Managing Crises and De-Globalisation Sep 07 2020 As small, open economies the Nordic states have always been more dependent on foreign trade than larger powers, and have thus had a historic preference for free trade. But during the inter-war period the Nordic countries were squeezed between powerful and aggressive trading partners: above all Great Britain and Germany. Although the period between the end of the First World War and 1929 was marked by a return to a liberal world economy, the Great Depression ushered in a decade of protectionism. The bilateralisation of international trade was especially evident after Britain's Ottawa treaties in 1932 and the Nazi seizure of power in 1933. Their dependence on trade with Britain and Germany meant that the Nordic countries were exposed to the full force of British and German bilateralism. The paradox is that in spite of international trade wars and regulated exchange the Nordic countries managed better than other European states during the interwar

period, and that the Great Depression was not as deep or long lasting as in other countries. The chapters in this book discuss why and how this rather successful Nordic experience was achieved. The topics covered include commercial and monetary policies but also important industries such as forestry, agriculture and fishing. Many of the chapters are comparative and discuss economic developments in two or more Nordic countries.

This Was Sawmilling Nov 02 2022 The reissue of the classic history about the sawmill industry in the Pacific Northwest is rich in memories. Here is the vital and true story of the triumphant growth and its undying promise, shown with superb photography and told with exciting text. The utilitarian waterwheel, the great days of the steam sawmill, and the epic courage of the schooner masters are told in all their glory. Ralph Andrews augments his careful and thorough research with anecdotes of the men who transformed logs into the building materials of a nation. The reader takes a step back in time, as the history of the industry which has gone on continuously since 1825 is brought to life.

Wood Burners Jun 28 2022 Accompanied by extraordinary photographs, essays, and maps, this book examines the history and typology of woodburners also known as "wigwam burners" The visual comparisons of dozens of burners show the changes in design over the course of a century.

The Pattern of a Dependent Economy Nov 09 2020 The basis of this 1953 study is shown by its subtitle: The National Income of British Honduras. The author's preface illustrates the distinction of his survey: that as by-products he gives a shrewd critique of the former colony's statistics and some original and pertinent comments on colonial government and colonial policy in general.

The Testimonies of Slaves Jul 30 2022 Musaicum Books presents to you this meticulously collection of hundreds of life stories, recorded interviews and incredible vivid testimonies of former slaves from the American southern states, including photos of the people being interviewed and their extraordinary narratives. After the end of Civil War in 1865, more than four million slaves were set free. There were several efforts to record the remembrances of the former slaves. The Federal Writers' Project was one such project by the United States federal government to support writers during the Great Depression by asking them to interview and record the myriad stories and experiences of slavery of former slaves. The resulting collection preserved hundreds of life stories from 17 U.S. states that would otherwise have been lost in din of modernity and America's eagerness to deliberately forget the blot on its recent past. Contents: Alabama Arkansas Florida Georgia Indiana Kansas Kentucky Maryland Mississippi Missouri North Carolina Ohio Oklahoma South Carolina Tennessee Texas Virginia

Last Sunday Drive, The: Vanishing Traditions in Georgia and the Carolinas May 28 2022 The Sunday drive. Mom, dad and the kids would head out to

see the countryside. An ice cream treat usually waited at day's end. Back in the Burma-Shave days, mom-and-pop drive-ins and gas station biscuits fed folks. Cheap gas filled cars, and people made Sunday drives through a land where See Rock City barns, sawdust piles and trains and junkyards gave them plenty to see. Men in seersucker suits ran old stores with oscillating fans, and if the kids ate too much penny candy, grandma had a home remedy for them. It was a time for dinner on church grounds, yard art and old-fashioned petunias. Join author Tom Poland as he revisits disappearing traditions.

A History of Inventions, Discoveries, and Origins Mar 02 2020 In revising Beckmann's celebrated Work, we have endeavoured to improve it principally by altering such names, characters, descriptions, and opinions as have become obsolete, or are now known to be erroneous; and by such additions as seemed necessary to bring the accounts of the subjects treated of to the present state of knowledge. In some cases, these additions may appear to diverge from the declared object of the work; but in this we have only followed the example of Beckmann himself, who frequently deviates from a strict historical path, and we think advantageously, for the purpose of introducing curious, instructive, or amusing information. In most cases, where the subject under consideration is a process of manufacture, we have given a brief outline of its practice or theory, unless this had previously been done by the author. The translation, also, has been carefully compared with the German, but in only a very few cases could we detect errors which rendered the passages contradictory or unintelligible: on the whole, it is extremely well executed; and too much praise cannot be given to Johnston, for the judicious manner in which he has embodied in one article, detached essays on the same subject, which Beckmannviii published at different periods, as he acquired fresh information.

Contemporary Ergonomics 2004 May 04 2020 The broad and developing scope of ergonomics has been illustrated over the past fifteen years by the books that make up the Contemporary Ergonomics series. Presenting the proceedings of the Ergonomics Society's annual conference, the series embraces the wide range of topics covered by ergonomics. Individual papers provide insight into current practice, present new research findings, and form an invaluable reference source. The volumes provide a fast track for the publication of suitable papers from international contributors chosen on the basis of abstracts submitted to a selection panel. Topics included in Contemporary Ergonomics 2004 applied physiology, musculoskeletal disorders, posture and discomfort, and more.

