[Report of the International Workshop on the Implementation of International Fisheries Instruments and Factors of Unsustainability and Overexploitation in Fisheries](#) Jun 06 2020 The workshop referred closely to the results of a first workshop held in Bangkok in 2002 (The International Workshop on Factors Contributing to Unsustainability and Overexploitation in Fisheries) but aimed more specifically at answering the following three major questions: What are the major obstacles to the implementation of major legal instruments? What are the main lessons learned and the possible paths to solutions for improved implementation? What are the possible gaps that may exist in these instruments to guide the international community in improving the management of marine fisheries? The workshop was based on a review of eleven case studies, each relating to one of the following categories of fishery: large volume small pelagics; tuna and tuna-like species; large volume demersals; and coastal fisheries. This publication contains the report of the Workshop, discussion papers containing case studies and notes submitted by participants. The document, and in particular the conclusions adopted by workshop participants, will serve as a basis for further analytical work aimed at improved fisheries management and a more effective implementation of major international fisheries instruments.

Report of the FAO/CECAF Working Group on the Assessment of Small Pelagic Fish – Subgroup South. Elmina, Ghana, 12-20 September 2018. Apr 04 2020 The fourth meeting of the FAO/CECAF Working Group on the Assessment of Small Pelagic Fish – Subgroup South was held in Elmina, Ghana from 12-20 September 2018. The overall objective of the Working Group is to contribute to the improved management of small pelagic resources in West Africa through the assessment of the state of the stocks and fisheries in order to ensure sustainable use of these resources for the benefit of coastal countries. The species assessed by the Working Group were: sardinella (*Sardinella aurita* and *Sardinella maderensis*), bonga (*Ethmalosa fimbriata*), anchovy (*Engraulis encrasicolus*) and horse mackerel (*Trachurus trecae* and *Decapterus rhonchus*), and other Carangidae, in the region between the northern border of Guinea-Bissau and the southern border of Angola. La quatrième réunion du Groupe de travail FAO/COPACE sur l'évaluation des petits pélagiques – Sous-groupe Sud, s'est tenue à Elmina, Ghana, du 12 au 20 septembre 2018. L'objectif général du Groupe de travail est d'améliorer la gestion des ressources en petits pélagiques en Afrique de l'Ouest grâce à l'évaluation de l'état des stocks et des pêcheries de façon à assurer une utilisation durable de ces ressources au bénéfice des pays côtiers. Les espèces évaluées par le Groupe de travail sont les suivantes: les sardinelles (*Sardinella aurita* et *Sardinella maderensis*), l'ethmalose (*Ethmalosa fimbriata*), l'anchois (*Engraulis encrasicolus*) et les chinchards (*Trachurus trecae* et *Decapterus rhonchus*) et autres carangidés, dans la région située entre la frontière nord de la Guinée-Bissau et la frontière sud de l'Angola.
