Local Government and Urban Governance in Europe Oct 29 2019 This book discusses innovative responses and reforms developed in critical areas of urban governance in European countries. It examines the impact of European Union's policies on the urban agenda and on local governance, and the impact of the transition to democracy in Central and in Southern Europe on local self-government systems. The book is divided into three parts: i) Crisis, Reform and Innovation in Local Government; ii) EU Policies, the Urban Agenda and Local Governance; and iii) Citizen Participation in Local Government. Providing an extensive and updated overview of key challenges in the governance of cities in Europe, the book will be of interest to students and researchers in the broader field of urban studies, and for policy-makers, especially those engaged in urban governance in European countries. /div

EU Cohesion Policy Oct 10 2020 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. This book brings together academics, members of European institutions, and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation. Responding to past criticisms of the effectiveness of the policy, the policy changes introduced in 2013 have aligned European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence, performance and integrated development. EU Cohesion Policy: Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners. The chapters in the book address four important issues: the effectiveness and impact of Cohesion policy at European, national and regional levels; the contribution of Cohesion policy to the Europe 2020 strategy of smart, sustainable and inclusive growth; the importance of quality of government and administrative capacity for the effective management of the Funds; and the inter-relationships between institutions, territory and place-based policies. The volume will be an invaluable resource to students, academics and policymakers across economics, regional studies, European studies and international relations. Session Documents , United Nations Conference on Trade and Development, Trade and Development Board, Committee on Shipping Aug 08 2020

Annual Report for Fiscal Year ... Nov 03 2022

Environmental Protection, Law and Policy Jun 17 2021 This 2007 book examines environmental law from a range of perspectives, emphasising the policy world from which environmental law is drawn and nourished. Those working within the discipline of environmental law need to engage with concepts and methods employed by disciplines other than law. The authors analyse the ways in which legal activities are supported and legitimated by work in traditional scientific or technical domains, as well as by certain more obscure but also influential cultural or philosophical assumptions. A range of regulatory techniques is explored in this book, through a close examination of both pollution control and land use. The highly complex nature of current environmental problems, demanding sophisticated and responsive legal controls, is illustrated by several in-depth case studies, including legal and policy analysis of the highly contested issues of genetically modified organisms and renewable energy projects.

The Architect's Handbook of Professional Practice May 05 2020 Architects must be proficient in a variety of business practices to contribute to, manage, or launch a successful firm. They are responsible for the same kind of legal, financial, marketing, management, and administrative activities as any other professional. Within these broad categories, however, there are many details, including professional standards and documents, that are unique to the profession of architecture.

Information Modelling and Knowledge Bases XVII Jan 01 2020 " The number of abstraction levels of information, the size of databases and knowledge bases and the amount and complexity of information stored in WWW are continuously growing. The aim of this series of Information Modelling and Knowledge Bases is to bring together experts from different areas who have a common interest in understanding and solving problems of information modelling and knowledge bases, as well as applying the results of research into practice. We aim at recognizing and pursuing research on new topics in the area of information modelling and knowledge bases, but also in connected areas in philosophy and logic, cognitive science, knowledge management, linguistics, multimedia, theory and practice of semantic web, software engineering and business management. The papers in this book present a valuable advancement in the area of information modelling and knowledge bases research and practice. "

The Architect's Handbook of Professional Practice Jan 13 2021 CD-ROM contains: Samples of all AIA contract documents. Environmental Law Dec 24 2021 This edition of 'Environmental Law' includes material on environmentalism and the law, international environmental law, access to environmental justice, noise pollution and new legislation on pollution prevention and new case law.

Encyclopedic Dictionary of Landscape and Urban Planning Nov 10 2020 This unique, multilingual, encyclopedic dictionary in two volumes covers terms regularly used in landscape and urban planning, as well as environmental protection. The languages are American and British English, Spanish (with many Latin-American equivalents), French, and German. The

encyclopedia also provides various interpretations of the terms at the planning, legal or technical level, which make its meaning more precise and its usage clearer.

