**Critical Geographies of Cycling** Aug 21 2021 Examining cycling from a range of geographical perspectives, this book uses historical and contemporary case studies to look at the history, politics, economy and culture of cycling. Pursuing a post-structural position in viewing understandings of the bicycle as contingent upon time and place, author Glen Norcliffe argues for the need for widespread processes such as gendered use of the bicycle, the Cyclists' Rights Movement, and the globalization of bicycle-making to be interpreted in different ways in different settings. With this in mind, the essays in the book are divided into two sections: relational aspects are examined as Spaces of Cycling which treats technological development, innovation, and the location of production and trade of cycles, while Places of Cycling interprets specific sites of consumption - the streets of the city, in the cycling clubs, among men and women, and at the trade show. Written from a geographer's integrative perspective to offer a broad understanding of cycling, this book will also be of interest to other social scientists in urban studies, cultural studies, technology and society, sociology, history and environmental planning.

**Making Connections** Oct 03 2022

**The Politics of Canadian Foreign Policy, Fourth Edition** Feb 24 2022 The fourth edition of this widely used text includes updates about the many changes that have occurred in Canadian foreign policy under Stephen Harper and the Conservatives between 2006 and 2015. Subjects discussed include the fading emphasis on internationalism, the rise of a new foreign policy agenda that is increasingly shaped by domestic political imperatives, and the changing organization of Canada's foreign policy bureaucracy. As in previous editions, this volume analyzes the deeply political context of how foreign policy is made in Canada. Taking a broad historical perspective, Kim Nossal, Stéphane Roussel, and Stéphane Paquin provide readers with the key foundations for the study of Canadian foreign policy. They argue that foreign policy is forged in the nexus of politics at three levels – the global, the domestic, and the governmental – and that to understand how and why Canadian foreign policy looks the way it does, one must look at the interplay of all three.

**AP Human Geography Premium, 2022-2023: 6 Practice Tests + Comprehensive Review + Online Practice** Jul 28 2019 Power up your study sessions with Barron's AP Human Geography on Kahoot! – additional, free prep to help you ace your exam! Be prepared for exam day with Barron's. Trusted content from AP experts! Barron's AP Human Geography Premium: 2022-2023 includes in-depth content review and online practice. It's the only book you'll need to be prepared for exam day. Written by Experienced Educators Learn from Barron's – all content is written and reviewed by AP experts Build your understanding with comprehensive review tailored to the most recent exam Get a leg up with tips, strategies, and study advice for exam day – it's like having a trusted tutor by your side Be Confident on Exam Day Sharpen your test-taking skills with more practice in this updated edition! 6 full-length practice tests – 3 in the book, including a new diagnostic test to target your studying, and 3 more online Strengthen your knowledge with in-depth review covering all Units on the AP Human Geography Exam Reinforce your learning with practice questions at the end of each chapter Online Practice Continue your practice with 3 full-length practice tests on Barron's Online Learning Hub Simulate the exam experience with a timed test option Deepen your understanding with detailed answer explanations and expert advice Gain confidence with scoring to check your learning progress

**The Geography of the Internet** Jul 20 2021 This timely book presents a wide range of quantitative methods, including complex network analysis and econometric modelling, to illustrate how the Internet both follows, and at the same time challenges, more traditional geographies. Emmanouil Tranos explores the spatiality of the Internet, its physical infrastructure, and the geographic and socio-economic factors that shape its spatial distribution. He shows that although the Internet is a technical system with strong topological attributes, an almost 'hidden' spatial dimension also exists. The scattering of Internet Backbone Networks across European city-regions is compared with the aviation network in order to better understand the topology of the digital infrastructure. Finally, a causality analysis demonstrates the significant positive effect of the Internet infrastructure in the economic development of regions characterized by high absorptive capacity. This book will prove a highly fascinating read for those with an interest in Internet geographies, ICTs, regional development and infrastructure, digital economy, network analysis, and regional science. Practitioners working on local and regional development, as well as those focusing on ICTs, digital economy and smart cities, will also find this book to be an invaluable reference tool.

