A Comprehensive Guide to Child Psychotherapy and Counseling Jun 25 2019 Christiane Brems, an experienced clinician, supervisor, and educator, presents a metatheoretical yet practical guide to working with children ages 3 to 12 years. She draws heavily on developmental, interpersonal, family systems, and self-psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner. She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family. Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners. Divided among four sections, the chapters follow the logical development of clinicians, mirroring the natural flow of work with children from the practitioners self-exploration, to learning about special aspects of children (such as diversity and development), to awareness about the special needs and demands of children as related to environmental, legal, and ethical issues. Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children. She walks child therapists and counselors through the initial stages of intake, assessment, and conceptualization. The material on assessment instruments is thoroughly updated; discussions refer to the latest versions of instruments, and if new instruments emerged that meet one of the purposes deemed essential to child treatment, they are included. The text contains case examples, each illustrating a specific therapeutic technique.

[The College Counselor's Guide to Group Psychotherapy](#) Jul 27 2019 Group psychotherapy in college counseling centers continues to thrive as a popular approach to working with college students, and yet there continues to be a lack of up-to-date, comprehensive resources for group psychotherapists working with this unique population. The College Counselor's Guide to Group Psychotherapy highlights the role of the group therapist within college counseling centers; provides practical, step-by-step instructions for creating a thriving group program and culture; and unveils some of the opportunities to expand this under-recognized practice setting. This exciting new volume draws on the most current knowledge on group psychotherapy while paying particular attention to issues and ethical dilemmas that are unique to working with college students.

[Driving from Japan](#) Jan 01 2020 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Feasible Planet - A Guide to More Sustainable Living Dec 12 2020 Are you concerned about the state of our planet and hope that governments and corporations will find a sustainable way for us to live? If you do not think about it too hard, that may work, but will it? Left on their own, with drivers of popularity and profits, I am not too convinced that it will. The missing part of this equation is you and me. Individuals who believe that corporations and governments can do better. Individuals who believe that through action, we can buy a bit more time to develop and implement solutions to our critical issues. Did I hear a groan out there when you read the word 'actions'? Do not worry! Most of the actions that I am referring

to will not only help save the planet, but will benefit you right away through saving money, time, better health, and having a happier life in general. Sustainability goes beyond controlling our consumption and pollution. There are key social, political, and economic areas that need to be addressed as well, and there are several steps that individuals can take to help in these areas. For those of you who feel we could do more, this book is for you and is loaded with actionable activities, the reasons for doing them, and explores why we are not doing them already. Every journey starts with a first step. Hopefully this book will lead to those first sustainable steps and that will change the world.