Princess K'Gari's Fraser Island Aug 19 2021 A history of European contact with and settlement on Fraser Island (K'gari), including first-hand accounts of European settlement; impact of settlement on the Ngulungbara, Batjala and Dulingbara people and their culture; Eliza Fraser incident; shipwrecks; missions at White Cliffs and Bogimbah; relations with pastoralists and timber getters; management of the Island's dingoes.

Global Undergrounds Feb 10 2021 Rest your eyes long enough on the skylines of Delhi, Guangzhou, Jakarta—even Chicago or London—and you will see the same remarkable transformation, building after building going up with the breakneck speed of twenty-first-century urbanization. But there is something else just as transformative that you won't see: sprawling networks of tunnels rooting these cities into the earth. Global Undergrounds offers a richly illustrated exploration of these subterranean spaces, charting their global reach and the profound—but often unseen—effects they have on human life. The authors shine their headlamps into an astonishing diversity of manmade underground environments, including subway systems, sewers, communications pipelines, storage facilities, and even shelters. There they find not only an extraordinary range of architectural approaches to underground construction but also a host of different cultural meanings. Underground places can evoke fear or hope; they can serve as sites of

memory, places of work, or the hidden headquarters of resistance movements. They are places that can tell a city's oldest stories or foresee its most distant futures. They are places—ultimately—of both incredible depth and breadth, crucial to all of us topside who work as urban planners, geographers, architects, engineers, or any of us who take subway trains or enjoy fresh water from a faucet. Indeed, as the authors demonstrate, the constant flux within urban undergrounds—the nonstop circulation of people, substances, and energy—serves all city dwellers in myriad ways, not just with the logistics of day-to-day life but as a crucial part of a city's mythology.

Trust and Mistrust in the Economies of the China-Russia Borderlands Jul 26 2019 The first English-language book to focus on northeast Sino-Russian border economies, *Trust and Mistrust in the Economies of the China-Russia Borderlands* examines how trans-border economies function in practice. The authors offer an anthropological understanding of trust in juxtaposition to the economy and the state. They argue that the history of suspicion and the securitised character of the Sino-Russian border mean that trust is at a premium. The chapters show how diverse kinds of cross-border business manage to operate, often across great distances, despite widespread mistrust.

Advancing the Ugandan Economy Jan 24 2022 Internal conflicts, dictatorship, and economic disintegration characterized the first twenty-five years of Uganda's independence from British colonial rule, which culminated in the reign of Idi Amin and a violent civil war. The country has since achieved an astounding turnaround of stability and growth. *Advancing the Ugandan Economy* is a first-hand look at the remarkable policy changes that took place from 1986 to 2012 and their effect in contrast with the turbulent events after independence. Ezra Suruma held several key positions in the Ugandan government during the nation's transition period, including minister of finance. His insightful recounting of those times demonstrates that African countries can achieve economic stability and sustain rapid growth when they meet at least two interdependent conditions: establishing a stable and secure political framework and unleashing entrepreneurialism. Suruma also highlights the strategic areas that still require fundamental reform if Uganda is to become a modern state and shares his vision for the future of his country. Rarely in African history has so much positive political and economic transformation of a country been achieved in such a short time. Suruma's account of the commitment, determination, vision, and dexterity of the Ugandan government holds invaluable lessons in managing the still complex policy challenges facing the African continent.

The Punjabis in British Columbia Dec 11 2020 In this richly detailed study, Kamala Nayar documents the social and cultural transformation of the Punjabi community in British Columbia. From their initial settlement in the rural Skeena region to the communities that later developed in larger urban centres, *The Punjabis in British Columbia* illustrates the complex and diverse experiences of an immigrant community that merits greater attention. Exploring themes of gender, employment, rural and urban migrant life, and the relationships between the Punjabis and surrounding First Nations and other immigrant groups, Nayar creates a portrait of a community in transition. Shedding light on the ways in which economic

circumstances affect immigrant communities, Nayar presents findings from interviews conducted with over one hundred participants. She details the relocation of Punjabi populations from the Skeena region to British Columbia's lower mainland during the decline of the forestry and fishery industries, how their second migration changed their professional and personal lives, and how their history continues to shape the identities and experiences of Punjabis in Canada today. A nuanced look at the complexities of social and cultural adaptation, *The Punjabis in British Columbia* adds an essential perspective to what it means to be Canadian.

Early Logging Tools Feb 22 2022 Over 330 clear color photos display the wide array of equipment once used to log high timber that are now eminently collectible, including axes, saws, filing tools, springboards, oil bottles, undercutters, wedges, marlin spikes, drag saws, and venerable chainsaws. Historical photos display towering giants of old growth forests where loggers toiled decades ago. An informative text provides useful information on cleaning and preserving the antique logging tools, descriptions of them, values, and a bibliography. This book will be treasured by all who share a fascination for logging as it was done by the lumberjack, buckler, and high climber.
