perspective of the Human Creative Condition the human individual is seen in its emergence and unfolding within the dynamic networks of the logos of life, and within the evolution of living types. Just the same, the creative logos of the mind lifts the human person into a sphere of freedom. Within the networks of the logos we retrieve the classical principles – human subject, ego, self, body, soul, person – reinterpret them to counter the naturalistic critique (Tymieniecka). Thus principles of a new philosophical anthropology satisfying the requirements of the present time are laid down.

Studien zur Struktur des Bewusstseins Mar 16 2021 Die ersten drei Bände der vorliegenden, vier Teilbände umfassenden Edition bieten eine umfangreiche Präsentation von Husserls deskriptiver Erforschung der intentionalen Strukturen des Bewusstseins in den drei Hauptklassen von intentionalen Akten, den Verstandes-, Gemüts- und Willensakten. Der größte Teil der wiedergegebenen Manuskripte entstand in den Jahren zwischen 1908 und 1915. Im Jahr 1925 hat Husserls Assistent Ludwig Landgrebe auf der Grundlage vieler der hier edierten Texte ein umfangreiches Typoskript mit dem Titel „Studien zur Struktur des Bewusstseins“ angefertigt. Husserls fragmentarischer Entwurf einer Einleitung zu diesem Typoskript wird im ersten Band der Edition wiedergegeben. Der erste Teilband enthält Manuskripte, die der deskriptiven Analyse verschiedener Weisen der Objektivation in unterschiedlichen Aktformen und Aktvollzügen des Vorstellens und Denkens wie dem thematischen Meinen, dem Aufmerken und Zuwenden, dem Explizieren und Urteilen sowie dem Stellungnehmen gewidmet sind. Husserls besonderes Interesse gilt dabei der Beziehung zwischen Rezeptivität und Spontaneität. Dieser Band ist der erste Teilband des vier Teilbände umfassenden Sets Husserliana 43. Er enthält keinen Index (erhältlich als Teilband 4). This volume is the first part of the four-part set Husserliana 43. It does not contain the Index (available as the fourth volume of the set).f

The New Phenomenology Jun 30 2022 The New Phenomenology: A Philosophical Introduction is the first available introduction to the group of philosophers sometimes associated with the so-called 'theological turn' in contemporary French thought. This book argues that there has not

been a 'turn' to theology in recent French phenomenology, but instead a decidedly philosophical reconsideration of phenomenology itself. Engaging the foundational works of Emmanuel Levinas and Michel Henry, as well as later works by Jacques Derrida, Jean-Luc Marion and Jean-Louis Chretien, the book explores how these thinkers offer a coherent philosophical trajectory — the 'New Phenomenology.' Contending that New Phenomenology is of relevance to a wide range of issues in contemporary philosophy, the book considers the contributions of the new phenomenologists to debates in the philosophy of religion, hermeneutics, ethics, and politics. With a final chapter looking at future directions for research on possible intersections between new phenomenology and analytic philosophy, this is an essential read for anyone seeking an overview of this important strand of contemporary European thought.

Structure and Diversity Oct 30 2019 FOUNDATIONALISM IN PHILOSOPHY In his autobiographical work, *The Education of Henry Adams*, this I brooding and disillusioned offspring of American presidents confronted, at age sixty, his own perplexity concerning the new scientific world-view that was emerging at the end of the century. He noted that the unity of things, long guaranteed morally by the teachings of Christianity and scientifically by the Newtonian world-view, was being challenged by a newer vision of things that found only incomprehensible multiplicity at the root of the world: What happened if one dropped the sounder into the abyss—let it go—frankly gave up Unity altogether? What was Unity? Why was one to be forced to affirm it? Here every body flatly refused help. . . . [Adams] got out his Descartes again; dipped into his Hume and Berkeley; wrestled anew with his Kant; pondered solemnly over his Hegel and Schopenhauer and Hartmann; strayed gaily away with his Greeks—all merely to ask what Unity meant, and what happened when one denied it. Apparently one never denied it. Every philosopher, whether sane or insane, naturally affirmed it. I Adams, then approaching with heavy pessimism a new century, felt instinctively that, were one to attack the notion of unity, the entire edifice of human knowledge would quickly collapse. For understanding requires the unification of apparently different phenomena.