**Canadian Defence Policy in Theory and Practice** May 06 2020 This edited volume provides a comprehensive overview of contemporary debates and issues in Canadian defence policy studies. The contributors examine topics including the development of Canadian defence policy and strategic culture, North American defence cooperation, gender and diversity in the Canadian military, and defence procurement and the defence industrial base. Emphasizing the process of defence policy-making, rather than just the outcomes of that process, the book focuses on how political and organizational interests impact planning, as well as the standard operating procedures that shape Canadian defence policy and practices.

**Working Feminism** Jan 02 2020 How feminist theory can be practically used in women's lives

**Die Macht der Geographie** Dec 13 2020 Weltpolitik ist auch Geopolitik. Alle Regierungen, alle Staatschefs unterliegen den Zwängen der Geographie. Berge und Ebenen, Flüsse, Meere, Wüsten setzen ihrem Entscheidungsspielraum Grenzen. Um Geschichte und Politik zu verstehen, muss man selbstverständlich die Menschen, die Ideen, die Einstellungen kennen. Aber wenn man die Geographie nicht mit einbezieht, bekommt man kein vollständiges Bild. Zum Beispiel: Russland: Von den Moskauer Großfürsten über Iwan den Schrecklichen, Peter den Großen und Stalin bis hin zu Wladimir Putin sah sich jeder russische Staatschef denselben geostrategischen Problemen ausgesetzt, egal ob im Zarisismus, im Kommunismus oder im kapitalistischen Neopopulismus. Die meisten Häfen frieren immer noch ein halbes Jahr zu. Nicht gut für die Marine. Die nordeuropäische Tiefenebene von der Nordsee bis zum Ural ist immer noch flach. Jeder kann durchmarschieren. Russland, China, die USA, Afrika, Lateinamerika, der Nahe Osten, Indien und Pakistan, Japan und Korea, die Arktis und Grönland: In zehn Kapiteln zeigt Tim Marshall, wie die Geographie die Weltpolitik beeinflusst und beeinflusst hat.

**A Regional Geography of the United States and Canada** Oct 23 2021 In this comprehensive new text, Chris Mayda offers an exciting alternative to conventional North American geographies. Throughout her thorough discussion of the physical and human geography of the United States and Canada, the author weaves in the key themes of environment and sustainability. Her inclusive and cohesive narrative highlights not only the diversity and richness of each region but the fundamental connections that link the continent. In the course of her research, Mayda traveled to every state and province in the United States and Canada, imbibing her writing and photographs with authenticity and immediacy. She traces the problems each region faces but also illuminates the positive actions that Americans and Canadians are taking to position their countries as healthy leaders in the world economy. Combining incisive analysis, rich description, human stories, and vibrant photographs, this text offers a complete and vivid portrait of the region from human, physical, and cultural perspectives. Designed expressly for ease of teaching and learning, the book features four-color photographs and maps throughout, chapter highlights, key term and place listings for each chapter, discussion questions, and a glossary, plus PowerPoint slides, and a sustainability blog on the book's website: <http://everythingconnectedblog.wordpress.com/>.

**Understanding World Regional Geography** Nov 11 2020 Understanding World Regional Geography (UWRG) is a course designed to teach students to think and apply geographic concepts long after the course is over. Author Erin Fouberg draws from her expertise in geography education and research in student learning to create a product that has a strong pedagogical framework designed to engage students and deepen their understanding of the world by having them "DO" Geography. UWRG includes features that help students learn to read cultural and physical landscapes, ask geographic questions, apply geographic concepts, and make connections. It integrates 25 threshold concepts and teaches students how geographers apply these concepts and asks them to apply these concepts themselves. This enables them to grasp the complexities of the world and provides them with the knowledge and thinking skills necessary to understanding it. UWRG is the first introductory course to integrate ESRI ArcGIS Online thematic maps, enabling students to engage with course materials, see patterns, and answer geographic questions.

