[Cold War in the Desert](#) Aug 08 2020 The question of the Italian colonies played an important part in the breakdown of Allied cooperation after the Second World War. Britain and the United States were closely involved in this question, yet their respective roles have not received the detailed historical attention which they merit. Based on extensive research in British and American archives, this book will seek to analyse British and US policy on this question within its Cold War context. Volume II (Part Three) reproduces the edited version of the annual report of the Commission to the General Assembly.

[Digital Dieting](#) Jan 13 2021 Imagine if a student spent as much time managing information as celebrities doted on dieting? While eating too much food may be the basis of a moral panic about obesity, excessive information is rarely discussed as a crisis of a similar scale. Obviously, plentiful and high quality food is not a problem if eating is balanced with exercise. But without the skills of media and information literacy, students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge, imagination and questioning. [Digital Dieting: From Information Obesity to Intellectual Fitness](#) probes the social, political and academic difficulties in managing large quantities of low quality information. But this book does not diagnose a crisis. Instead, [Digital Dieting](#) provides strategies to develop intellectual fitness that sorts the important from the irrelevant and the remarkable from the banal. In April 2010, and for the first time, Facebook received more independent visitors than Google. Increasingly there is a desire to share rather than search. But what is the impact of such a change on higher education? If students complain that the reading is 'too hard', then one response is to make it easier. If students complain that assignments are too difficult, then one way to manage this challenge is to make the assignments simpler. Both are passive responses that damage the calibre of education and universities in the long term. [Digital Dieting: From Information Obesity to Intellectual Fitness](#) provides active, conscious, careful and applicable strategies to move students and citizens from searching to researching, sharing to thinking, and shopping to reading.

[Cosmology's Century](#) Oct 29 2019 From Nobel Prize-winning physicist P. J. E. Peebles, the story of cosmology from Einstein to today Modern cosmology began a century ago with Albert Einstein's general theory of relativity and his notion of a homogenous, philosophically satisfying cosmos. [Cosmology's Century](#) is the story of how generations of scientists built on these thoughts and many new measurements to arrive at a well-tested physical theory of the structure and evolution of our expanding universe. In this landmark book, one of the world's most esteemed theoretical cosmologists offers an unparalleled personal perspective on how the field developed. P. J. E. Peebles was at the forefront of many of the greatest discoveries of the past century, making fundamental contributions to our understanding of the presence of helium and microwave radiation from the hot big bang, the measures of the distribution and motion of ordinary matter, and the new kind of dark matter that allows us to make sense of these results. Taking readers from the field's beginnings, Peebles describes how scientists working in independent directions found themselves converging on a theory of cosmic evolution interesting enough to warrant the rigorous testing it passes so well. He explores the major advances—some inspired by remarkable insights or perhaps just lucky guesses—as well as the wrong turns taken and the roads not explored. He shares recollections from major players in this story and provides a rare, inside look at how science is really done. A monumental work, [Cosmology's Century](#) also emphasizes where the present theory is incomplete, suggesting exciting directions for continuing research.

[Capacity for Development](#) May 05 2020 If capacity development initiatives are to have a pivotal role in helping developing countries meet the challenges of the 21st century, it is necessary to take a closer look at the underlying assumptions about the nature of development as a process of societal transformation, of capacity and capacity development, of knowledge and of aid-donor-recipient relationship. This book contains a range of views from practitioners, academics and policy-makers about what has gone right with technical cooperation, what has gone wrong, and how to do it better.

[The Papers of Thomas Jefferson, Volume 1](#) Apr 27 2022 "The Papers of Thomas Jefferson is a projected 60-volume series containing not only the 18,000 letters written by Jefferson but also, in full or in summary, the more than 25,000 letters written to him. Including documents of historical significance as well as private notes not closely examined until their publication in the Papers, this series is an unmatched source of scholarship on the nation's third president"--Publisher's description.

[Dietary Supplements](#) Apr 15 2021 The use of dietary supplements is often promoted as a solution to a number of nutrition problems, including general dietary patterns and nutrient intakes, malnutrition in the elderly, the nutritional needs in pregnant women, poor nutrient intakes in low-income children, the iron needs of infants after 6 months, and the prevention of diseases. Although there are situations where the use of vitamin and mineral supplements can improve the health of certain individuals, the consumption of conventional food continues to be the preferred method to improve nutritional and health status. This important book examines many of the issues that dietary supplements face today. One such controversial issue is whether the use of dietary supplements should be included in food-stamp plans. Also questioned is the regulation of some of the more controversial dietary supplements such as ephedra, and if they should be available as over-the-counter or rather be made prescription-necessary medications. Contents: Preface; Dietary Supplements: FDA Reform and Codex; Dietary Supplements: Purchase with Food Stamps; Dietary Supplements: Legislative and Regulatory Status; Dietary Supplements: Ephedra; Bibliograp

[Strengthening OLAF, the European Anti-Fraud Office](#) Dec 24 2021 OLAF (the European Anti-Fraud Office) was established by the Commission in 1999, following the collapse of its predecessor UCLAF, and its role is to protect the financial interests of the EU and to fight fraud and corruption within the EU's institutions or within individual EU member states. Its efficiency and effectiveness are currently under review, and the Commission has brought forward a proposal designed to improve OLAF's operational efficiency, improve information flows and protect the rights of individuals under investigation. The Committee's report judges that this proposal is premature and unlikely to enhance OLAF's accountability or independence. It also notes that the future of OLAF has become entwined with the debate over the post of European Public Prosecutor, and that the Commission should not allow this to distract its focus from examining how OLAF can be made more effective in the fight against fraud.

TPS Frequency Dictionary of Mandarin Chinese May 17 2021 The TPS Frequency Dictionary of Mandarin Chinese is not just another character frequency based dictionary. It has been designed to provide students with a guide for learning new characters, words, and phrases gradually, building upon characters already familiar. The entries have been arranged according to a Triple Progression System in which words are grouped first by character frequency, then by word frequency, and filtered so that new words and phrases appear only after all of their component characters have been introduced.

Public Enterprise Management And Privatisation Oct 10 2020 A number of public enterprise (PE) executives have long felt the need for a book which would provide necessary information and analysis of various dimensions of PE management and privatisation. The book provides at one place, a precise and authoritative account of the concept, policy, and analysis of major issues confronting PEs. Public ownership per se does not make PE performance sub-optimal. The operation of the Government system, of which PE is a sub-system, has not been conducive to performance. During the last six decades, inadequate political will and vested interests have come in the way of freeing PEs from excessive and throttling controls, and demoralising accountability. Not letting the managers manage with the freedom required in the liberalised and globalised set-up is the problem. The multifarious and complex managerial problems of PEs, which get compounded by faltering moves towards privatisation, cannot be wished away. These have been considered in the book at some length. The book, first published in 1980, continues to be a standard work on the subject. This latest edition has been revised by Dr. R.K.Mishra, Director, Institute of Public Enterprise, Hyderabad.
