[Mirrorlands](#) Jan 11 2021 Mirrorlands is a journey through space and time to the meeting points of Russia and China, the world's largest and most populous countries. Charting an unconventional course southeast through Siberia, Inner Mongolia, the Russian Far East and Manchuria, anthropologist and linguist Ed Pulford sketches a rich series of encounters with people and places unknown not only to outsiders, but also to most residents of the capital cities where his journey begins and ends. What Russia and China have in common goes much deeper than their status as authoritarian post-socialist states or perceived menaces to Western hegemony. Their shared history can only fully be appreciated from an intimately local, borderland perspective. Along remote roads, rivers and railways, in cosmopolitan cities and indigenous villages of the northeast Asian frontiers, Pulford maps the strikingly similar ways in which these two vast empires have ruled their Eurasian domains, before, during and after socialism. With great cultural nuance, Mirrorlands thoughtfully evokes the diverse daily interactions between residents of the Russia-China borderlands, and their resulting visions of "Europe" and "Asia." It is a vivid portrait of centuries of cross-border encounter, mimicry and conflict, key to understanding the global place and identity of two leading world powers.

[Ancient Greece and Rome in Modern Science Fiction](#) Oct 20 2021 Ancient Greece and Rome in Modern Science Fiction introduces and analyses the reception of classical antiquity in contemporary science fiction. By using up-to-date methods from classical reception theory, science-fiction analysis and fictional-world studies, the book will help furnish the reader's understanding of the ways in which the literature, culture, history and mythology of ancient Greece and Rome are appropriated and represented across multiple media platforms in the science-fiction genre today. The book will therefore serve as an entry point into several areas of study: the reception of classics in popular culture, antiquity in modern media, the uses of the ancient world in science-fiction, and broader science-fiction criticism. The chapters – structured by medium – principally offer a roughly chronological overview of that medium and its treatment of ancient history, mythology, literature and culture. An abundance of case studies from literature, film and television and videogames including Star Trek, Battlestar Galactica, Fallout: New Vegas, the Mass Effect franchise and Assassin's Creed show how classical antiquity is reused, encountered, re-encountered by creators and consumers of the present – how we bounce off it, and it bounces off us, and how this reciprocation creates new visions of Greece and of Rome.

Conan's Brethren Aug 25 2019 A sumptuous collection of epic fantasy heroes from the pen of Robert E. Howard, one of the true Masters of Fantasy Robert E. Howard was a pulpwriter who turned his hand to everything from historical adventure and detective stories to Western and boxing fiction - and invented the genre now known as sword-and-sorcery: it is for these tales of heroic fantasy and horror that he is best remembered. His mighty heroes - including an English Puritan adventurer sent on redressing grievous wrongs, the king of a mythical, antediluvian empire contemporary with Atlantis, a Pictish warrior-king - all these brothers of the sword and more bestrode the pages of **WEIRD TALES** and the other pulp magazines of the twenties and thirties. This companion volume follows on from the success of the first Gollancz Big Black Book featuring Howard's world-famous barbarian king, and contains all the stories featuring his brothers-in-arms, collected together in chronological order, as fresh and atmospheric today as when they were first published in the pulp magazines of more than eighty years ago. Compiled by and with an Afterword by award-winning writer and editor Stephen Jones, and with cover image, frontispiece and internal pictures by the award-winning artist Les Edwards.

**Kull of Atlantis** Jan 23 2022 A collection of the Kull of Atlantis fantasy stories published before Robert E. Howard's tragic suicide in 1936. Known for his Conan and Solomon Kane characters, Kull of Atlantis is set in the same fictional realm as Conan. Fantasy and savagery at the dawn of time!