**Multiculturalism and the History of Canadian Diversity** Oct 30 2019 Arguing that Canada's multicultural policies are propelled by a fantasy of unity rooted in a European drive to control diversity, Day suggests that state intervention can never bring an end to tensions related to ethnocultural relations of power.

**The Canadian Monthly and National Review** Jun 06 2020

**Civic Education and Youth Political Participation** Apr 16 2021 Why does it appear that many young people are disengaging from democracy and political participation? For many governments, politicians, academics, social commentators and researchers this is a serious and challenging problem. Consequently widespread interest exists on how to engage young people in politics and democracy.

**Canada's Changing North** Apr 04 2020 Among the many recent developments explored in Canada's Changing North is the legal recognition of aboriginal rights by the Canadian state, which has led directly to significant increases in their political and economic power. It also examines how economic development, which has long focused on non-renewable natural resources, particularly minerals, has grown to an enormous scale. Development of arctic oil and gas, which hinges on world supplies and national and international politics, has meant major changes across the North. Some of the new national parks in the Canadian North are already under threat from mineral development. Northern tourism has made it possible for a wide variety of affluent visitors to visit hitherto remote areas, affecting the ecology. The final selection, on northern challenges, discusses critical issues such as the impact of climatic change, the social needs (e.g. housing, education) of a rapidly increasing aboriginal population, environmental protection of unique regions, and defence of Arctic sovereignty. Of the sixty-two readings in this edition, forty-one are new.

**Regional Geography of the United States and Canada** Mar 16 2021 The fifth and thoroughly revised edition of *Regional Geography of the United States and Canada* provides a rich and comprehensive overview of both the physical and human geography of these two countries, and in the true spirit of geography, the interactions and interrelations of the physical and human. Following long traditions of the discipline of geography, this text incorporates words, maps, drawings, photographs, and numerical data to present its information in an engaging way. After covering beneficial precursor topics—such as the basics of physical and human geography—the text explores fifteen regions of the US and Canada. The authors observe and describe our planet's geography in thorough and accessible detail, while laying out the spatial basics of the location, shape, and size of the different regions, and summarizes their most distinctive thematic qualities. Physical topics covered include the region's topography and landforms, soils, climate, hydrography, vegetation, and wildlife. The human topics include the region's population; the ethnicities and settlement history of its people; economic activities, including agriculture, forestry, mining, fishing, manufacturing, and service industries; cities; and transportation. In-depth essays expand on specific topics of interest and importance, while outlook sections prognosticate about the near future of the regions. Each chapter concludes with a bibliography of books, articles, and reports that provide further sources for the interested reader.

**New Canadian Geography** Dec 01 2019

**A Regional Geography of the United States and Canada** Nov 23 2021 Now in a thoroughly revised and updated edition, this text offers a comprehensive discussion of the physical and human geography of the United States and Canada, weaving in the key themes of environment and sustainability throughout.

**Canadian Geography** Jun 30 2022 **Canadian Geography: A Scholarly Bibliography** is a compendium of published works on geographical studies of Canada and its various provinces. It includes works on geographical studies of Canada as a whole, on multiple provinces, and on individual provinces. Works covered include books, monographs, atlases, book chapters, scholarly articles, dissertations, and theses. The contents are organized first by region into main chapters, and then each chapter is divided into sections: General Studies, Cultural and Social Geography, Economic Geography, Historical Geography, Physical Geography, Political Geography, and Urban Geography. Each section is further sub-divided into specific topics within each main subject. All known publications on the geographical studies of Canada—in English, French, and other languages—covering all types of geography are included in this bibliography. It is an essential resource for all researchers, students, teachers, and government officials needing information and references on the varied aspects of the environments and human geographies of Canada.

**A Social Geography of Canada** Sep 21 2021 This collection of essays focus on subjects which formed the basis of his life's work – the changing character of Canadian landscape and society, and the urbanization of that society, including aspects of its historical evolution, its present spatial forms and current social issues.

