Teaching Our Children to Read Sep 28 2019 Teaching reading isn't an "either/or" situation of phonics versus whole language. Rather, it's both, with the essential added ingredient of skills training. Well-documented evidence supports this balanced approach, and now this new book offers the guidelines you need to make sure all kids become automatic readers. Prominent educator Bill Honig explains why just giving students high-quality reading matter and encouraging a love for reading isn't enough: Students need a comprehensive, organized skills development program if they are to read well enough to understand the world around them.

Reading the New Testament for the First Time May 29 2022 The purpose of this book is to introduce the New Testament to those who have never read it. Ronald Allen offers a truly elementary guide to the New Testament's world, its story, and its message. Reading the New Testament for the First Time walks readers through the New Testament, covering key topics like these: how to find one's way around the New Testament how and when the New Testament was written important characters like Jesus, Paul, and the twelve disciples big ideas found in the New Testament such as love, righteousness, and the realm of God how to apply the New Testament to our lives today and much more! **Reading Hebrews In First-Century Context and Early Christianity** Jun 17 2021 Paul's epistle to the Hebrews is one of the most detached and polemical letters in the whole Bible, making it one of the most difficult documents to study. In the letter to the Hebrews, we find the basic concept of the author's theology on the topics of the sanctuary and the high priest in the temple. What made Hebrews a special letter is a sermon and refined oral style. Another feature of Hebrews is its originality and Paul's use of the Old Testament. The Christology in Hebrews focuses on Christ's preexistence and divine status, as well as the humility that makes him our example. Hebrews portrays Jesus as ultimate high priest, who sacrificed himself once for all to atone for human sins.

Children's Reading Comprehension and Assessment Mar 15 2021 Originating in a recent CIERA conference held at the University of Michigan, this book brings together the nation's most distinguished researchers to examine how readers understand text and how comprehension is assessed. The first part provides both national and historical contexts for the study of reading comprehension. The second part examines how vocabulary, motivation, and expertise influence comprehension, and it includes analyses of the developmental course and correlates of comprehension. Chapters in the third part consider how schools focus on comprehension for instruction and assessment. The fourth part includes chapters on large-scale assessment that analyze how test formats and psychometric characteristics influence measures of reading comprehension. At the end of each part is a commentary--written by an expert--that reviews the chapters, critiques the main points, and synthesizes critical issues. Key features of this outstanding new book include: *Integration of Research and Practice--provides a bridge between conceptual issues studied by researchers concerned with reading comprehension theories and practical issues addressed by educators concerned with classroom instruction and assessment. *Comprehension Focus--provides a thorough history and rigorous research-based analyses of reading comprehension. *Assessment Focus--provides innovative approaches to comprehension assessment that include the influences of vocabulary, decoding, and motivation. *Synthetic Commentaries--provides periodic summaries that analyze and synthesize research, practices, and issues discussed in each part. *Expertise--contributing authors and commentators are highly respected authorities on reading comprehension (see table of contents). This text is appropriate for educational and psychological researchers, reading educators, and graduate students in education and psychology. It is part of the CIERA series, which includes the following volumes: Taylor and Pearson: *Teaching Reading: Effective Schools, Accomplished Teachers* (2002) Van Kleeck, Stahl, and Bauer: *On Reading Books to Children: Parents and Teachers* (2003) Hoffman and Schallert: *The Texts in Elementary Classrooms* (2005) **New Perspectives in Reading Instruction** Dec 12 2020

Peer Play and Relationships in Early Childhood Jun 25 2019 This book offers a rich collection of international research narratives that reveal the qualities and value of peer play. It presents new understandings of peer play and relationships in chapters drawn from richly varied contexts that involve sibling play, collaborative peer play, and joint play with adults. The book explores social strategies such as cooperation, negotiation, playing with rules, expressing empathy, and sharing imaginary emotional peer play experiences. Its reconceptualization of peer play and relationships promotes new thinking on children's development in contemporary worlds. It shows how new knowledge generated about young children's play with peers illuminates how they learn and develop within and across communities, families, and educational settings in diverse cultural contexts. The book addresses issues that are relevant for parents, early years' professionals and academics, including the role of play in learning at school, the role of adults in self-initiated play, and the long-term impact of early friendships. The book makes clear how recent cultural differences involve digital, engineering and imaginary peer play. The book follows a clear line of argument highlighting the importance of play-based learning and stress the importance of further knowledge of children's interaction in their context. This book aims to highlight the narration of peer play, mostly leaning on a sociocultural theoretical perspective, where many chapters have a cultural-historical theoretical frame and highlight children's social situation of development. During the author's decade of critical ethnography in Carpinteria, California, she has illuminated the intricate relationships between Latino families as together they build a sociopolitical community to bridge family and school alliances. How they extend their learning from the social networks to the family arena and to the personal, and in reverse, represents their protean responses to the diversity and adversity in their lives. This life-story captures the collective and individual texts of the Latino children, their parents and educators used to empower themselves to transform discontinuity in an age where continuity is increasingly foreign.

Small Groups for the Rest of Us May 05 2020 Most churches in America struggle to have a significant percentage of their adult attendance in small groups. According to recent research done by Lifeway Research, only "33 percent of churchgoers attend classes or groups for adults (such as Sunday school, Bible study, small groups, or Adult Bible Fellowships) four or more times in a typical month. Fourteen percent attend two or three times a month." Life transformation happens best within the context of community, so if a church is going to be intentional about discipleship they have to develop on-ramps to small groups that reach people on the fringes and beyond. If we continue to offer small groups to the normal church attenders, a majority of the people who show up to church are never reached. Pastors, church staff and small group leaders are trying to figure out how to make small groups work in their church and they don't know how. Small Groups For The Rest Of Us gives them practical, proven strategies on moving people from the fringes into biblically based communities.

Das egoistische Gen Jan 25 2022 p"Ein auch heute noch bedeutsamer Klassiker" Daily Express Sind wir Marionetten unserer Gene? Nach Richard Dawkins' vor über 30 Jahren entworfener und heute noch immer provozierender These steuern und dirigieren unsere von Generation zu Generation weitergegebenen Gene uns, um sich selbst zu erhalten. Alle biologischen Organismen dienen somit vor allem dem Überleben und der Unsterblichkeit der Erbanlagen und sind letztlich nur die "Einweg-Behälter" der "egoistischen" Gene. Sind wir Menschen also unserem Gen-Schicksal hilflos ausgeliefert? Dawkins bestreitet dies und macht uns Hoffnung: Seiner Meinung nach sind wir nämlich die einzige Spezies mit der Chance, gegen ihr genetisches Schicksal anzukämpfen.

Black Education Mar 03 2020 This highly focused collection of papers, commissioned by the National Urban League, offers a candid and courageous portrait of black education in transition. This is a period, as the editors note in their opening remarks, that is characterized by a huge shift from federal responsibility for minority education to authority and autonomy being lodged at the local government level. Further, many institutions that once worked well, no longer do so. Many ambitious social programs and policies that originally promised much, have been abandoned, have failed, or just faded away. Pivotal to these times and changes is the question of the extent to which the American educational system has been, or still is, capable of being responsive to incorporating and even instigating equity and excellence for black Americans. This volume asks the hard questions: is the educational system geared up for the maintenance of anything other than mainstream values? can it adapt to minority youth requirements? when, why, and how do educational policies of majorities and minorities clash? How are priorities to be established on the basis of wealth or need? The legal statutes and administrative enforcement of equal educational opportunities are explored in depth and with a deep compassion for all parties involved.