**Atlantis and the Coming Ice Age** Nov 20 2021 Reveals the parallels between the rise and fall of Atlantis, cultures in ancient Mesoamerica, and our modern civilization • Links the demise of Atlantis with the birth of the Olmec civilization in Mexico, the beginning of the first Egyptian dynasty, and the start of the Mayan Calendar • Reveals the Atlantean and Mayan prophecy of an eternal cycle of global creation, destruction, and renewal and how we are headed into a destructive phase • Shows how ancient prophecies correlate precisely with the latest climatology studies, the rising incidence of solar flares, and papers from Pentagon and NASA analysts With the passing of the Mayan Calendar's end date we can now focus on the true significance of what the Maya and their predecessors were trying to convey to future civilizations. Frank Joseph reveals how the Mayan prophecy, symbolized by their calendar, was created through the combined genius of Atlantis and Lemuria and predicts an eternal cycle of global creation, destruction, and renewal. He shows how this cycle correlates precisely with scientific studies on glacial ice cores and predictions from the Hopi, the Incas, and the Scandinavian Norse as well as the visions of Edgar Cayce. He links the demise of Atlantis with the birth of the Olmec civilization in Mexico (the progenitors of the Maya), the beginning of the first Egyptian dynasty, and the start of the Mayan Calendar. Drawing on the latest climatology studies and papers from Pentagon and NASA analysts, he reveals that we are on the brink of a destructive phase in the global cycle of change as predicted by the Atlanteans and the Maya. The world's current political, economic, and cultural deterioration is paralleled by unprecedented storms and record temperatures, massive solar flares, tectonic disturbances, and fissuring sea floors that could release dangerous reservoirs of methane gas into the environment--all of which signals we are headed into another ice age. Despite the Atlanteans' greater understanding of the cyclical nature of catastrophes and of the human role in them, Joseph reveals the mistakes they made that played a crucial role in their civilization's destruction. By recognizing the self-destructive patterns of Atlantis in our own civilization, we can learn from their mistakes to reestablish civilization's cosmic balance before time runs out.

Epheremon: The Particle of Time (The 1st Book of the FAUSTEF TRILOGY) Aug 18 2021 Badonna, an immortal woman code-12, talks to Faustef about the nature of Time. Faustef, a graduate student in physics, is getting ready for the defense of his thesis the next morning. His thesis is based on the nature of Time as an infinite continuum. Badonna tells him that Time is a corpuscular fluid; that the Time Corpuscle is referred to as the epheremon. She tells Faustef about the spherical time-matrix, (the carpet of existence), and about the nature of time travel. She tells him that Lucifer and she are the first children-in-creation of QUALB the Giver, the Creator of all that there is; that Orpheus is a son-in-birth of QUALB the Giver; that Lucifer, before his exile, was the Master Guardian of the Atlantis Universe, (our Universe), and the 21 Sibling Universes; that she is referred to as the Mother of the Atlantis Universe and the 21 Sibling Universes. Faustef is disappointed with his thesis; decides to withdraw it and write a new one based on the epheremon concept. His new thesis is rejected by the Examination Board as a far-fetched idea, being more the work of the magus than a physicist. Faustef is advised by the Board to resubmit his old version of the thesis, which he does, and defends it successfully.

Mirror Mirror Aug 30 2022 Mirrors are fascinating. They reflect everything accurately the things that are in front of them, or do they? Scientists were at one time attempting to create a mirror which showed everything the way the viewer would see it, not the back-to-front reflection we are used to. Quite what that would do to our minds is anyone's guess... Mirrors can be menacing. They can reveal our innermost fears – sometimes showing us those fears in ghastly and horrific forms. Mirrors can speak, according to the fairy tale, giving the viewer what she wanted up to a point, until it no longer became the truth. Mirrors hold many secrets. This anthology reveals some of those secrets and horrors as the talented writers who have allowed me to use their work explore in tales of woe, blood, gore and murder. Here are the real nasties hiding behind the silvered backs of seemingly innocuous mirrors. Look in them at your peril.

**The Lost Teachings of Atlantis** Jun 27 2022 This is the account of an American teenager who discovered a monastery in Tibet that was the inspiration for the legend of Shangri La. It might be categorized as a 'new age' or philosophy book, like the Celestine Prophecy, since it focuses on his spiritual training and their teachings in a novel-like format. Hard to believe, but interestingly, the sub-tropical region amongst the Himalayas that he describes finding, was later documented by explorers from National Geographic, then 'covered up' (there is still evidence of this). Also interesting is that the author was apparently mentioned in the Edgar Cayce readings (the famous American psychic whose books have sold millions of copies), as someone who would one day bring an important message to the world.