**Making Connections** Nov 04 2022

**A Line of Blood and Dirt** Feb 01 2020 "This book examines the creation and enforcement of Canada United States border from 1775 until 1939. Built with Indigenous labour and on top of Indigenous land, the border was born in conflict. Federal administrators used deprivation, starvation, and coercion to displace Indigenous communities and undermine their conceptions of territory and sovereignty. European, African American, Chinese, Cree, Assiniboine, Dakota, Lakota, Nimiipuu, Coast Salish, Ojibwe, and Haudenosaunee communities faced a diversity of border closure experiences and timelines. Unevenness and variation served as hallmarks of the border as federal officials in each country committed to a kind of border power that was diffuse and far reaching. Utilizing Historical GIS, this book showcases how regional conflicts, political reorganization, and social upheaval created the Canada-US border and remade the communities who lived in its shadows"--

**Canadian Books in Print. Author and Title Index** Jan 14 2021

**Anarchy and Geography** Mar 28 2022 This book provides a historical account of anarchist geographies in the UK and the implications for current practice. It looks at the works of Frenchman Étienne Reclus (1830–1905) and Russian Pyotr Kropotkin (1842–1921) which were cultivated during their exile in Britain and Ireland. Anarchist geographies have recently gained considerable interest across scholarly disciplines. Many aspects of the international anarchist tradition remain little-known and English-speaking scholarship remains mostly impenetrable to authors. Inspired by approaches in historiography and mobilities, this book links print culture and Reclus and Kropotkin's spheres in Britain and Ireland. The author draws on primary sources, biographical links and political circles to establish the early networks of anarchist geographies. Their social, cultural and geographical context played a decisive role in the formation and dissemination of anarchist ideas on geographies of social inequalities, anti-colonialism, anti-racism, feminism, civil liberties, animal rights and 'humane' or humanistic approaches to socialism. This book will be relevant to anarchist geographers and is recommended supplementary reading for individuals studying historical geography, history, geopolitics and anti-colonialism.

**Higher Education in Canada** Jun 18 2021 Published in 1997. People wishing to learn the major phases in the development of Canada's twelve postsecondary higher education systems over the 1945-95 period will find this an essential starting point.

*Making Connections* Sep 02 2022

*World Intellectual Property Report 2019 – The Geography of Innovation: Local Hotspots, Global Networks* Mar 04 2020 Where exactly is innovation taking place? Relying on millions of patent and scientific publication records, the *World Intellectual Property Report 2019* documents how the geography of innovation has evolved over the past few decades.

*Historical Dictionary of the Discovery and Exploration of the Northwest Passage* Aug 09 2020 The Northwest Passage was repeatedly sought for over four centuries. From the first attempt in the late 15th century to Roald Amundsen's famous voyage of 1903-1906 where the feat was first accomplished to expeditions in the late 1940s by the Mounties to discover an even more northern route, author Alan Day covers all aspects of the ongoing quest that excited the imagination of the world. This compendium of explorers, navigators, and expeditions tackles this broad topic with a convenient, but extensive cross-referenced dictionary. A chronology traces the long succession of treks to find the passage, the introduction helps explain what motivated them, and the bibliography provides a means for those wishing to discover more information on this exciting subject.

*The Journal of the Manchester Geographical Society* Oct 11 2020

*Evidence of Things Not Seen* Sep 09 2020 *Evidence of Things Not Seen* is an interdisciplinary study of blackness in genre literature of the Americas. When mystery, romance, fantasy, mixed-genre, and science fiction writers center fantastical blackness, they make this expressive quality available to a broad audience that uses pop fictions' imaginable vocabularies to reshape extra-literary realities. Ultimately, popular genres' imaginable possibilities help us strategize ways that the made up can be made real.