On Time - New Contributions to the Husserlian Phenomenology of Time Dec 01 2019 Usually Husserl's analysis of time-constitution is thought of in terms of three phases that are roughly bound up with the central publications, the Lectures, the Bernau Manuscripts and the C-Manuscripts. Today, after the publication of the central texts incorporating the last two phases, the discussion of Husserl's analysis of time-constitution has entered a new phase. This is true for the interpretation of the latter two texts but it also affects our reading of the Lectures. Today, in the aftermath of the recent publication of the C-Manuscripts, it seems more likely that the seemingly separated first two phases are more close to each other than expected. The new and broader context allows for more thorough interpretation of the whole enterprise of time-constitution. By publishing this collection of contributions of the best international experts in this field, entailing some refreshing approaches of new coming researchers, this collection gives an overview of the most contemporary interpretations of this fundamental phenomenological theme.

Phenomenology Jun 26 2019 A concise and accessible introduction to phenomenology, which investigates the experience of experience. This volume in the MIT Press Essential Knowledge series offers a concise and accessible introduction to phenomenology, a philosophical movement that investigates the experience of experience. Founded by Edmund Husserl (1859–1938) and expounded by Max Scheler, Martin Heidegger, Maurice Merleau-Ponty, and others, phenomenology ventures forth into the field of experience so that truth might be met in the flesh. It investigates everything as experienced. It does not study mere appearance but the true appearances of things, holding that the unfolding of experience allows us to sort true appearances from mere appearance. The book unpacks a series of terms—world, flesh, speech, life, truth, love, and wonder—all of which are bound up with each other in experience. For example, world is where experience takes place; flesh names the way our experiential exploration is inscribed into the bearings of our bodily being; speech is instituted in bodily presence; truth concerns the way our claims about things are confirmed by our experience. A chapter on the phenomenological method describes it as a means of clarifying the modality of experience that is written into its very fabric; and a chapter on the phenomenological movement bridges its divisions while responding to criticisms from analytic philosophy and postmodernism.

New Phenomenological Studies in Japan Dec 25 2021 The development of phenomenological philosophy in Japan is a well-established tradition that reaches back to the early 20th-century. The past decades have witnessed significant contributions and advances in different areas of phenomenological thought in Japan that remain unknown, or only partially known, to an international philosophical public. This volume offers a selection of original phenomenological research in Japan to an international audience in the form of an English language publication. The contributions in this volume range over classical figures in the phenomenological movement (Husserl, Heidegger, Levinas, Merleau-Monty), recent trends in French phenomenology, and contemporary inter-disciplinary approaches. In addition to this diverse engagement with European thinkers, many of the contributions in this volume establish critical and complimentary discussions with 20th-century Japanese philosophers.

Logos and Life: The Three Movements of the Soul Dec 13 2020 PART I THE CRITIQUE OF REASON CONTINUED: FROM LOGOS TO ANTI-LOGOS 1. THE NEW CRITIQUE OF REASON A new critique of reason is the crucial task imposed on the philosophy of our times as we emerge more and more from so-called "modernism" into a historical phase which will have to take its own paths and find its own determination. It may be considered that the main developmental line of modern times in its philosophy as well as in its culture at large was traced by the Cartesian cogito. The unfolding of Occidental philosophy has culminated in reason or intellect's being awarded the central place. This is its specific trait. We can see a direct line of progression from the cogito to Kant's Critique. It is no wonder that this work is the landmark of modern philosophy. Kant's Critique was concerned with the foundation of the sciences. Edmund-Husserl launched a second major, renewed, critique of reason, one which addresses not only the critical situation of the sciences but extends the critique even to the situation of Occidental culture as its malaise is diagnosed by this great thinker. Edmund Husserl voiced, in fact, the conviction that Occidental humanity has reached in our age the peak of its unfolding. His identifying this peak with the formulation of phenomenological philosophy strikes at the point in which the significant and novel developments of Occidental culture and philosophy (phenomenology, that is) coincide.