Legal Aspects of Architecture, Engineering & the Construction Process Aug 27 2019 The primary focus of this text is to provide a bridge for students between the academic world and the real world. This bridge is built through an understanding of what is law, how law is created, how law affects almost every activity of human conduct, and how legal institutions operate. Intended mainly for architectural and engineering students, but increasingly for those in business schools and law schools, this text features a clear, concise, and jargon-free presentation. It probes beneath the surface of legal rules and uncovers why these rules developed as they did, outlines arguments for and against these rules, and examines how they work in practice. Updated with the most recent developments in the legal aspects of architectural, engineering, and the construction processes, this text is also a valuable reference for practitioners that has been cited in over twenty-five court decisions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Smart Sustainable City Profile for Goris, Armenia Apr 03 2020 To address the major urban challenges, UNECE and the International Telecommunication Union (ITU) developed, jointly with 15 other UN bodies and other partners, the Key Performance Indicators for Smart Sustainable Cities. This is a set of 91 indicators, which are an important tool to assess the performance of cities in the areas of environment, economy, social and cultural development, and support the achievement of the SDGs at the local level. By using these indicators, UNECE develops Smart Sustainable City Profiles with concrete recommendations for action, including priorities for investments into city development. Goris was selected as the first pilot city for this project.

Legal Guide to AIA Documents Jul 31 2022 Legal Guide to AIA Documents, Fifth Edition is a current, comprehensive, and practical resource to help you master and use the construction industry contract terms set forth by the various agreements between owners, contractors and architects. This new Fifth Edition delivers complete coverage of the following key AIA Documents AIA Document A101: Standard Form of Agreement between Owner and Contractor and Stipulated AIA Document A201: General Conditions of the Contract for Construction AIA Document B101: Owner Architect Agreement for Basic Services and Large Projects AIA Document B103: Owner Architect Agreement for Basic Services and X Large Projects AIA Document B104: Standard Form of Agreement between Owner and Architect and Project of Limited Scope (Medium Projects) Designed to help you draft agreements that best protect your clients and interests in every situation, Legal Guide to AIA Documents, Fifth Edition provides: Accurate and practical clause-by-clause analysis and enabling you to gain greater understanding of every AIA document provision Invaluable alternate language and allowing you to customize agreements to meet the requirements of specific circumstances Guidance you need to negotiate language, clauses and terms in contracts between architects and owners, and owners and contractors. Legal Guide to AIA Documents, Fifth Edition also includes in-depth cross-references to every other important document throughout. The author highlights all the changes from the 1997 forms to the 2007 forms and identifies where issues are most likely to arise as a result of these recent changes.

Object-Oriented Construction Handbook Sep 20 2021 Object-oriented programming (OOP) has been the leading paradigm for developing software applications for at least 20 years. Many different methodologies, approaches, and techniques have been created for OOP, such as UML, Unified Process, design patterns, and eXtreme Programming. Yet, the actual process of building good software, particularly large, interactive, and long-lived software, is still emerging. Software engineers familiar with the current crop of methodologies are left wondering, how does all of this fit together for designing and building software in real projects? This handbook from one of the world's leading software architects and his team of software engineers presents guidelines on how to develop high-quality software in an application-oriented way. It answers questions such as: * How do we analyze an application domain utilizing the knowledge and experience of the users? * What is the proper software architecture for large, distributed interactive systems that can utilize UML and design patterns? * Where and how should we utilize the techniques and methods of the Unified Process and eXtreme Programming? This book brings together the best of research, development, and day-to-day project work. "The strength of the book is that it focuses on the transition from design to implementation in addition to its overall vision about software development."--Bent Bruun Kristensen, University of Southern Denmark, Odense

