Clinical Surgery May 16 2021 'A comprehensive and attractively presented 4-colour textbook of surgery aimed primarily at medical students but also of use to junior doctors and surgical technicians. the book has two key features: firstly, it provides students with coverage of every aspect of surgery; secondly, it has been designed and written to be the 'surgical companion' to Kumar and amp; Clark's Clinical Medicine. Elsevier does not support Expert Consult access for institutional customers.

Pediatric Surgery Jul 26 2019 The second, fully updated edition of this book applies and contextualizes up-to-date information on pediatric surgery for low and middle-income countries (LMICs). The book is organized in general anatomic and thematic sections within pediatric surgery, such as urology, oncology, orthopedics and gastroenterology and includes chapters addressing the unique challenges and approaches for pediatric surgery in low-resource settings. Each chapter has dual authorship LMIC author providing context-specific insights and authors from high-income countries (HICs) contributing experience from well-resourced settings. Written in a reader-friendly format, this book has a uniform structure in each chapter, with introduction, demographics, etiology, pathophysiology, clinical presentations, investigations, management, outcome, prevention, ethics, evidence-based surgery and references. This comprehensive volume fills the gap between up-to-date pediatric surgical scholarship and knowledge developed and applied in HICs, and the practical needs of practitioners in low-resource settings. This is an indispensable guide for postgraduate surgical trainees in Africa and other LMICs as well as general surgeons practicing in Africa and other LMICs, who need to care surgically for children.

Oxford Textbook of Neurological Surgery Jan 12 2021 Neurosurgery is a rapidly developing and technically demanding branch of surgery that requires a detailed knowledge of the basic neuro-sciences and a thorough clinical approach. The Oxford Textbook of Neurological Surgery is an up-to-date, objective and readable text that covers the full scope of neurosurgical practice. It is part of the Oxford Textbooks in Surgery series, edited by Professor Sir Peter Morris. The book is split into 20 overarching sections (Principles of Neurosurgery, Neuro-oncology of Intrinsic Tumours; Extra-axial Tumours and Skull Lesions; Cerebro-Pontine Angle Tumours; Sellar and Supra-Sellar Tumours; Posterior Fossa Tumours; Pineal tumours; Uncommon

Tumours and Tumour Syndromes; Neurotrauma and Intensive Care; Vascular Neurosurgery; Principles of Spinal Surgery; Spinal Pathology; Spinal Trauma; Peripheral Nerve Surgery; Functional Neurosurgery; Epilepsy; Paediatric Neurosurgery; Neurosurgery for Cerebrospinal Fluid Disorders and Neurosurgical Infection). Each section takes a dual approach with, 'Generic Surgical Management' chapters that focus on specific clinical problems facing the neurosurgeon (e.g. sellar/supra-sellar tumour, Intradural Spinal Tumours etc.) and 'Pathology-Specific' chapters (e.g. Glioma, Meningeal Tumours, Scoliosis and Spinal Deformity, Aneurysm etc.). Where appropriate, this division provides the reader with easily accessible information for both clinical problems which present in a regional fashion and specific pathologies. The generic chapters cover aspects such as operative approaches, neuroanatomy and nuances. Specifically each chapter in the book incorporates several strands. Firstly the fundamental neuroscience (anatomy, pathology, genetics etc.) that underlies the clinical practice. Secondly, a review of the requisite clinical investigations (e.g. angiography, electrodiagnostics, radiology). Thirdly, a thorough evidence based review of clinical practice. Following this a consideration of the key debates and controversies in the field with 'pro-' and 'con-' sections (e.g. minimally invasive spine surgery, microsurgical treatment of aneurysms) is provided. A summary of the key papers and clinical scales relevant to neurosurgery form the concluding part. The book is a 'one-stop' text for trainees and consultants in neurosurgery, residents, those preparing for sub-specialty exams and other professionals allied to surgery who need to gain an understanding of the field. It acts as both a point of reference to provide a focussed refresher for the experienced neurosurgeon as well as a trusted training resource.

Textbook of Epilepsy Surgery Oct 09 2020 *Textbook of Epilepsy Surgery* covers all of the latest advances in the surgical management of epilepsy. The book provides a thorough understanding of epileptogenic mechanisms in etiologically different types of epilepsy and explains neuronavigation systems. It discusses new neuroimaging techniques, new surgical strategies, and more aggressive surgical approaches in cases with catastrophic epilepsies. The contributors also analyze the improved statistics of surgical outcome in different epilepsy types. The book follows a systematic approach to the diagnostic evaluation of patients who are candidates for epilepsy surgery. It first discusses the general principles of surgery, and then describes the presurgical evaluation according to the six zones (symptomogenic, irritative, ictal onset, epileptic lesion, functional deficit, and epileptogenic zone). This series of chapters concludes with the description of the *Epilepsy Surgery Management Meeting*, an essential and indispensable part of the surgical evaluation. The book next incorporates detailed discussions of the cortical mapping techniques and the numerous surgical techniques. This is followed by the post-surgical medical management and a discussion of the surgical outcome. Finally, selected case studies are presented, along with protocols for the storage and processing of brain tissue for molecular studies. This definitive textbook is an invaluable reference for neurologists, neurosurgeons, epilepsy specialists, and those interested in epilepsy and its surgical treatment.

Farquharson's Textbook of Operative General Surgery 9Ed Jun 24 2019 First published in 1954, Farquharson's Textbook of Operative General Surgery has become firmly established as a classic textbook for trainee surgeons throughout the world. Basic surgical techniques, including the reasons for their application, are discussed. General surgical operations are described and the indications for them are covered. Techniques are described in sufficient detail to allow a surgeon who has limited experience of a particular operation to proceed with confidence and safety. The text is thus also valuable for surgeons practising in smaller hospitals worldwide where specialised advice may not otherwise be available. This ninth edition has been fully updated with many chapters entirely rewritten. New contributing authors in the subspecialties of general surgery bring their own particular expertise to the book. Separate surgical specialties such as plastic, orthopaedic and urological surgery are covered in those areas where there is potential overlap with general surgery. Selected operative techniques in cardiothoracic, gynaecological and neurosurgery are also described as a general surgeon must occasionally operate in an emergency in the absence of the relevant surgical specialist. Advice from surgeons practising in other surgical disciplines has been extensively utilised in these sections. **Key features:** Fully revised edition of this classic text An unrivalled source of practical advice and information Covers all operations commonly performed by the general surgeon Practical coverage of trauma and emergencies in all surgical specialties Preserves the readable and accessible style so popular in earlier editions Illustrated throughout with over 650 high-quality operative line illustrations and photographs Combining the extensive experience of Margaret Farquharson, daughter of the original author, and Brendan Moran, both practising general surgeons at an acknowledged centre of teaching excellence, the ninth edition of Farquharsons will continue to be an essential addition to the bookshelves of trainee and practising surgeons everywhere.