Das Problem des ‚Ur-Ich‘ bei Edmund Husserl Jul 20 2021 Der späte Husserl spricht von dem "Ur-Ich" als dem Ich, das der transzendentalen Intersubjektivität in einem gewissen Sinne vorangeht. Dies besagt aber nicht, dass es ein solipsistisches Ich wäre. Der Terminus "Ur-Ich" zeigt vielmehr die Ursprünglichkeit einer asymmetrischen und irreversiblen Relation zwischen Ich und Anderem zugespitzt an. Die vorliegende Untersuchung befragt das Ich, das sich selbst in einzigartiger Weise gegeben ist.

The New Science of the Mind Sep 09 2020 An investigation into the conceptual foundations of a new way of thinking about the mind that does not locate all cognition "in the head." There is a new way of thinking about the mind that does not locate mental processes exclusively "in the head." Some think that this expanded conception of the mind will be the basis of a new science of the mind. In this book, leading philosopher Mark Rowlands investigates the conceptual foundations of this new science of the mind. The new way of thinking about the mind emphasizes the ways in which mental processes are embodied (made up partly of extraneural bodily structures and processes), embedded (designed to function in tandem with the environment), enacted (constituted in part by action), and extended (located in the environment). The new way of thinking about the mind, Rowlands writes, is actually an old way of thinking that has taken on new form. Rowlands describes a conception of mind that had its clearest expression in phenomenology—in the work of Husserl, Heidegger, Sartre, and Merleau-Ponty. He builds on these views, clarifies and renders consistent the ideas of embodied, embedded, enacted, and extended mind, and develops a unified philosophical treatment of the novel conception of the mind that underlies the new science of the mind.

The Origins of the Horizon in Husserl's Phenomenology Jan 14 2021 This volume is the first book-length analysis of the problematic concept of the 'horizon' in Edmund Husserl's phenomenology, as well as in phenomenology generally. A recent arrival on the conceptual scene, the horizon still eludes robust definition. The author shows in this authoritative exploration of the topic that Husserl, the originator of phenomenology, placed the notion of the horizon at the centre of philosophical enquiry. He also demonstrates the rightful centrality of the concept of the horizon, all too often viewed as an imprecise metaphor of tangential significance. His systematic analysis deploys both early and late work by Husserl, as well as hitherto unpublished manuscripts. Opening out the question to include that of the origins of the horizon, the book explores the horizon as philosophical theme or notion, as a figure of intentionality, and as a signification of one's consciousness of the world—our 'world-horizon'. It argues that the central philosophical significance of the problematic of the horizon makes itself apparent in realizing how this problematic enriches our philosophical understanding of subjectivity. Systematic, thorough, and revealing, this study of the significance of a core concept in phenomenology will be relevant not only to the phenomenological community, but also to anyone interested in the intersections of phenomenology and other philosophical traditions, such as hermeneutics and pragmatism.?

New Phenomenology Aug 21 2021 In this work, Hermann Schmitz introduces the main theses of New Phenomenology: subjective facts and affective involvement, the felt body and the primitive present, and pre-personal self-consciousness among others. He also offers a new solution to the problem of freedom and a critique of the current age of irony based on the critique of Western reductionism and introjectivism.

Phenomenological Ontology of Breathing Jan 02 2020 This book studies the phenomenological ontology of breathing. It investigates breathing and air as a question of phenomenological philosophy and looks at phenomenological questions concerning respiratory methodology, ontological experience of respiration, respiratory spirituality and respiratory embodiment. Drawing on the ideas of Maurice Merleau-Ponty, Gaston Bachelard, Martin Heidegger, Edmund Husserl, Luce Irigaray and David Kleinberg-Levin, the book argues for the ontological primacy of breathing and develops a new principle of philosophy that the author calls Silence of Breath, Abyss/Yawn of Air. It asserts that breathing is not a thing- or person-oriented relation, but perpetual communication with the immense elemental atmosphere of open and free air. This new

phenomenological method of breathing offers readers a chance to begin to wonder, rethink, re-experience and reimagine all questions of life in an innovative and creative way as aerial and respiratory questions of life. Part of the Routledge Critical Perspectives on Breath and Breathing series, the book breaks new ground in phenomenology and phenomenological ontology by offering a decisive and insightful treatment of breath. It will be indispensable for students and researchers of philosophy, phenomenology, and ontology. It will also be of special interest to Merleau-Ponty scholars as it investigates uncharted dimensions of Merleau-Ponty's philosophy.