Planning Act 2008 Apr 27 2022 Parts 1 to 8 of the Planning Act 2008 create a new system of development consent for nationally significant infrastructure projects. The new system covers certain types of energy, transport, water, waste water and waste projects. The number of applications and permits required for such projects is being reduced, compared with the position under current legislation. A major role in the new system is to be played by a new independent body to be called the Infrastructure Planning Commission ('the Commission'). The Commission will be responsible for examining applications for development consent for nationally significant infrastructure projects. National policy statements will set the framework for decisions by the Commission. The Secretary of State will have a wide discretion as to how prescriptive the policy should be. The Act sets out the procedures for examination of an application. It is intended that in examining applications greater use is made of written representations with less reliance on oral representations; and restrictions are being placed on the use of cross examination by interested parties at a hearing. The Act sets a timetable for examination of applications and decisions. A deadline of six months is stipulated for carrying out the examination procedure and a further three months is allowed for a Council (consisting of between five and nine Commissioners), a Panel or the Secretary of State to take a decision. Part 9 of the Act makes various alterations to the existing town and country planning regime. Part 10 adds certain matters within the field of town and country planning to the legislative competence of the National Assembly for Wales. Part 11 empowers the Secretary of State to establish a Community Infrastructure Levy.

Knowledge-Based Intelligent Information and Engineering Systems Feb 11 2021 The three volume set LNAI 5177, LNAI 5178, and LNAI 5179, constitutes the refereed proceedings of the 12th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2008, held in Zagreb, Croatia, in September 2008. The 316 revised papers presented were carefully reviewed and selected. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense; topics covered in the second volume are artificial intelligence driven engineering design optimization; biomedical informatics: intelligent information management from nanomedicine to public health; communicative intelligence; computational intelligence for image processing and pattern recognition; computational intelligence in human cancer research; computational intelligence techniques for Web personalization; computational intelligent techniques for bioprocess modelling, monitoring and control; intelligent computing for Grid; intelligent security techniques; intelligent utilization of soft computing techniques; reasoning-based intelligent systems: relevant reasoning for discovery and prediction; spatio-temporal database concept support for organizing virtual earth; advanced knowledge-based systems; chance discovery; innovation-oriented knowledge management platform; knowledge-based creativity support systems; knowledge-based interface systems; knowledge-based multi-criteria decision support; and knowledge-based systems for e-business.

Exploring Journalism Practice and Perception in Developing Countries Jun 25 2019 Media outlets play a pivotal role in fostering the positive and beneficial development of countries in modern society. By properly informing citizens of

critical national concerns, the media can help to transform society and promote active participation. Exploring Journalism Practice and Perception in Developing Countries is a crucial reference source for the latest scholarly material on the impacts of development journalism on contemporary nations and the media's responsibility to inform citizens of government and non-government activities. Highlighting a range of pertinent topics such as media regulation, freedom of expression, and new media technology, this book is ideally designed for researchers, academics, professionals, policy makers, and students interested in the role of journalist endeavors in developing nations.

The Software Dilemma Jun 05 2020 The complexity of software is continuously growing as a result of today's interconnected business processes. Governance of architecture and technology strategy helps to ensure coherence of software and avoid excessive complexity. At the same time software development needs room for creativity and empowerment to provide solutions to business problems of increasing complexity. The book looks at this software dilemma from the perspectives of CIOs/CTOs, software architects, and auditors. Each of these groups has different interests which need to be considered, reconciled, and balanced. CIOs/CTOs are provided with the boundary conditions they have to establish assuring the achievement of strategic objectives. Architects and auditors find proven concepts for effectively assessing software projects and architectures, as well as for effectively communicating identified issues to responsible persons. The book is based on the author's long experience in software engineering, governance, and auditing.

Architect's Legal Handbook Jul 07 2020 The Architect's Legal Handbook is the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2010, the legal landscape in which architecture is practised has changed significantly: the long-standing procurement model with an architect as contract administrator has been challenged by the growing popularity of design and build contracts, contract notices in place of certificates, and novation of architect's duties. The tenth edition features all the latest developments in the law which affect an architect's work, as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include: an overview of the legal environment, including contract, tort, and land law; analysis of the statutory framework, including planning law, health and safety, construction legislation, and building regulations in the post-Grenfell legal landscape; procurement, and the major industry construction contract forms; building dispute resolution, including litigation, arbitration, adjudication, and mediation; key fields for the architect in practice, including architects' registration and professional conduct, contracts with clients and collateral warranties, liability in negligence, and insurance; entirely new chapters on various standard form contracts, architects' responsibility for the work of others, disciplinary proceedings, and data protection; tables of cases, legislation, and statutory instruments give a full overview of references cited in the text. The Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture.

