Evidence-Based Physical Examination Jul 18 2021 The first book to teach physical assessment techniques based on evidence and clinical relevance. Grounded in an empirical approach to history-taking and physical assessment techniques, this text for healthcare clinicians and students focuses on patient well-being and health promotion. It is based on an analysis of current evidence, up-to-date guidelines, and best-practice recommendations. It underscores the evidence, acceptability, and clinical relevance behind physical assessment techniques. Evidence-Based Physical Examination offers the unique perspective of teaching both a holistic and a scientific approach to assessment. Chapters are consistently structured for ease of use and include anatomy and physiology, key history questions and considerations, physical examination, laboratory considerations, imaging considerations, evidence-based practice recommendations, and differential diagnoses related to normal and abnormal findings. Case studies, clinical pearls, and key takeaways aid retention, while abundant illustrations, photographic images, and videos demonstrate history-taking and assessment techniques. Instructor resources include PowerPoint slides, a test bank with multiple-choice questions and essay questions, and an image bank. This is the physical assessment text of the future. Key Features: Delivers the evidence, acceptability, and clinical relevance behind history-taking and assessment techniques Eschews "traditional" techniques that do not demonstrate evidence-based reliability Focuses on the most current clinical guidelines and recommendations from resources such as the U.S. Preventive Services Task Force Focuses on the use of modern technology for assessment Aids retention through case studies, clinical pearls, and key takeaways Demonstrates techniques with abundant illustrations, photographic images, and videos Includes robust instructor resources: PowerPoint slides, a test bank with multiple-choice questions and essay questions, and an image bank Purchase includes digital access for use on most mobile devices or computers

Promising Care Oct 28 2019 Promising Care: How We Can Rescue Health Care by Improving It collects 16 speeches given over a period of 10 years by Donald M. Berwick, an internationally acclaimed champion of health care improvement throughout the course of his long and storied career as a physician, health care educator and policy expert, leader of the Institute for Healthcare Improvement (IHI), and administrator of the Centers for Medicare & Medicaid Services. These landmark speeches (including all of Berwick's speeches delivered at IHI's annual National Forum on Quality Improvement in Health Care from 2003 to 2012) clearly show why our medical systems don't reliably contribute to our overall health. As a remedy he offers a vision for making our systems better – safer, more effective, more efficient, and more humane. Each of Berwick's compelling speeches is preceded by a brief commentary by a prominent figure in health care, policy, or politics who has a unique connection to that particular speech.

Contributors include such notables as Tom Daschle, Paul Batalden, and Lord Nigel Crisp. Their commentaries reflect on how it felt to hear the speech in the context in which it was delivered, and assess its relevance in today's health care environment. The introduction is by Maureen Bisognano, CEO of Institute for Healthcare Improvement, and author of Pursuing the Triple Aim. Praise for previous books by Don Berwick Curing Health Care: "The book is an easy and affirming read for anyone who is familiar with and has used the TQM teachings of Dr. Joseph M. Juran and Dr. W. Edwards Deming and would be a simple and informative introduction to the concepts for anyone who has been hearing about TQM but has no idea what it is all about and wants to know more." —Permanent Fixes (blog) "Donald Berwick is the most clearly heard evangelist of applying industrial methods of continuous quality improvement in health care." —Annals of Internal Medicine Escape Fire: "With an effective blend of common sense, real-life stories, persuasive metaphors, and out-of-the-box thinking, Dr. Berwick's presentations make for fascinating reading for anyone interested in improving America's \$1.7 trillion health care system." —Piper Report "Anyone interested in change in the healthcare system would enjoy this book. In degree programs, the various speeches would be useful for discussion in a health policy readings course." —The Annals of Pharmacotherapy

Sidelights on Relativity (Illustrated Edition) Sep 07 2020 Two unabridged addresses summarizing aspects of Einstein's Special and General Theories of Relativity comprise this succinct volume. The first, *Ether and Relativity*, was delivered in 1920 and examines the properties demanded of the ether of space by the theory of relativity. *Geometry and Experience*, delivered the following year, describes the limits within which the Euclidean system can be held to be approximately true in relation to the concept of a finite universe. Written clearly and concisely, these lectures are a fascinating read for both scientist and layman. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Classic Philosophical Questions Jan 12 2021 Utilizing a Pro versus Con presentation, this introductory text is structured around fundamental philosophical questions and covers many different philosophers.