Remembering, Second Edition May 06 2020 Remembering A Phenomenological Study Second Edition Edward S. Casey A pioneering investigation of the multiple ways of remembering and the difference that memory makes in our daily lives. A Choice Outstanding Academic Book "An excellent book that provides an in-depth phenomenological and philosophical study of memory." —Choice "... a stunning revelation of the pervasiveness of memory in our lives." —Contemporary Psychology "[Remembering] presents a study of remembering that is fondly attentive to its rich diversity, its intricacy of structure and detail, and its wide-ranging efficacy in our everyday, life-world experience.... genuinely pioneering, it ranges far beyond what established traditions in philosophy and psychology have generally taken the functions and especially the limits of memory to be." —The Humanistic Psychologist Edward S. Casey provides a thorough description of the varieties of human memory, including recognizing and reminding, reminiscing and commemorating, body memory and place memory. The preface to the new edition extends the scope of the original text to include issues of collective memory, forgetting, and traumatic memory, and aligns this book with Casey's newest work on place and space. The Idealism-Realism Debate Among Edmund Husserl's Early Followers and Critics Sep 29 2019 This volume aims to contextualize the development and reception of Husserl's transcendental-phenomenological idealism by placing him in dialogue with his most important interlocutors – his mentors, peers, and students. Husserl's "turn" to idealism and the ensuing reaction to Ideas I resulted in a schism between the early members of the phenomenological movement. The division between the realist and the transcendental phenomenologists is often portrayed as a sharp one, with the realists naively and dogmatically rejecting all of Husserl's written work after the Logical Investigations. However, this understanding of the trajectory of the phenomenological movement ignores the extensive and intricate contours of the idealism-realism debate. In addition to helping us better interpret Husserl's attempts to defend his idealism, reconsidering the idealism-realism debate elucidates the relationship and differences between Husserl's phenomenology and the broader landscape of early 20th century German philosophy, particularly the Munich phenomenologists and the Neo-Kantians. The contributions to this volume reconsider many of the early interpretations and critiques of Husserl, inviting readers to assess the merits of the arguments put forward by his critics while also shedding new light on their so-called "misunderstandings" of his idealism. This text should be of interest to researchers working in the history of phenomenology and Husserlian studies.

Kurze Einführung in die neue Phänomenologie Apr 16 2021 Der moderne Europäer versteht sich als einzelnes Subjekt mit einer privaten Innenwelt; was als Außenwelt zwischen solchen Innenwelten übrig bleibt, lässt er sich von der Naturwissenschaft sagen. Einzelheit ist aber nur möglich auf Grundlagen, über die er sich dank einseitiger Vergegenständlichung aus der Antike und späterer Zeit hinwegsetzt. Leib, leibliche Kommunikation, affektives Betroffensein, bedeutsame Situationen, Gefühle als Atmosphären, flächenlose Räume, subjektive Tatsachen (statt selbstverständlich einzelner Subjekte mit Seelen) gehören dazu. Diese Grundlagen werden durchsichtig gemacht und an die Welt als das Feld möglicher Vereinzelung, an die Person, an Recht, Moral und Religion angeschlossen. In sechs Kapiteln stellt Hermann Schmitz die Hauptthesen der Neuen Phänomenologie vor, im siebenten Kapitel zeigt er, wie die Entdeckung der subjektiven Tatsachen eine neue Lösung des Freiheitsproblems erlaubt, und weist einen Ausweg aus dem ironistischen Zeitalter

Phenomenology of Perception Nov 11 2020 Challenging and rewarding in equal measure, Phenomenology of Perception is Merleau-Ponty's most famous work. Impressive in both scope and imagination, it uses the example of perception to return the body to the forefront of philosophy for the first time since Plato. Drawing on case studies such as brain-damaged patients from the First World War, Merleau-Ponty brilliantly shows how the body plays a crucial role not only in perception but in speech, sexuality and our relation to others. Perhaps above all, Merleau-Ponty's insights about the embodied mind are a bold and refreshing challenge to the new era of virtual reality and artificial intelligence, as scientists and psychologists discover the centrality of the body to mind and intelligence.