Project Management (PjM) ARE 5.0 Exam Guide (Architect Registration Examination): ARE 5.0 Overview, Exam Prep Tips, Guide, and Critical Content Mar 03 2020 A Practical Exam Guide for the ARE 5.0 Project Management (PjM) Division! To become a licensed architect, you need to have a proper combination of education and/or experience, meet your Board of Architecture's special requirements, and pass the ARE exams. This book provides an ARE 5.0 exam overview, suggested reference and resource links, exam prep and exam taking techniques, tips and guides, and critical content for the ARE 5.0 Project Management (PjM) Division. More specifically this book covers the following subjects: · ARE 5.0, AXP, and education requirements · ARE 5.0 exam content, format, and prep strategies · ARE 5.0 credit model and the easiest way to pass ARE exams by taking only 5 ARE divisions · Allocation of your time and scheduling · Timing of review: the 3016 rule; memorization methods, tips, suggestions, and mnemonics · Resource Management · Project Work Planning · Contracts · Project Execution · Project Quality Control This book will help you pass the PjM division of the ARE 5.0 and become a licensed architect! Can you study and pass the ARE 5.0 Project Management (PjM) exam in 2 weeks? The answer is yes: If you study the right materials, you can pass with 2 weeks of prep. If you study our book, "Project Management (PjM) ARE 5.0 Exam Guide (Architect Registration Examination)" & "Project Management (PjM) ARE 5.0 Mock Exam (Architect Registration Examination)," you have an excellent chance of studying and passing the ARE 5.0 Project Management (PjM) division in 2 weeks. We have added many tips and tricks that WILL help you pass the exam on your first try. Our goal is to take a very complicated subject and make it simple. "Project Management (PjM) ARE 5.0 Exam Guide (Architect Registration Examination)" & "Project Management (PjM) ARE 5.0 Mock Exam (Architect Registration Examination)" will save you time and money and help you pass the exam on the first try! ArchiteG®, Green Associate Exam Guide®, and GreenExamEducation® are registered trademarks owned by Gang Chen. ARE®, Architect Registration Examination® are registered trademarks owned by NCARB.

Construction Contract Administration for Project Owners Jul 19 2021 Construction Contract Administration for Project Owners is aimed at public and private owners of real estate and construction projects. The book is intended to assist owners in their contractual dealings with their designers and their contractors. Most owners are not primarily in the business of designing and building facilities. The fact that their primary business is not design and construction places them at a disadvantage when negotiating, drafting, and administering design agreements and construction contracts because their designers and contractors use these documents every day. This book is intended to assist owners to redress this imbalance by equipping owners to draft and administer contracts so as to protect their interests. The book is aimed at owner personnel with all levels of knowledge in the business of managing projects. It can serve as a comprehensive introduction to drafting and administering design agreements and construction contracts for beginners. For intermediate level personnel, it can serve as a manual to be read to enhance the reader's skills in this area. For the sophisticated project management professional, it can serve as a resource to be consulted in connection with very specific issues as they arise on a project.

School Development Through Teacher Research Jan 25 2022 School Development through Teacher Research – Lesson and Learning Studies in Sweden and Tanzania presents the results from a three-year-long joint research project conducted by educational researchers from Tanzania and Sweden. Even though the country contexts differ in social, economic as well as educational conditions, including teacher education and classroom standards, many recurrent education challenges are shared. These include the tendency to make educational reforms with little or no input from professionals. The new educational reforms in both countries put a much higher responsibility on teachers; teachers must be able to organise teaching that enables all students to develop required abilities/competencies. Thus, teachers need tools to develop knowledge that can contribute to their professional knowledge base. With an overall interest in issues of teaching and action research, this joint project aimed to use Lesson and Learning Study as models for developing and improving the quality of teaching and learning in schools. The research project was realised through four case studies in each country with a focus on students' development of specific capabilities and values Science, Vocational Skills/Home and Consumer Studies, English as second language and Mathematics in grades 6-7. Complementing the cases School Development through Teacher Research – Lesson and Learning Studies in Sweden and Tanzania offers an introductory background to Lesson and Learning Studies as models for teacher-driven research and school development. The book is written to

