*Homophones and Homographs* Sep 28 2022 This expanded fourth edition defines and cross-references 9,040 homophones and 2,133 homographs (up from 7,870 and 1,554 in the 3rd ed.). As the most comprehensive compilation of American homophones (words that sound alike) and homographs (look-alikes), this latest edition serves well where even the most modern spell-checkers and word processors fail—although rain, reign, and rein may be spelled correctly, the context in which these words may appropriately be used is not obvious to a computer.

*Homophones and Homographs* Jun 25 2022 Homophones and homographs are words that have different meanings: homophones sound alike but are spelled differently, and homographs are spelled the same but pronounced differently. A second-grade homework assignment to see who could generate the largest list of homophones ignited an interest that inspired the first edition of this dictionary (1986).

**The Penguin Book of Haiku** Jan 28 2020 The first Penguin anthology of Japanese haiku, in vivid new translations by Adam L. Kern. Now a global poetry, the haiku was originally a Japanese verse form that flourished from the sixteenth to nineteenth centuries. Although renowned for its brevity, usually running three lines long in seventeen syllables, and by its use of natural imagery to make Zen-like observations about reality, in fact the haiku is much more: it can be erotic, funny, crude and mischievous. Presenting over a thousand exemplars in vivid and engaging translations, this anthology offers an illuminating introduction to this widely celebrated, if misunderstood, art form. Adam L. Kern's new translations are accompanied here by the original Japanese and short commentaries on the poems, as well as an introduction and illustrations from the period.

**Coming Into Contact** Nov 25 2019 A snapshot of ecocriticism in action, *Coming into Contact* collects sixteen previously unpublished essays that explore some

of the most promising new directions in the study of literature and the environment. They look to previously unexamined or underexamined aspects of literature's relationship to the environment, including swamps, internment camps, Asian American environments, the urbanized Northeast, and lynching sites. The authors relate environmental discourse to practice, including the teaching of green design in composition classes, the restoration of damaged landscapes, the persuasive strategies of environmental activists, the practice of urban architecture, and the impact of human technologies on nature. The essays also put ecocriticism into greater contact with the natural sciences, including elements of evolutionary biology, biological taxonomy, and geology. Engaging both ecocritical theory and practice, these authors more closely align ecocriticism with the physical environment, with the wide range of texts and cultural practices that concern it, and with the growing scholarly conversation that surrounds this concern.
