Triumph Bonneville Feb 09 2021 There are lots of books about the Triumph Bonneville, about its history, performance, lineage and the minutiae of its specification, but none of them tell you what to look for when buying one secondhand. That's what this book is about – it aims at being a straightforward, practical guide to buying a used Bonnie. It won't list all the correct color combinations for each year, or analyze the bike's design philosophy, or consider its background as part of a troubled industry – there are excellent books listed at the end of this one which do all of that. But hopefully it will help you avoid buying a dud. Point by point, it takes the reader through everything that needs looking at when buying a Bonnie, plus spares prices, which is the best model to buy for your needs, a look at auctions, restorations and paperwork. Over 29 years in production, the Bonneville is for some the definitive postwar British vertical twin, perhaps even the definitive British bike of all time, with all its strengths, weaknesses and character. Although there might seem to be a wide range of models and special editions, all are based around the same 649cc or 747cc vertical twin. There were plenty of changes over the years, but none of them changed the basic format of this classic British bike. Aside from all the history, the Bonneville remains a tremendous classic to own, so long as you're prepared to look after it. The last Bonnies truly deserve the term 'practical classic.' Whichever one you choose, it should be fast, agile and good looking, and on a twisty English B road, there's nothing like a Bonnie. One hundred color photos, useful appendices and expert advice mean this book could save you 1000's.

[Plastic Toy Cars of the 1950s and 1960s](#) Jun 03 2020 The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brintoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind. . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

Forza Minardi! Jun 23 2019 After 20 years of glorious 'failure', the best-loved team in Formula One is consigned to the history books, and it deserves one of its own. Minardi had a successful time in Formula Two until the tiny Italian outfit was ready to hit the big time in 1985. It somehow survived in F1's shark-infested waters as bigger teams (Lotus, Arrows, Tyrrell) were dragged under. They have a truly international fan-base and are the 'second team' of most F1 devotees. Minardi is held in such affection as everyone loves the plucky underdog – Minardi's annual budget would have lasted one month at the other Italian team up the road. Yet, from its plant in Faenza near Bologna, Minardi has produced cars that qualify, sometimes score points and often lead the way in their technology. Gian Carlo Minardi also developed a reputation as a fabulous talent-spotter – Fisichella, Trulli, Webber and the youngest ever World Champion Alonso all started their F1 careers with Minardi. For the last five years, Minardi was owned by controversial Australian tycoon Paul Stoddart. Cast as David against the Goliath of F1's governing body, Stoddart constantly hit the headlines as he tried to get a more equal share of the sport's billions. Ultimately, he failed and Red Bull has now bought the team. Despite a petition of 15,000 names, the Minardi name has vanished from the F1 grid and true motorheads miss it. This is the one and only inside account, with exclusive, comprehensive interviews with bosses, drivers and engineers. 140 unique photos complete this revelatory tale.