support teachers and teacher educators' wishing to reflect about learning and the struggle of learners to discern various concepts, principles and practices. As well as those who genuinely wish to see serious learning take place, rather than simply seeing content 'covered' – including curriculum designers and developers, educational researchers, educational supervisors and leaders and student-teachers as well as students of pedagogy and didactics. We dedicate the book to teacher educators, teachers and school leaders who are seriously striving to enhance students' learning and understanding in different subject areas.

Real Estate Management Law Oct 22 2021 Rev. ed. of: Law for estate management students. 4th ed. 1994.

A Practical Approach to Planning Law Feb 23 2022 Despite repeated attempts in recent years to simplify the planning system, planning law has continued to be so complex that practitioners and students alike have found it difficult to disentangle the issues and principles involved. The twelfth edition of this popular and accessible book aims to remove the mystery which planning law has for so many people. A Practical Approach to Planning Law continues to provide a comprehensive and systematic account of the principles and practice of planning law, guiding the reader through each stage of the planning process, from permission applications through to disputes and appeals. Containing coverage of all recent cases as well as important developments since the publication of the previous edition, particularly those arising out of the Localism Act 2011, this new edition provides an invaluable introduction to the subject for professionals and students alike. The A Practical Approach series is the perfect partner for practice work. Each title focuses on one field of the law, providing a comprehensive overview of the subject together with clear, practical advice and tips on issues likely to arise in practice. The books are also an excellent resource for those new to the law, where the expert overview and clear layout promote clarity and ease of understanding.

MICAI 2009: Advances in Artificial Intelligence Sep 28 2019 This book constitutes the refereed proceedings of the 8th Mexican International Conference on Artificial Intelligence, MICAI 2009, held in Guanajuato, Mexico, in November 2009. The 63 revised full papers presented together with one invited talk were carefully reviewed and selected from 215 submissions. The papers are organized in topical sections on logic and reasoning, ontologies, knowledge management and knowledge-based systems, uncertainty and probabilistic reasoning, natural language processing, data mining, machine learning, pattern recognition, computer vision and image processing, robotics, planning and scheduling, fuzzy logic, neural networks, intelligent tutoring systems, bioinformatics and medical applications, hybrid intelligent systems and evolutionary algorithms.

Professional Practice for Landscape Architects Jul 27 2019 This book, organised in an extremely-user friendly manner, equips the landscape architect with all of the required knowledge in business and law. It is of great value to Landscape architects throughout their academic and professional life. Landscape architecture students will find this book vital to their education and it will also be useful for landscape students on non-professional programmes who wish to understand the regulatory and planning backgrounds to their studies and for students on technical-type landscape programmes. It is compulsory reading for everyone preparing for the new Pathway to Chartership examination. Not only will it help you pass the exam but you will, along with the thousands of fully-qualified landscape architects in the UK, find it an extremely time-saving reference in your busy working lives.

Transport Policy and Planning in Great Britain Mar 15 2021 Transport in the twenty-first century represents a significant challenge at the global and the local scale. Aided by over sixty clear illustrations, Peter Headicar disentangles this complex, modern issue in five parts, offering critical insights into: the nature of transport the evolution of policy and planning policy instruments planning procedures the contemporary agenda. Distinctive features include the links forged throughout between transport and spatial planning, which are often neglected. Designed as an essential text for transport planning students and as a source of reference for planning practitioners, it also furthers understanding of related fields such as urban and regional planning, geography, environmental studies and public policy. Based in the postgraduate course the author developed at Oxford Brookes University, this indispensable text draws on a lifetime of professional experience in the field.

