New York City's Best Public High Schools Sep 23 2019 If you lived anywhere else in the country, you would probably send your child to your neighborhood high school. In New York City, it's much more complicated than that. But what parent has time to research hundreds of school options? To help you choose a high school that is just right for your child, Clara Hemphill and her colleagues at Insideschools visited nearly all of the city's 400 high schools. This essential revision of the critically acclaimed parents' guide features new school profiles; invaluable advice to help parents and students through the stressful admissions process; and new sections on alternative schools, vocational schools, and schools for students learning English. Featuring interviews with teachers, parents, and students, this guide uncovers the "inside scoop" about school atmosphere, homework, student stress, competition among students, the quality of teachers, gender issues, the condition of the building, class size, and much more. "For [this] third edition I looked for schools that spark students' curiosity, broaden their horizons, and help them develop into thoughtful, caring adults." —Clara Hemphill Praise for Clara Hemphill's Parents' Guides! New York Daily News... "Brisk, thoughtful profiles of topnotch, intriguing schools." Big Apple Parent... "Hemphill has done for schools what Zagat's did for restaurants." New York Magazine... "Thoughtful, well-researched...required reading." The New York Times... "A bible for urban parents."

ECOOP '87. European Conference on Object-Oriented Programming Jun 25 2022 This volume contains the proceedings of the first European Conference on Object-Oriented Programming, held in Paris, June 15-17, 1987. The idea of this annual conference series is to provide a forum for theorists and practitioners interested in the object-oriented programming paradigm. The contributions cover the following aspects of object-oriented programming: methodology, implementation, theory, interfaces, languages, simulation, inheritance.

Mastering Delphi Programming: A Complete Reference Guide Mar 10 2021 Use structural, behavioral, and concurrent patterns in Delphi to skillfully develop applications Key FeaturesDelve into the core patterns and components of Delphi to enhance your application's designLearn how to select the right patterns to improve your program's efficiency and productivityDiscover how parallel programming and memory management can optimize your codeBook Description Delphi is a cross-platform Integrated Development Environment (IDE) that supports rapid application development for most operating systems, including Microsoft Windows, iOS, and now Linux with RAD Studio 10.2. If you know how to use the features of Delphi, you can easily create scalable applications in no time. This Learning Path begins by explaining how to find performance bottlenecks and apply the correct algorithm to fix them. You'll brush up on tricks, techniques, and best practices to solve common design and architectural challenges. Then, you'll see how to leverage external libraries to write better-performing programs. You'll also learn about the eight most important patterns that'll enable you to develop and improve the interface between items and harmonize shared memories within threads. As you progress, you'll also delve into improving the performance of your code and mastering cross-platform RTL improvements. By the end of this Learning Path, you'll be able to address common design problems and feel confident while building scalable projects. This Learning Path includes content from the following Packt products: Delphi High Performance by Primož GabrijelčičHands-On Design Patterns with Delphi by Primož GabrijelčičWhat you will learnUnderstand parallel programming and work with the various tools included with DelphiExplore memory managers and their implementationLeverage external libraries to write better-performing programsKeep up to date with the latest additions and design techniques in DelphiGet to grips with various modern multithreading approachesBreak a design problem down into its component partsWho this book is for This Learning Path is for intermediate-level Delphi programmers who want to build robust applications using Delphi features. Prior knowledge of Delphi is assumed.

Rethinking Strategic HR Jan 28 2020 The primary goal of this book is to show you new ways to improve the business impact of your HR function by up to 25 percent. Because the goal is so high, The approaches that permeate this book are aggressive ones that are designed to make you rethink everything you do in HR. Authored by one of the industry's most respected thinkers, Rethinking Strategic HR is a forward-thinking look at building a smarter, more powerful HR strategy in any organization. Throwing out the old, conventional approaches, this provocative book provides a hard-hitting guide to 21st century HR strategy that will challenge you to think in bold, new ways. From critiques of traditional practices to specific day-to-day steps to strategic thinking, you'll get a new perspective on HR including: A clear definition of what is and what is not strategic the five distinct levels of contribution that HR can make A list of the most-used HR department strategies Tools for assessing your own strategic level A chart on how to make 'fact-based' decisions How HR routinely 'under-costs' its decisions How to make a strategic case to your CFO and more!

Architecture of Computing Systems - ARCS 2009 Jul 14 2021 TheARCSseriesofconferenceshasover30yearsoftraditionreportingtop-notch results in computer architecture and operating systems research. It is organized bythe specialinterestgroupon "Computer and System Architecture" ofthe GI (Gesellschaft fur " Informatik e.V.) and ITG (Informationstechnische Gesellschaft im VDE - Information Technology Society). In 2009, ARCS was hosted by the Delft University of Technology, which has one of the leading information te- nology schools in Europe. This year's special focus was set on energy awarenessviewed from two di?- ent perspectives. Firstly, this deals with the improvement of computer systems to be as energy-e?cient as possible (particularly for speci?c applications). One can think of heterogeneous multi-core architectures or recon?gurable archit- tures for this purpose.Secondly,this addressesthe usage ofcomputer systems to reduce the energy consumption of other systems, which might lead to problems of communication and cooperation. Like the previous conferences in this series, it continues to be an important forum for computer architecture research. The call for papers resulted in a total of 57 submissions from around the world. Each submission was assigned to at least three members of the Program Committee for review. The Program Committee decided to accept 21 papers, which are arranged into eight sessions. The accepted papers are from: Finland, France, Germany, Japan, The Netherlands, Singapore, Spain, UK, and USA. Three intriguingkeynotesfromacademia andindustry complementedthe strong technical program.