*Canada and the Global Economy* Aug 28 2019 An analysis of geographic trends in the Canadian economy studying patterns of development, consumption, shifts in employment, and the locational behavior of industries. The 24 essays written by Canadian economic geographers explore themes in regards to the openness of the Canadian economy, its simple economic geography in regional variation of resources and urban development, its rapid advances in technology, and the role of government in national and international markets. Canadian card order number C96-900023-5. Annotation copyright by Book News, Inc., Portland, OR

*Canadian Geographical Journal* Feb 12 2021 Volumes for 1930-Dec. 1930 include section "Amongst the new books."

*Geography and Technology* May 18 2021 This volume celebrates the 100th anniversary of the Association of American Geographers. It recognizes the importance of technologies in the production of geographical knowledge. The original chapters presented here examine technologies that have affected geography as a discipline. Among the technologies discussed are cartography, the camera, aerial photography, computers, and other computer-related tools. The contributors address the impact of such technologies on geography and society, disciplinary inquiries into the social/technological interfaces, high-tech as well low-tech societies, and applications of technologies to the public and private sectors. *Geography and Technology* can be used as a textbook in geography courses and seminars investigating specific technologies and the impacts of technologies on society and policy. It will also be useful for those in the humanities, social, policy and engineering sciences, planning and development fields where technology questions are becoming of increased importance. Geography clearly has much to learn from other disciplines and fields about geography/technology linkages; others can likewise learn much from us.

*Hands-On English Language Learning - Early Years* Sep 29 2019 *The Hands-On English Language Learning program* is a resource for classroom teachers, specialist teachers working with English-language learners, and other educational professionals who support these students. To assist your students in developing language skills, this resource includes: specific curricular connections for each lesson to identify links to subject-area themes in language arts, mathematics, science, social studies, health, physical education, and the arts integrated class activities to promote learning in context for all students in the classroom suggested activities focus on curricular topics in all subject areas, while supporting English language learners relevant topics such as the classroom and school, clothing, food, hobbies and interests, plants and animals of Canada, the world, and the environment age-appropriate, high-interest learning activities that foster the development of essential English language vocabulary and skills in listening, speaking, reading, writing, viewing, and representing activities (in keeping with the philosophy of all Portage & Main Press Hands-On programs) that are student-centred and focus on real-life, hands-on experiences Please note: All blackline masters are included on a CD.

*Geographies of Schooling* Apr 28 2022 This open access book explores the complex relationship between schooling as a set of practices embedded in educational institutions and their specific spatial dimensions from different disciplinary perspectives. It presents innovative empirical and conceptual research by international scholars from the fields of social geography, pedagogy, educational and social sciences in Germany, the United Kingdom, France, Czechia, Hungary, Austria, Switzerland, Norway and Canada. The book covers a broad range of topics, all examined from a spatial perspective: the governance of schooling, the transition processes of and within national school systems, the question of small schools in peripheral areas as well as the embeddedness of schooling in broader processes of social change. Transcending disciplinary boundaries, the book offers deep insights into current theoretical debates and empirical case studies within the broad research field encompassing the complex relationship between education and space.

*History of Literature in Canada* Jan 26 2022 The development of literature in Canada with an eye to its multicultural, multiethnic, multilingual nature.

*Geography Education for Global Understanding* Jul 08 2020 This book presents the core concepts of geographical education as a means of understanding global issues from a spatial perspective. It treats education, supported by high standards, approaches, methodologies, and resources, as essential in exploring the interactions of the world's human and environmental systems at local, regional, and global scales embedded in the nature of the discipline of geography. It covers topics such as climate change, sustainable development goals, geopolitics in an uncertain world, global crisis, and population flows, which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies. Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K-12 education in significant countries around the globe. The book discusses factors such as the Internet, social media, virtual globes and other technological developments that provide insights into and visualization – in real time – of the intensity of relationships between different countries and regions of the earth. It also examines how this does not always lead to empathy with other political, cultural, social and religious values: terrorism threats and armed conflicts are also essential features of the global world. This book opens the dialogue for global understanding as a great opportunity for teachers, educators, scholars and policy makers to better equip students and future citizens to deal with global issues.