Planning Act 2008 Nov 30 2019 Parts 1 to 8 of the Planning Act 2008 create a new system of development consent for nationally significant infrastructure projects. The new system covers certain types of energy, transport, water, waste water and waste projects. The number of applications and permits required for such projects is being reduced, compared with the position under current legislation. A major role in the new system is to be played by a new independent body to be called the Infrastructure Planning Commission ('the Commission'). The Commission will be responsible for examining applications for development consent for nationally significant infrastructure projects. National policy statements will set the framework for decisions by the Commission. The Secretary of State will have a wide discretion as to how prescriptive the policy should be. The Act sets out the procedures for examination of an application. It is intended that in examining applications greater use is made of written representations with less reliance on oral representations; and restrictions are being placed on the use of cross examination by interested parties at a hearing. The Act sets a timetable for examination of applications and decisions. A deadline of six months is stipulated for carrying out the examination procedure and a further three months is allowed for a Council (consisting of between five and nine Commissioners), a Panel or the Secretary of State to take a decision. Part 9 of the Act makes various alterations to the existing town and country planning regime. Part 10 adds certain matters within the field of town and country planning to the legislative competence of the National Assembly for Wales. Part 11 empowers the Secretary of State to establish a Community Infrastructure Levy.

Piping Engineering Leadership for Process Plant Projects Jan 31 2020 James O. Pennock has compiled 45 years of personal experience into this how-to guide. Focusing on the position of "lead in charge," this book is an indispensable resource for anyone, new or seasoned veteran, whose job it is to lead the piping engineering and design of a project. The "lead" person is responsible for the successful execution of all piping engineering and design for a project, technical and non-technical aspects alike. The author defines the roles and responsibilities a lead will face and the differences found in various project types. Incorporates four decades of personal experience in a How-To guide Focuses on the position of "lead in charge" Includes coverage of topics often ignored in other books yet essential for success: management, administrative, and control responsibilities

Current Projects on Economic and Social Implications of Science and Technology Oct 02 2022

Practical Guide to Software Quality Management Dec 12 2020 If you are responsible for designing, implementing, or managing a quality software program, this updated edition of the Practical Guide to Software Quality Management now identifies 10 major components that make up a solid program in line with ISO 9001 quality management precepts. Thoroughly revised and with new chapters on software safety and software risk management, this comprehensive primer provides you with the starting points for a standardized documentation system, and analyzes each individual program component separately, addressing in detail its specific role and overall importance to the system.

Oversight of the federal procurement system Nov 22 2021

Environmental Law in Bosnia and Herzegovina May 17 2021 Derived from the renowned multi-volume International

Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Bosnia & Herzegovina. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation, and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise, and radiation. Then, a section on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil, and minerals. Further treatment includes the application of zoning and land-use planning, rules on liability, and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Bosnia & Herzegovina. Academics and researchers, as well as business investors and the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative environmental law and policy.

Southeast Asia Mar 27 2022

Foregrounding Urban Agendas Aug 20 2021 This book highlights the discontinuities and the ongoing development of the urban question in policy-making in the context of the controversial current issues of global reversal and regional revival. It critically examines contemporary public policies and practices at the urban, regional and national scales in order to offer a timely contribution to the debate on the significance of the urban dimension and interpretation in terms of the theory, policy and practice of social-spatial research in the twenty-first century. Focusing on Europe, it explores the current urban policy agendas at different scales - and the mobility of those agendas -, their implications, contradictions and controversies. It brings together original contributions from multiple disciplines but with an urban perspective, including empirical case studies and critical discussions of the following topics: the UN 2030 Agenda for Sustainable Development, the global "New Urban Agenda" as part of the Habitat III process; the Urban Agenda for the European Union; national spatial policies related to urban agendas; urban agendas at regional/urban levels; city regionalism discourse and state rescaling; new formal regional and metropolitan governments as a solution (or problem); the role of new actors in regional urbanization dynamics; multi-level governance processes in developing an urban agenda; informal assemblages at the metropolitan scale aiming at constructing the urban concept and dimension. Given its scope, the book is of interest to urban, regional and EU policy-makers, scholars and students working in the fields of urban geography, urban studies, EU urban and regional policies, and planning.
