**Rebuilding Public Confidence in Educational Assessment** Dec 11 2020 Educational assessment is important. But in the twenty-first century it is easy to feel that schooling and other phases of education are shaped entirely by certain assessments, and that assessment is only about exam results. The idea that test grades can accurately describe the aims and outcomes of education is unfair and reductive. Yet it is a pervasive and persuasive discourse. This book is about such discourses - the stories we tell each other - and how they impact public trust and confidence in educational assessment. It explains the roots and nature of assessment discourses, and proposes a restructuring of the debates in order to rebuild public confidence. It aims to challenge dominant assessment discourses and demands a more nuanced, informed debate about what happens in and beyond schools, and how this influences public thinking. Questioning the status quo needs buy-in from policymakers, teachers, parents and students, and from the broader public: from journalists, you, me, our friends and our children. Using examples from international settings to explore the nature of trust in assessment discourses, Rebuilding Public Confidence in Educational Assessment shows how these discourses can be reframed so that all aspects of the assessment system - policymaking, school planning, home practice with students - can be undertaken with confidence.

**Universally Comprehensible, Arrogantly Local** Aug 07 2020 From the perspective of the international scholarly community under North Atlantic domination, South Africa might look like a peripheral place of knowledge production. In recent years, a plethora of voices calling for provincializing Europe, for deconstructing Eurocentrism and for adopting post- and decolonial perspectives have challenged such views. They have partly transformed the academic landscape, but have had limited success in challenging the fundamental global divides in production, circulation and recognition of social scientific knowledge. This book chooses a different take on the question of how North Atlantic domination could be challenged, by conceptualizing counter-hegemonic currents in international sociology. Instead of providing theoretical and deconstructive critiques, counter-hegemonic currents are effective through collective social scientific practice: the production of data, knowledge and texts, of new generations of scholars, the interaction with extra-university actors, leading to the gradual emergence of integrated and productive scientific communities. Their orientation towards local arenas of discussion and production of socially relevant research effectively reduces the belief in the hegemony of the North. The historical development of South African labour studies is a case in point. This study provides a systematic, in-depth analysis of research and teaching activities, networks with extra-academic actors and international cooperation over time in the three major Labour Studies centres: Johannesburg, Durban and Cape Town. It draws on a rich variety of material, including annual reports of research centres and labour service organizations, teaching contents and exam questions, the 1974-2003 volumes of the "South African Labour Bulletin" and newsletters of ISA Research Committee 44 on Labour Movements. Qualitative analysis of four seminal books is used to assess their contribution to original, general theory-building. In-depth interviews with Labour Studies representatives complement the analysis of documents and literature by reconstructing the oral history of this scholarly community, an indispensable source given that many debates could not appear in written form or had to be watered during the Apartheid years. The study concludes that over time, South African social scientists have generated knowledge on labour, industry and trade unions that is universally comprehensible, but arrogantly local.

**Exam Literacy** Dec 31 2019 In Exam Literacy: A guide to doing what works (and not what doesn't) to better prepare students for exams, Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information on: The nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. How students can be encouraged to make use of these winning strategies when revising independently.

The Royal Society of Arts (RSA), later UCLES (University of Cambridge Local Examinations Syndicate) Communicative Use of English as a Foreign Language examinations (CUEFL) was one such influence, as were the Certificates in Communication Skills in English (CCSE), these exams being a development of the CUEFL. **CIMA E3** Nov 29 2019 Candidates often find business strategy questions particularly difficult, since there is rarely a single correct solution, nor any standard template that can be learned to shape an answer. The Practice and Revision Kit provides a number of exam-style questions to provide valuable practice in tackling the scenario-based questions you should expect to find in the E3 exam. The answer guidance in the Kit highlights the models and ideas you should use to help answer questions, but also reminds you that it is applying knowledge to the specific context of the question scenario that earns marks, rather than simply reciting theories.
