Heart versus Head Dec 31 2019 Challenging traditional accounts of the development of American private law, Peter Karsten offers an important new perspective on the making of the rules of common law and equity in nineteenth-century courts. The central story of that era, he finds, was a struggle between a jurisprudence of the head, which adhered strongly to English precedent, and a jurisprudence of the heart, a humane concern for the rights of parties rendered weak by inequitable rules and a willingness to create exceptions or altogether new rules on their behalf. Karsten first documents the tendency of jurists, particularly those in the Northeast, to resist arguments to alter rules of property, contract, and tort law. He then contrasts this tendency with a number of judicial innovations--among them the sanctioning of 'deep pocket' jury awards and the creation of the attractive-nuisance rule--designed to protect society's weaker members. In tracing the emergence of a pro-plaintiff, humanitarian jurisprudence of the heart, Karsten necessarily addresses the shortcomings of the reigning, economic-oriented paradigm regarding judicial rulemaking in nineteenth-century America. From negotiating the price of a used car to closing a multimillion-dollar merger, Korobkin meticulously explains how to answer the following questions that arise in every negotiation: Should you make the first offer or let the other side go first? What makes some proposals seem more fair than others? How do you decide whether to accept an offer, reject it, or make a counteroffer? When should you propose an unusual agreement structure? Kill Me May 16 2021 He's a rich, anonymous white guy. When he's not making money in the boardrooms of multi-national pharmaceutical companies, he's at one of his palatial homes with his wife and daughter or he's deep cave diving in Belize. He enjoys power as well as money, and in all matters - business, pleasure, sex - he's happiest on dangerous ground. He only has one fear: the fear of being dependent on others. But money can buy the means to circumvent this indignity, and he buys into an organisation - dubbed 'Death's Angels' - who guarantee to kill him if he ever reaches that point. Certain of the parameters he's set, life goes on a normal. But it isn't long before his past and his genes catch up with him, and he wants to change those parameters. Nobody told him that things weren't going to be as easy as that. Because Death's Angels never back out of a bargain .
