NTA CUET UG 2022 Section 2 Domain Humanities Jul 17 2021 The National Testing Agency (NTA) conducts the Common University Entrance Test (CUET) in three sections for admission into Under Graduate programs for all Central Universities like DU, JNU, JMI, AMU, etc. Set your preparation in motion with the newly launched "NTA CUET (UG) Section II Domain (Humanities)", designed to help the students aspiring for admission into the Central Universities. Serving as a study guide, the book constitutes all the theories according to the syllabus directed by the University Grants Commission (UGC). Apart from this, it also focuses on the practice part with a good number of questions. Prepared strictly in line with the prescribed format, this book ensures success in the exam. This book possesses: 1. Complete coverage of syllabus 2. Designed as per the latest prescribed format 3. Divided into 4 sections 4. 2 practice sets in each section for thorough revision Table of Contents History, Geography, Political science, Sociology, Psychology, Home Science, Practice Sets

Atlas of Fetal Sectional Anatomy May 03 2020 The fetal period of human growth and development has become an area of intense study in recent years, due in large part to the development of diagnostic ultrasound. More than 2,000 articles have been published in the last five years describing anatomy and pathology in utero, as reflected in sonographic images. Yet, no standard reference exists to correlate these images with fetal gross anatomy and attempts to draw parallels from adult structure have often led to false assumptions. The dictum "the newborn is not a miniature adult" is all the more valid for the fetus. This text aims to provide a comprehensive reference for normal sectional anatomy correlated with in utero ultrasound images. In addition, magnetic resonance images of therapeutically aborted or stillborn fetuses are paired with similar gross sections to serve as a foundation upon which current in vivo studies may build. Lastly, a miscellaneous section illustrates several anatomic points useful in the understanding of fetal anatomy. These points include the changing anatomy of the fetal brain during gestation and the anatomy of the meninges, the fetal heart, and ductus venosus. It is our hope that this atlas will provide a clear picture of fetal anatomy, rectify some of the confusion which exists in antenatal diagnosis, and stimulate further interest in fetal development.
