[An English Grammar for the Use of Junior Classes](#) Mar 15 2021 Excerpt from An English Grammar for the Use of Junior Classes This Grammar is designed, as its title indicates, for the use of Junior Classes in the Schools throughout the Province. The same definitions have been given in it as in the larger and more advanced Grammar, authorized by the Council of Public Instruction; and, where the mode of expression has been altered, the change has been made with a view to rendering the subject more easily understood by the class of pupils for whom it specially intended. It may, therefore, be considered as an introductory Grammar to the Analytical and Practical Grammar, and not by any means as intended to supersede it. Keeping in view the fact that it is intended rather for beginners in the study of Grammar, than for those more advanced, the Editor has embraced in the Questions every point referred to both in the body of the work and also in the appended remarks. Under the guidance of a judicious teacher these Questions may be made useful to the pupil, by enabling him to test himself, by way of question and answer, on the lesson which may have been assigned to him for preparation. The teacher, however, should carefully avoid, as a general rule, asking the questions in the identical form in which they are found in the Grammar. They are given with a view to aid the pupil rather than the teacher. It cannot be expected that in such a Grammar all the examples of difference in Gender, Number, &c., should be given. Much is necessarily left to be supplemented by the Teacher. The subject of Analysis has, it is hoped, not received too prominent consideration, for it performs a very important part in enabling pupils to read correctly and intelligently. **Outlines of English Grammar** Dec 12 2020 Excerpt from Outlines of English Grammar: For the Use of Junior Classes The previous editions of this work have been received with so much favour that I have been emboldened to introduce into the present what I hope will be found some considerable improvements. The general plan of the work remains unaltered. The object aimed at has been to take young learners at that stage when they have acquired such elementary ideas on the subject of grammar as may be gained from my "First Notions of Grammar," and to reduce those ideas to regular form by means of careful definitions and plain rules, expressed always in the briefest manner consistent with rigid accuracy, and illustrated by abundant and varied examples for practice. A clearer and more intelligible style of typography has been adopted, and the amount of matter in the text has been slightly increased. In particular the learner's attention has been from time to time directed to the older forms of the language. It is not intended that he should, at first starting, learn these by heart, but by the time he has mastered the rest of the text, he might do this with advantage. No attempt has been made to deal with everything that comes under the head of "English Grammar," or to introduce the young learner to difficulties which he would be incapable of mastering.
