An Introduction to Performance Analysis of Sport Jan 23 2022

Performance analysis has become an essential tool for coaches, athletes, sports organisations and academic researchers. Collecting and interpreting performance data enables coaches to improve their training programmes, athletes to make better tactical decisions, sports

organisations to manage teams more effectively, and researchers to develop a better understanding of sports performance. This book is an essential introduction to the fundamental principles of performance analysis of sport and how to develop and operate performance analysis systems. Containing worked examples from real sporting events throughout, the book introduces the basics of quantitative and qualitative performance analysis, reviews the different types of data and information that performance analysis can generate, and explains how to test for reliability. It presents a step-by-step guide to developing both manual and computerised analysis systems, and writing up and presenting findings from performance analysis programmes. Representing the most up-to-date, concise and engaging introduction to sports performance analysis, this book is an ideal course text for all introductory performance analysis courses, as well as an invaluable primer for coaches and practitioners in sport.

Quantitative Models for Value-Based Supply Chain Management

Sep 30 2022 Supply chain management (SCM) strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers. However, the question of how SCM influences the value of a firm is not fully answered. Various conceptual frameworks that explain the coherence of SCM and company value, comprehended as value-based SCM, are well accepted in scientific research, but quantitative approaches to value-based SCM are found rather seldom. The book contributes to this research gap by proposing quantitative models that allow for assessing influences of SCM on the value of a firm. Opposed to existing models that limit the observation to chosen facets of SCM or selected value drivers, this holistic approach is adequate to • reflect configurational and operational aspects of SCM, • cover all phases of the product life cycle, • financially compare value impacts of profitability-related and asset-related value

drivers, and • assess influences of dynamics and uncertainties on company value.

Longman Academic Writing Series Jun 15 2021 The Longman Academic Writing Series helps English language students master the writing skills needed to succeed in their academic careers. The five-level series spans writing topics from composing sentences to writing research papers. Each level covers the complete writing process from prewriting to revision. Level 5 teaches advanced students to write various genres of academic essays and research papers. The text's writing process approach integrates training in grammar, vocabulary, sentence structure, and research techniques along with essay and research paper organization. Features Realistic writing models from various rhetorical genres explore academic disciplines such as biology, sociology, and history. Vocabulary sections expand students' language awareness and improve the quality of their writing. Sentence structure and grammar review helps students improve writing skills. A step-by-step approach guides students seamlessly through the writing process. Preparation for Writing sections provide guidance and practice in researching, evaluating, and documenting sources. Writing Tips provide useful strategies to enhance students' writing experience. Writing Expansions, including journals, timed writing, and summarizing, build written fluency, critical thinking, and test-taking skills. Enhanced Digital Practice An improved MyEnglishLab includes additional practice activities and assessments. The Pearson Practice English App allows students to complete vocabulary, grammar, and sentence structure activities on their mobile devices.

Collecting and Analyzing Expert Group Judgment Data Mar 13 2021

This paper presents methods for collecting and analyzing judgement from groups of experts. It addresses issues associated with resolving the procedural and administrative problems involved in selecting a panel of experts, in eliciting informed judgments about the degree of technological advance on relevant projects, and in designing a survey questionnaire for measuring those judgments. Three methods of multivariate analysis are described for quantifying and analyzing group judgment data collected from a panel of experts. Those of the methods that are known in earlier literature include multidimensional scaling of individual differences, and subjective probability procedures, including the Bayesian approach. A new procedure, which was developed specifically for this application, involves the use of simultaneous equation system models in which the response (dependent) variables are categorical and unordered. (Author).

HCI International 2021 -- Posters Oct 20 2021 The three-volume set CCIS 1419, CCIS 1420, and CCIS 1421 contains the extended abstracts

of the posters presented during the 23rd International Conference on Human-Computer Interaction, HCII 2021, which was held virtually in July 2021. HCII 2021 received a total of 6326 submissions, of which 1439 papers and 238 posters were accepted for publication in the pre-conference proceedings after a careful reviewing process. The 238 poster papers presented in these three volumes are organized in topical sections as follows: Part I: HCI theory and methods; perceptual, cognitive and psychophysiological aspects of interaction; designing for children; designing for older people; design case studies; dimensions of user experience; information, language, culture and media. Part II: interaction methods and techniques; eye-tracking and facial expressions recognition; human-robot interaction; virtual, augmented and mixed reality; sand privacy issues in HCI; AI and machine learning in HCI. Part III: interacting and learning; interacting and playing; interacting and driving; digital wellbeing, eHealth and mHealth; interacting and shopping; HCI, safety and sustainability; HCI in the time of pandemic. Chapter "X-8": an Experimental Interactive Toy to Support Turn-Taking Games in Children with Autism Spectrum Disorders" is published open access under a CC BY license (Creative Commons Attribution 4.0 International License)

Principles of Sustainable Project Management Dec 22 2021 A unique approach to managing projects combining the principles of sustainable management theory with the currently established project management theory, in an applied context. Written by a team of international experts, it tackles issues such as digital transformation, smart cities, green project management, CSR and more.
